BEL-ART PRODUCTS

**Simplifying tasks with innovative product solutions
for science, industry and healthcare.**

Bel-Art Products tools for science are sold worldwide through authorized distributors. If you are interested in becoming a Bel-Art Products authorized distributor please contact our sales department at sales@belart.com for current terms and conditions.

Bel-Art Products proudly manufactures over 85% of its products in the United States.

About Our Cover

Founded and headquartered in New Jersey, Bel-Art Products is pleased to showcase historical photos of Thomas Edison's West Orange, NJ chemistry laboratory complex on our cover. Established in 1887, and active until shortly after Edison's death in 1931, the complex and his Glenmont Estate are now preserved as a national park and house one of the largest museum and archival collections in the National Park System.

Cover photos and photo at right provided courtesy of U.S. Dept. of the Interior, National Park Service, Thomas Edison National Historical Park.

Edison at the bat and
Connie Mack catching,
1927.

Every Day, People Make a Difference

"Genius is one percent inspiration and 99% perspiration" – Thomas Edison

Featured on our cover is the West Orange, NJ laboratory complex which brought forth some of Thomas Edison's most notable inventions. With over 1500 worldwide patents to his name, Edison was a prolific inventor, but there are many who would argue that Edison's greatest invention, never patentable, is actually the subject of these photos – the organization of the world's first industrial research facility. Beginning in Menlo Park, NJ in 1876 and later at this much larger facility built in 1887, teams of workers led by Edison collaborated to develop ideas into useable products.

As an inventor, scientist and businessman Edison lived his beliefs with tenacity, curiosity and passion. "I have not failed, I've just found 10,000 ways that won't work" and "Just because something doesn't do what you planned it to do doesn't mean it's useless" reflect an incredible capacity to search for answers and in turn, inspire those around him to search for excellence.

70 years later in 1946, with little more than a sewing machine, strong work ethic, and gift for relationships, another pair of New Jersey residents Kurt and Anny Landsberger would begin to make their own mark in the now well-established industrial research industry, science and healthcare markets.

Originally manufacturing and selling household aprons and tablecloths, the Landsbergers soon discovered that the plastic material they were using to make these items was chemically resistant, and they began marketing their products to laboratory and medical supply houses pioneering the use of plastic equipment in the laboratory.

From those humble beginnings of one sewing machine and two industrious people, came Bel-Art Products, a company that today is proud to be recognized as a leading manufacturer of over 2,000 products used in scientific, industrial and healthcare laboratories worldwide.

Though his beloved Anny passed away this year, Mr. Landsberger, (or KL as we like to call him) now 89 years young, continues to actively participate in the business working alongside his son and company President, David.

Recently someone at Bel-Art Products inquired to KL about a trip that he took to Las Vegas to attend a trade show and if he had tested his luck in the casinos. With characteristic dry humor he was heard to reply "I'm not a gambler, that's why I started a company!"

Not a gamble? You bet it was! But, it was a gamble backed by a strong work ethic, fueled by a passion to pursue innovative products and processes, and nurtured by respect for his customers.

The investigation, understanding and unraveling of life's mysteries that our customers seek in the laboratory also requires great dedication and passion. Whether your work finds you in a small start-up or a well established entity we are honored to be part of this process and thank you for choosing Bel-Art Products as a supplier. As KL will tell you, one person always makes a difference, because whether we work alone or in teams, we are all part of a greater team – Team Humankind.

Bench-Top Biohazard Bags

Easy Open, Dispose Used Tips and Tubes

Bright red, autoclavable bags feature one long flap for easy opening. Their size allows the bag to be inverted over your hand to safely pick up waste. For a space-saving disposal unit in fume hoods or on bench tops, use them with Poxygrid® Desk Model Bag Holder H13193-1000.

Printed with the biohazard symbol and sterilization indicator patch, they are made of High Molecular Weight, High-Density (HMHD) polyethylene and pass ASTM 1922 Tear Resistance and ASTM 1709 Dart Impact Tests. Steam autoclavable at 121°C (250°F). **Per box, 100 or 1000.**

CATALOG NO.	SIZE	DESCRIPTION	THICKNESS
F13166-0000	0.43 Gallon	100pc. 22 x 28cmH (8.5 x 11")	0.018mm (0.72 mil)
F13166-0001	0.43 Gallon	1000pc. 22 x 28cmH (8.5 x 11")	0.018mm (0.72 mil)

Quick Method for Waste Pick-up

Insert gloved hand into bag.

Pick up waste materials with hand inside bag.

Peel bag over the hand, turning it inside out while maintaining grip on waste material.

Waste is now inside bag and ready for autoclaving.

Bag Holder for Bench-Top Biohazard Bags

Poxygrid® Handy Disposal Holder for Labs and Medical Offices

Economical and convenient, this rectangular frame holds a polyethylene bag 22 x 28cm (8½ x 11") which is just the right size for collecting pipette tips, microcentrifuge tubes, etc. during daily use. The steel wire holder is coated in durable biohazard orange epoxy and measures 8.5 x 12.7 x 21.6cm H (3¼ x 5 x 8½"). Use with Bench Top Biohazard Bags H13182-0812, page 7, and F13166-0000 shown above.

Autoclave Safe Bag Clips – Clavies®

These clips can be opened and closed with one hand to easily and securely close the gathered top of an autoclave bag after it has been filled with wastes. Stiff plastic design holds the bag neck closed while allowing release of internal pressure that can develop during the autoclave cycle. After autoclaving, the clip is left on the bag for final disposal. Closed internal dimension is 7/16". Suitable for bench-top sized bags or small autoclave bags ranging in size from 12 x 24" to 19 x 23", catalog numbers F13160-0009, F13160-0005, F13185-1224, F13164-1419 and F13164-1923. Use with larger bags is not advised. **100 per bag, 10 bags per case.**

Sanitary, Reusable*

Dishwasher-safe and autoclave-safe, the reusable Disposal Carton Cover opens quickly and easily by pressing the built-in release tab – no batteries required! The cover fits any disposal carton that has

a 30.5 x 30.5cm (12 x 12") opening including F13205-0001 Biohazard Incinerator Floor Standing Carton (above) and features a smooth 10.1 x 10.1cm (4 x 4") area on top for applying labels. The center panel is red to match the printing on the Biohazard disposal cartons providing fast visual recognition of the waste stream. Compared to the disposable cardboard lids supplied with the cartons, the Disposal Carton Cover provides a wider opening 20.3 x 24.1cm (8 x 9½") permitting safer and more sanitary deposit of wastes into the container. Store the disposable cardboard lid on the bottom of the carton and when carton is full, simply remove the reusable Disposal Carton Cover, replace with the cardboard lid, and dispose of the carton in the usual fashion. Wash the Disposal Carton Cover as needed, and it's ready for re-use. Autoclavable at 121°C (250°F).

Touch Free™ Automatic Waste Cans

Safe and Easy Waste Disposal

1. Wave your hand over the sensor on the front of the waste can lid.
2. Lid automatically opens for waste disposal, then automatically closes.

It's That Simple!

A. F13202-0010
2 gallon model

B. F13202-0020
7.3 gallon model (gray)

C. F13202-0022
7.3 gallon model (red)

D. F13202-0030
12 gallon model (gray)
304 Stainless Steel Pail

All labels included with waste cans!

Biohazard, Recyclable, Trash and a Blank Label help to keep trash organized.

Touch Free™ Automatic Waste Cans

Protects Users from Waste Receptacle Contact!

The Touch Free™ Automatic Waste Can's motion sensitive lid opens automatically to accept waste, and then closes into a fitted well to reduce odor and airborne contamination. Durable and dependable, they can be used with autoclavable biohazard disposal bags or commercially available trash bags. Requires four (4) D-batteries (not included) to provide approximately 4,000 openings. An on-off switch deactivates the auto-open/close function.

Each unit comes with a brightly-colored Biohazard label, and 2 other labels for Recyclables and Trash, and a blank label for individual applications.

Available in three slim, modern designs:

A. F13202-0010 - White 2 gallon can is perfect for bench-top use and includes a removable rigid liner that won't leak or rust. Body and lid are molded of easy-to-clean ABS plastic, and the removable pail is molded of autoclavable polypropylene. Line with 14 x 19" biohazard disposal bags (see below) or suitable size standard trash bags.

B. F13202-0020, Gray and **C. F13202-0022, Red** 7.3 gallon cans have a molded polypropylene pail and ABS plastic top. Line with bag liners or biohazard disposal bags measuring 24 x 30, 24 x 36 or 25 x 35" (see below) or suitable size standard trash bags.

D. F13202-0030 - 12 gallon **Stainless Steel** can with a black ABS plastic top. Line with bag liners or biohazard disposal bags measuring 24 x 30, 24 x 36 or 25 x 35" (see below) or suitable size standard trash bags.

Use with Your Favorite Scienceware® Waste Disposal Bags, pages 7-10.

2 gallon model uses 14 x 19" bags:

F13164-1419 Biohazard Disposal Bags

F13165-1419 Super Strength Biohazard Disposal Bags

7.3 and 12 gallon models use 24 x 30", 24 x 36", or 25 x 35" bags:

F13161-0009 Biohazard Disposal Bags, 24 x 30" (printed)

F13161-0005 Biohazard Disposal Bags, 24 x 30" (plain)

F13162-0009 Biohazard Disposal Bags, 24 x 36" (printed)

F13162-0005 Biohazard Disposal Bags, 24 x 36" (plain)

F13164-2535 Biohazard Disposal Bags, 25 x 35"

F13165-2535 Super Strength Biohazard Disposal Bags, 25 x 35"

Weighted Beaker/Flask Holders

Eliminate Drifting and Tipping in Water Baths

Weighted holder grips beakers or flasks firmly in four flared stainless steel prongs. The Vikem® vinyl-coated lead ring secured beneath the holder keeps container immersed in water, provides a low center of gravity and allows water to circulate underneath the beaker. Can be used in boiling liquid up to 135°C(275°F) for 1 hour.

Scienceware® bottles are available in a variety of shapes and sizes to meet all your storage and packaging needs

BOTTLES CAN BE PURCHASED IN BULK QUANTITIES. Custom sizes and special high impact-resistant caps (for Precisionware® Bottles) are also available by special order. Please call 1-800-4BEL-ART for quotes.

Precisionware® Narrow-Mouth Bottles – Autoclavable Polypropylene

FDA Compliant Material

Ideal for pharmaceutical or similar type packaging, these translucent bottles are Boston round in style and molded from FDA compliant material. Matched polypropylene caps have a ring-seal design for a perfect, leakproof fit and are ribbed for torque-closure and easy opening. Deep square threads withstand vibration and help prevent closure back-off during shipping. Inner bottle surfaces are smooth and rounded for easy cleaning and thorough emptying. Underside of bottle lists volume, material and includes an indexing notch. Recycling codes listed on 500 and 1000 ml bottles. Autoclavable to 121°C (250°F). Do not autoclave with caps in place. **12 per bag except 1000ml, 6 per bag.**

Reagent/Acid Pump Dispenser

Excellent Flow Control for Dangerous Liquids

Aids in the transfer of acids and reagents and virtually eliminates accidental bottle breakage and spills. Squeeze the small plastic bottle to begin flow, and then press the pressure release button to immediately stop dispensing. Fits many 5 pint (80 fl. oz.) acid bottles, ½ and 1 gallon jugs, 2.5 and 4 liter bottles, and similar bottles with GPS No. 38-430 or 38-400 threaded necks (not included). Two adapters provided for short necks. **Per each, 12 per case.**

LDPE PP

CATALOG NO.

F11656-0000

Measure-Matic™ Dispenser

Measure Liquids from 5ml to 25ml Just By Squeezing the Bottle

Squeezing forces the desired volume of liquid through the tube and into the cup. When pressure is released, excess fluid returns into the bottle for spill free pouring. Polypropylene dispensing cup slides onto a polypropylene delivery tube which is set in a low-density polyethylene 500ml (16 oz) storage bottle. A supplied hollow stopper serves as a dust cover. **Per each, 6 per case.**

Autoclavable Carboys

One Hand Spigot Operation

Rugged carboys are 21 CFR 177.1520 compliant for direct contact with foods and beverages, and are USP Class VI certified for the demands of the biotechnology and pharmaceutical industries. Ideal for storing and dispensing large batches of culture media, distilled water and other solutions, they have excellent chemical resistance and large handles that help with transport. All components are FDA-grade polypropylene construction and are steam autoclavable at 121°C (250°F). When autoclaving, do not engage cap threads. The 83mm screw cap includes a built-in silicone gasket for positive seal. Molded-in bung accepts the easy-to-use spigot and is located low on carboy for more complete drainage. Available with or without spigot.

Dispensing Jug

Dispense Directly from 5 Gallon Graduated Jug without Lifting or Moving

Use this 20 liter (5 gallon) jug with molded-in gradations (in gallons) to store and dispense common solutions, including janitorial cleaners, deionized / distilled water, or other aqueous liquids. Jug is made from strong and lightweight HDPE, while the gasketed and threaded LDPE spigot extends 125mm from jug and features a 35mm long stem for dispensing. The top opening is 70mm I.D. for fast re-filling and the built-in handle (45mm high) provides for easy transport.

Dimensions: 25cm (9 7/8") sq. x 38cm (15") high. Shipping weight 1.7kg (3.7lb). **Per each, 4 per case.**

Microcentrifuge Tube Cutter

Accurately and Easily Cut Microcentrifuge Tubes

Safely and easily sections microcentrifuge tubes and eliminates the hazards of using razor blades or knives. The cutter makes it easy to retrieve radioactive pellets from the tips of tubes without resuspension or the risk of splashed radioactive substances. Works well with polyethylene or polypropylene microcentrifuge tubes up to 1.5ml. Not recommended for polystyrene tubes. Cutter has a chrome-plated body with replaceable steel blade. Maximum cut diameter is 9.4mm (0.370").

Microcentrifuge Tube Ice Rack

Deep Tray Holds Plenty of Ice or Water for Extended Use Time

This two piece rack can accommodate up to fifty 1.5 ml tubes (or other tubes with a diameter less than 12 mm) for large volume benchtop processing. It has a deep tray to hold more ice and water for extended use time, a flat perimeter rim for labeling tape, and it can be safely stacked with identical racks when loaded or empty.

Designed for long life and heavy usage, all parts are molded of sturdy polypropylene and are steam autoclavable at 121°C (250°C). To further protect tubes during transport or storage while also maintaining stackability, an optional polypropylene cover is available. Dimensions: 23.1 x 13.3 x 7.3cm H (9 $\frac{1}{8}$ x 5 $\frac{1}{4}$ x 2 $\frac{7}{8}$ " H). **Per each.**

*Adjustable Height and Centers
Holds a Wide Range of Funnel Sizes*

Separatory Funnel Rack has two adjustable support tiers that can be independently adjusted to any height on 73.6cm (29") rods. The diameters of the eight funnel locations are also adjustable with included insert clips to accept a wide range of funnel sizes up to 9.8cm (3 $\frac{7}{8}$ "). Fully extended, the rack measures 20.3 x 48.9 x 50.8cm (8 x 19 $\frac{1}{4}$ x 20") high. Four feet extend from the base for stability and have holes for permanent mounting.

Additional Separatory Funnel Rack available on page 288.

NEW PRODUCT!

15ml and 50ml Clear View Conical Tube Holder

Easily Remove Tube or Carry in Holder

Patent Pending

The most versatile tube holder on the market. Setup takes just seconds and gives you the choice of creating a 15ml or a 50ml tube holder. Unlike other tube holders, the open uprights allow you to view the entire contents of the tube. No more guessing if liquid remains in the conical bottom. Tube can be easily lifted from the holder, or pinch the uprights and carry the holder with the tube. **4 per bag.**

Adjustable Elution Racks

Perform as many as 42 elutions in one rack, saving valuable bench space. Eliminate the time and space consuming set-up of multiple support rods and stands with this rack that simultaneously supports both elution columns and collection tubes. The height of the rack can be quickly adjusted to accommodate various length elution columns. Conversion kits are available to adapt any of these racks to fit a variety of tube sizes (13mm, 16mm, 25mm and 30mm). Steam autoclavable at 121°C (250°F).

Pipettor Holder System - PiRack®

Mix and Match Components to Suit Your Needs

This polypropylene system is strong enough to support the weight of even the heaviest pipettor. Hold a single pipette with one clamp or add a triple clamp or extenders to increase the number of holders at a work location. The utility tray, which mounts between two clamps, is ideal for storing pipetting supplies or other small items. It is perfectly sized for Scienceware® No Wire™ Half Racks that hold tubes, vials, mini tubes and cuvettes (see page 295). Attach to any shelf or benchtop edge up to 2.54cm (1") thick using the large locking thumbscrew clamp. Supports many standard brands of pipettors. All components are chemical resistant and autoclavable at 121°C (250°F).

A. Flexible Gooseneck Arm with Weighted Base

This flexible arm has over twenty individual links with ball-and-socket joints for maximum range of motion. The sturdy base measures 23 x 16 cm (9 x 6"), weighs 1.5 kg (3.3 lb), and is ideal for use with pH meter probes. Centered along each edge of the base are octagonal-shaped wells (4 total) with a maximum diameter of 1.5 cm (0.6") for affixing the flexible arm, additional support rods, or holders (two thumb screws are provided). Electrode Holder (F18317-1000) sold separately.

NYLON

Aqua-Clear™ Water Conditioner - Cleanware™

*Eliminate Biofilms in Your Water Bath
Extend the Life of Film Developing Solutions*

Provides long lasting protection for the water in water baths and other water systems against the growth of algae, bacteria, molds and biofilms. Protects pumps and thermostats and helps prevent tubing from clogging. When added to water used in developer for color or X-ray films, it permits longer use of the same solution and will not harm film. Just 2ml per liter of water adds a blue tint which will fade after about 3 months reminding you to change the water and add new conditioner.

Polypropylene Sinks

Total Chemical Resistance

Sink, drainboard, backsplash and legs are made entirely of polypropylene for excellent chemical resistance and easy cleaning. Material is unaffected by acids, alkalis and boiling solutions under 121°C (250°F). A 15cm (6") high backsplash and shorter side and front lip help to contain spills and channel liquids to the sink. The sink is made from 12.7mm (½") thick material for durability, can contain approximately 20 gallons, and is available on the left or right side of the unit. A standard 1½" "S" trap with plug is included to connect to plumbing drain. Requests for custom sizes or features are welcome. Ask about longer units with double or oversize sinks and larger drainboards.

Cleanware™ Electrode Washer

Saves Time and Reduces Scratching

Provides a safe, convenient way to clean delicate pH electrodes in place without the risk of scratching or damage. The unit consists of a polyethylene spray chamber to surround electrodes, a 500ml polyethylene reservoir that holds distilled water and a length of tubing to drain discharge directly to the sink. The electrode hangs into the spray chamber and with a squeeze of the reservoir, a spray of water rinses the electrode. The base of the system is 14cm (5½") diameter and the washer is 21cm(8¼"). **Per each, 24 per case.**

CATALOG NO.
H17188-0000

Vakuwash® Cuvette Washer

All-Plastic Cuvette Washing Device

Economical, durable and gentle on delicate glass or quartz cuvettes, this all-plastic washer replaces costly, antiquated devices that are often more fragile than the cuvettes they wash. Comes complete with a 500cc polypropylene vacuum flask, Vikem® vinyl stopper and 3 ft. PVC tubing ready for connection to a vacuum line. The mouth of an inverted cuvette is pressed against the rubber cushion to induce suction. Water or other cleaning fluid poured into the 89mm (3½") diameter funnel is forcibly sprayed into the cuvette and then drains into the flask. Continued pressure on the cuvette creates an air flow which dries it. A final wash in acetone aids in removing water droplets. Minimum cuvette I.D must be 3mm or larger to fit over the spray nozzle.

Touch Free™ Automatic Waste Cans

Automatically Opens and Closes, without a Touch!

Easy and Sanitary Waste Disposal!

D A C B

1. Wave your hand over the sensor on the front of the waste can lid.
2. When the lid automatically opens, dispose of your waste, and the lid automatically closes.

It's That Simple!

The Touch Free™ Automatic Waste Can's motion-sensitive lid opens automatically to accept waste, and then closes into a fitted well that helps to reduce odor and airborne contamination. Durable and dependable, it can be used with autoclavable biohazard disposal bags or commercially available trash bags. Requires four (4) D-batteries (not included) that will provide approximately 4,000 openings. An on-off switch deactivates the auto-open/close function.

Each unit is supplied with a preprinted, brightly-colored Biohazard label, 2 others for Recyclables and Trash, and a Blank label for individualized applications.

Available in three slim, modern designs:

A. F13202-0010 - White 2.5 gallon can is perfect for bench-top use and includes a removable rigid liner that won't leak or rust. Body and lid are molded of easy-to-clean ABS plastic, and the removable pail is molded of autoclavable polypropylene. Line with Scienceware® 14 x 19" biohazard disposal bags (see bags section, pages 8-10) or suitable size standard trash bags.

B. F13202-0020, Gray and C. F13202-0022 - Red 7.3 gallon cans have a molded polypropylene pail and gray ABS plastic top. Line with Scienceware® bag liners or biohazard disposal bags measuring 24 x 30, 24 x 36 or 25 x 35" (see bags section, pages 7-10) or suitable size standard trash bags.

D. F13202-0030 - 12 gallon can has a **Stainless Steel** body and black ABS plastic lid. Line with Scienceware® bag liners or biohazard disposal bags measuring 24 x 30, 24 x 36 or 25 x 35" or suitable size standard trash bags. (See bags section, pages 7-10)

Dust Pan

Thin Front Edge to Collect Fine Particles

Molded of chemically-resistant polypropylene, this dust pan has a very thin forward edge for collecting fine dust. Excellent for liquid or semi-solid chemical waste spills, it has a curved rise near the front edge that keeps contents from accidentally falling out. The deep back permits safe transport of waste for proper disposal. Steam autoclavable at 121°C (250°F). 20.3cm (8") across the front x 16.5cm (6½") deep x 5.7cm (2¼") high back, 10.2cm (4") long handle. **Per each, 24 per case.**

CATALOG NO.

F36839-0000

The Wedge Pan

Get a Scoop on Spill Cleanup

These thin-edged, disposable pans are great for scooping up spilled chemical residue after containment by an absorbent medium. Inexpensive and convenient, these styrene pans have a recessed hand grip to keep fingers clear of the waste. Use a single pan, or gather large spills more quickly by pushing two pans toward one another. They are 17.8 x 18.4cm (7 x 7¼") and taper from a thin edge to 3.2cm (1¼") deep.

6 per bag, 6 bags per case.

CATALOG NO.

F24894-0000

Klett™ Colorimeters

Use for Colorimetric and Turbidimetric Determinations Including:

- Color
- Concentration
- Haze and Density Measurements
- Microbiology Growth Curves

Klett™ Colorimeters Offer:

- Rugged construction for long service life
- Klett™ scale is longer than many other photoelectric scales allowing greater graduation spacing for easier and more accurate readings
- Repeatable results with accuracy to 0.33% on the full scale
- Accessory filters allow measurement over complete visual range
- Measurements for both color and turbidity are possible
- Fully compensated and balanced electrical circuits do not require storage batteries or current regulators
- Available as 115 or 220V for use worldwide

These photometric colorimeters use specific light filters to give readings on a unique Klett™ scale. The readings are directly proportional to the concentration or optical density of a solution in accordance with Beers Law. Two matched photocells and a suspension galvanometer give the instrument a broad range of measurement; it is light and ambient temperature independent. A fully compensated and carefully balanced electrical circuit provides accuracy and consistency in readings. The precision galvanometer has an illuminated logarithmic scale, graduated from 1 to 1000 Klett™ and the scale is graduated in units proportional to the optical density. Repeatability is $\pm 0.33\%$ of the full scale. Two models, Clinical and Industrial are available. Each comes complete with detailed instructions, standards and guides for a wide range of tests.

The Clinical Model (800 series) uses standard 14.25 x 125mm test tubes. Calibrated or uncalibrated tubes are available and micro test tubes can be used for samples as small as 2.5ml.

The Industrial Model (900 series) accepts rectangular solution cells, which can be used in either of two directions. Measurements can then be taken at depths of 10mm, 20mm, or 40mm. A reduction plate is available to minimize solution depth to 2.5mm. An adapter is available that permits the use of test tubes.

Both models are supplied with the two most commonly used filters, blue for 400-450nm and green for 520-580nm. Additional filters are available to permit measurements over the complete visual range. **See ordering information on opposite page.**

CYLINDERS

SHOP www.belart.com

Single Scale Graduated Cylinders

Roll-Proof and Easy-to-Read

These graduated cylinders have a single metric scale with raised numerals for easy reading. Flared top rims and large spouts facilitate pouring, and octagonal-shaped bases prevent tipping and rolling. The "non-wetting" polypropylene surface eliminates concave meniscus and makes reading easier and more accurate. Chemically resistant and autoclavable at 121°C (250°F). **Per each, cases listed below.**

Clear Graduated Cylinders

Glass-clear, High Temperature Safe

Clear TPX® (polymethylpentene) cylinders are non-wetting to prevent a concave meniscus, making the raised numeral, single scale graduations easy to read. They are shatter-proof with a wide octagonal base to prevent tipping and rolling. Superior chemical resistance and safe for use to 175°C (350°F) make them a great value. Steam autoclavable at 121°C (250°F). Made of TPX® Brand PMP for easy viewing. **Per each, cases listed below.**

Holdfast® Graduated Cylinders

Grip Handle for Steady Pouring

This one-piece polypropylene cylinder with handle provides a secure, solid grip for safer pouring. It has an easy-to-read double scale with raised graduations and will not create a meniscus. A hexagonal base prevents tipping and rolling. The handle opening is 89 x 29mm (3 x 1½"). Chemically resistant and autoclavable at 121°C (250°F).

DESICCATION

SHOP www.belart.com

Desiccators

Desiccators are an economical and reliable way to assure dry, dust-free, and if necessary air-free storage of humidity sensitive products, such as valuable reagents or electronics.

Depending upon what you are storing optimal conditions can be achieved using standard desiccants in a manual or automated format, with gas purge, or by keeping the contents under vacuum.

When choosing a desiccator the following questions should be considered:

What storage environment is optimal or required?

Use this chart for an overview of the environment and benefits each method of desiccation provides.

Methods of Desiccation

Standard Desiccant	Automated, Standard Desiccant	Gas Purge	Vacuum
Manual monitoring and operation. Moisture is absorbed from air in the unit by using a desiccant. Once the desiccant is 'saturated' it must be regenerated through heating, or replaced.	Electric fans and heaters continuously regenerate the desiccant to prevent saturation and to automatically maintain a low humidity environment.	A slow steady flow of inert gas (often dry nitrogen) is provided.	Air and moisture are removed from the chamber by use of a vacuum pump.
Flexibility to use any type of desiccant (silica gel beads, activated charcoal, etc.) based on economics and convenience.	Convenience, requires minimal monitoring.	Achieve relative humidity at a much faster rate.	Best for total dry storage or if air could be damaging to material being stored.
Portability.	Precise control of humidity. Operates on a set schedule of desiccation followed by a regeneration period.	Dust free and desirable for many applications including clean room environments.	Dust free and desirable for many applications including clean room environments.
Economical functionality. Most desiccants can be regenerated periodically.	Process uses silica gel beads that last for thousands of regeneration cycles.	Option to close stopcocks and use with regular desiccants.	Option to close stopcocks and use with regular desiccants.

What size(s) are the items you need to store and in what quantity?

Interior volume of the desiccator and shelving should be considered. As a visual reference of the interior space we have estimated how many standard 12 oz cans of soda would fit into each unit. Estimates are a guideline based on interior volume and do not take shelving or desiccator shape into consideration.

How important are ease and economy of use?

Each method of desiccation has advantages and trade-offs. Each user must determine the method that best serves their purposes. Using standard desiccants and regenerating them as needed is economical, but requires monitoring. There may also be more variability in your environment. An automated desiccator requires much less monitoring but uses electric power. Gas ported desiccators are quick to achieve relative humidity, but if the unit is accessed frequently, proportionately more gas will be needed to keep the desired low humidity level. Vacuum desiccators remove air and moisture and can be brought back to vacuum rather easily after opening, but require a pump.

Once you have determined your most desirable method of desiccation, there are a variety of styles and sizes of desiccators to choose from.

Secador® Desiccator Cabinets

Durable, co-polyester construction blocks 99% of UV light (mini is polystyrene)

Patented door seal provides superior protection from moisture

Built-in, convenient carrying handles

Easy-to-view dial hygrometer in door

Automated models provide continuous desiccant regeneration*

Door can be secured with tamper-evident tags or padlock

Automated models available in 100VAC, 120VAC and 230VAC

Portable & stackable

NOTE: All 1.0, 2.0, 3.0 and 4.0 cabinets are interchangeably stackable, except 4.0 horizontal.

All sizes are available with optional gas ports to allow gas purging of the cabinet.

* All non-electric models can be used with any desiccant including Disposable Desiccant Cartridges F42048-0065, -0100, or Desi Can™ Reusable Desiccant Canister F42046-0000.

Brand Details

Secador® Desiccator Cabinets

A UV Light Blocking, Dry Environment

The attractive design and sturdy construction of the Secador® line of desiccator cabinets assures easy and reliable storage of moisture and light sensitive products. Choose from an extensive selection of sizes, styles and colors of desiccator cabinets to meet your specific needs.

- Standard, Automated (100, 120 and 230 VAC) and Gas-ported models available
- Durastar® co-polyester construction blocks 99% of UV light* and is resistant to staining, crazing and chemical attack
- Amber color models reduce visible light penetration by over 50% making it the perfect choice for storing light sensitive materials like reagents, analytical standards and investigational compounds
- Large doors maximize access to interior space and have a patented seal design, tab latches and security loops for a padlock or tamper-evident seals
- 1.0, 2.0, 3.0 and 4.0 – vertical units have a compact 34.1W x 41.4cmD footprint for space saving stacking up to 3 units high; 4.0 horizontal has a wider footprint and lower height
- Perforated shelves facilitate circulation of dry air
- Easy-to-view dial hygrometer is located in the door front

**Mini cabinets are molded of polystyrene which does not block UV light.*

Standard models, pages 91-93. Automated models, pages 97-99. Gas-ported models, pages 101-103.

"SPACE SAVER" Standard and Vacuum Desiccators

Maximize Your Space in the Laboratory or Classroom

In less than 12" of benchtop space, these strong, shatterproof desiccators will store and protect sensitive products.

- 'Flat Dome,' clear polycarbonate top with knob maximizes interior clearances and provides an average of 13% greater interior volume over standard hemispherical domes
- Vacuum models hold a full vacuum (29.9" Hg 75.9cm) at room temperature for 24 hours and will remain airtight even if not under vacuum; non-vacuum models also available
- White polypropylene bottom models can support incandescent crucibles on Minerit HD High Heat Ceramic Desiccator Plates (page 108.)
- Large ribbed knob for easy lifting; extra heavy walls
- All models include a 0.32 cm (1/8") thick perforated plate

Standard models, page 94. Vacuum models, page 105.

Techni-Dome® 360 Vacuum or Gas-Ported Desiccators

View More, Store More, Dry More

Generous quantities of standards, samples, electronics or other sensitive items can be protected in the Techni-Dome® 360 vacuum desiccator. A traditional style domed desiccator, the Techni-Dome® 360 is made from high-grade polycarbonate and offers a clear, unobstructed view of contents, with exceptionally large storage space, portability and ease of use.

- Users will find that this model has a generous 65 liter (4000 cu. in.) internal volume and can hold items up to 45cm (18") tall or wide, including racks, trays and instruments
- Polycarbonate material is resistant to most common chemicals, as well as thermal stress, and wipes clean easily
- Available with one or two gas ports to offer the flexibility of using multiple gases or faster cycle times between vacuum and release
- Holds a full vacuum (29" Hg, 737mm) at room temperature for 24 hours; a high quality silicone gasket ensures that the desiccator will remain airtight even when not under vacuum
- Two removable polypropylene shelves, 36.5cm and 22.5cm (14.5" and 9") in diameter maximize storage capacity
- Side handles provide easy portability and can be used as a place to affix tamper-evident seals
- Top half of the desiccator nests into the bottom for convenient storage when not in use

Vacuum model page 106. Gas-ported model page 104.

Dry-Keeper™ Desiccator Cabinets

*Clear View, Cabinet Style Desiccators
in Polystyrene or Acrylic*

This line offers automated and standard units with a variety of choices in size, horizontal or vertical profiles and various materials including crystal clear methyl-methacrylate with sleek black metal trim.

- Adjustable shelving with holes for full air circulation
- Shelf rails provide flexibility for optimum placement of shelves
- Doors have a foam rubber gasket and latches to assure a tight seal
- Automatic units have a permanent desiccant that lowers relative humidity to 30-40% and a light indicator to signal absorption and regeneration periods

Standard models pages 95-96. Automated models page 100. Gas-ported model page 104.

Standard Desiccation

Secador® Desiccator Cabinets

A UV Light Blocking, Dry Environment

- Durastar® co-polyester construction blocks 99% of UV light* and is resistant to staining, crazing and chemical attack; amber color units also block over 50% visible light
- Use with any desiccant including cans and disposable cartridges. See pages 107-108 for complete Scienceware® line of desiccants
- Desiccants can be placed under the bottom shelf to preserve storage space
- Different colors are available to suit your needs

For more detailed information on the full Secador® line see page 88.

Secador® Mini Desiccator Cabinet

The Perfect Choice When Benchtop Space Is at a Premium

Automated Standard Desiccators

Secador® Auto-Desiccator Cabinets

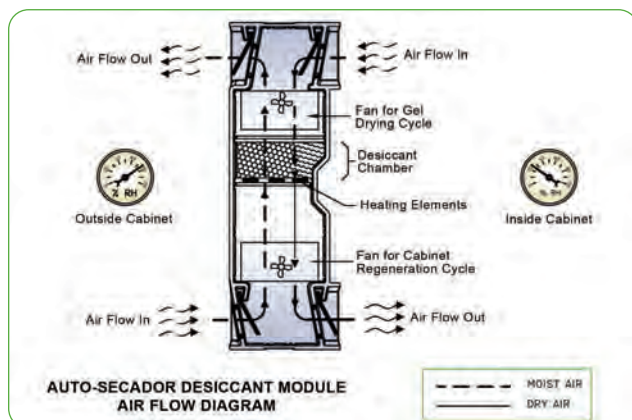

Protecting valuable humidity-sensitive items, such as reagents or electronics, is easy and fully automatic with Secador® Auto-Desiccator Cabinets. The patented electronic dehumidification system will reduce the typical relative humidity of a cabinet, in a 70°F (21°C) air conditioned/heated room with 75% humidity, down to 25% humidity and circulate dry air automatically, freeing users from monitoring or changing desiccants. (See figure below).

- Choice of 100, 120 or 230V (CE approved) models for use worldwide
- DuraStar® co-polyester plastic blocks 99% of UV light and is resistant to staining, crazing and chemical attack; amber color models also reduce visible light penetration by over 50%
- Dry air circulates through perforated, clear polystyrene shelves

For more detailed information on the full Secador® line see page 88.

Patented Electronic Dehumidification System - How it works:

Module features color-changing, dustless, silica gel desiccant beads and two fans. Automatic dehumidification and desiccant regeneration cycle operates continuously every 20 minutes as follows:

1. One fan operates for 14 minutes to draw interior chamber air across silica gel desiccant beads and dehumidify the chamber. One-way flap valves are open to the chamber and closed to the exterior during this phase.
2. Circulation fan is terminated and one (1) minute of resistance heat is applied to silica gel desiccant to initiate regeneration.
3. The regeneration fan is started and draws air in an opposite direction to the first fan. This causes one-way flap valves within the chamber to close and flap valves to the exterior environment to open. Four (4) minutes of resistance heat is applied to silica gel desiccant to release the captured moisture to the chamber exterior.
4. Resistance heat to silica gel is terminated. Circulation fan continues to operate for one (1) minute with exterior air so that silica gel can return to ambient temperature.

Dry Keeper™ Auto-Desiccators

It's Automatic, So You Don't Have To Think About It

120 VAC electronic dehumidification system lowers relative humidity to 30-40%* and keeps dry air circulating throughout the cabinet. Permanent desiccant is contained in the control unit and has a light indicator:

- A green light indicates operation of the 4½ hour absorption period and a red light indicates operation of the ½ hour regeneration of the desiccant
- Perforated shelves facilitate full circulation of air; shelf rails offer flexibility in placement
- Dial hygrometer in door front for easy reference

*DryKeeper™ Plus lowers relative humidity to 20-30%

For additional information on Dry-Keeper™ Desiccators see page 90.

Dry-Keeper™ Vertical Auto-Desiccator Cabinet

- Interior Volume: 2.08 cu. ft.; Holds: 70 cans
- Clear methyl-methacrylate with sleek black accents
- Two adjustable shelves
- Door opens to the right
- Draws 6 watts, 120VAC, 50/60 Hz

CATALOG NO.	DIMENSIONS (L x W x H)

Gas-Ported Desiccators

*Create A Controlled Environment with Dry Nitrogen Desiccation
or Other Gases of Choice*

Secador® Gas-Ported Desiccator Cabinets

Wide range of sizes for those who require gas purged desiccation. Rear gas ports (Mini are located on top) accept 1/4" I.D. tubing.

- Durastar® co-polyester construction blocks 99% of UV light* and is resistant to staining, crazing and chemical attack; amber color units also block over 50% visible light
- Large doors maximize access to interior space and have a patented seal design, tab latches and security loops for a padlock or tamper-evident seals
- Perforated shelves facilitate circulation of dry air
- Valves can be closed to use standard desiccants

*Mini cabinets are molded of polystyrene which does not provide light blocking.

For more detailed information on the full Secador® line see page 88.

**Secador® Mini Gas-Ported Desiccator Cabinet**

*The Perfect Choice When
Benchtop Space Is at a Premium*

- Internal Volume: 0.31 cu. ft.; Holds: 12 cans
- Clear polystyrene for easy viewing of contents
- Door opens to the left
- Overall Dimensions:
33.8W x 25.4D x 35.6cmH (13.3 x 10 x 14");
Height without gas ports: 21.6cm (8.5")

NEW PRODUCT!

Techni-Dome® Gas-Ported Desiccator

U.S. Patents: 7,594,342 and D556,895 S

This large, domed desiccator is made from laboratory grade polycarbonate for a clear, unobstructed view of contents. Users will appreciate the roomy interior, portability and ease of use. Two gas ports accept ¼" I.D. tubing and have easy turning PTFE stopcocks to facilitate the turbulence-free entrance of gases, minimizing disturbance of the contents.

- Interior Volume: 2.29 cu. ft.; Holds: 101 cans
- Two removable polypropylene, 36.5cm and 22.5cm diameter (14.5" and 9") shelves
- Side handles provide easy portability and can be used to affix a lock or tamper-evident seals
- Holds a full vacuum (29" Hg, 737mm) at room temperature for 24 hours; a high quality silicone gasket ensures that the desiccator will remain airtight even when not under vacuum
- Gas ports can be closed to allow use with standard desiccants

CATALOG NO.	DESCRIPTION	DIMENSIONS (W x H)
F42029-0001	Techni-Dome® Gas-Ported Desiccator (2 gas ports)	60 x 60cm (22 x 22")

Dry-Keeper™ Gas-Ported Desiccator Cabinet

- Interior Volume: 0.14 cu. ft.; Holds: 6 cans
- Clear polystyrene
- Pull down door slides out of the way into a compartment located underneath the cabinet
- Includes a small tray for desiccant
- Gas ports accept ¼" I.D. tubing

CATALOG NO.	DIMENSIONS (L x W x H)
H42053-0002	21 x 28 x 17cm (8¼ x 11 x 6¾")

For more detailed information on Dry-Keeper™ Desiccators, see page 90.

Vacuum Desiccators

"SPACE SAVER" Vacuum Desiccators

Small Space, Top Performance

'Space Saver' Desiccators will hold a full vacuum (29.9" Hg 75.9cm) at room temperature for 24 hours and remain airtight even if not under vacuum.

- Polypropylene stopcock with PTFE plug accepts 6.4mm (¼") I.D. tubing and allows a controlled entrance of air preventing unnecessary turbulence
- Flat-top dome maximizes interior space
- A neoprene O-ring assures a tight seal down to 0°C without the need for grease (ring will not be harmed if grease is used.)
- All models include a 0.32 cm (⅛") thick perforated plate.

A. White Polypropylene Bottom - Can support incandescent crucibles on Minerit HD High Heat Desiccator Plates, available separately, page 108.

Per each, 4 per case.

Vacuum Chamber and Plate

For Vacuum Drying, Degassing and Teaching Demonstrations

- Interior Volume: 0.21 cu. ft.
- Can withstand a full vacuum at room temperature
- Clear polycarbonate top
- ABS plastic plate and O-ring seals the top against the chamber's flange
- Stopcock with 2mm PTFE plug uses 1/4" tubing

CATALOG NO.	DIMENSIONS (DIAM. x H)
F42043-0000	22.8 x 16cm (9" x 6 1/4")

Secador® Auto-Desiccator Module Desiccant Replacement Beads

Color-indicating silica gel beads for use in refilling the Secador® auto-desiccator module. Silica gel absorbs moisture from the air and is inert, non-toxic and non-corrosive. Unlike other desiccants, silica gel is non-friable and won't disintegrate into powder even after repeated regeneration. Beads contain a color-changing moisture indicator that turns from blue to light pink, indicating that the silica gel is saturated and can not absorb additional moisture.

Secador® auto-desiccator modules automatically regenerate the silica gel beads for thousands of cycles; however, when beads turn pink/dark brown, and fail to regain their blue color, it is time to replace the beads with a fresh supply.

CATALOG NO.

F42074-0020

DESCRIPTION

26g Bottle to fill Secador® Auto-Desiccator Modules

Desiccant in a Cartridge

Disc Shape Fits Perfectly in "Space-Saver" Desiccators

Convenient, easy-to-handle cartridges with Natrasorb® TI indicating silica gel beads. Beads change color from blue when dry to pink when moist and are contained in a durable, polyester felt bag with a perforated Mylar® cover sealed in place. Saturated gel can be regenerated in a 150°C (300°F) vented oven for 3 hours or more (depending on size) until blue color returns. May be regenerated repeatedly without degradation. Fits "Space Saver" desiccators (see page 94), in addition to other plastic desiccators of similar size. Individually sealed in moisture proof pouches.

Reusable/Disposable Desiccant Cartridges

Use Anywhere Desiccation Is Needed, Including Analytical Balance Cases and Precision Laboratory Instruments

Clear polystyrene dish allows instant visual inspection of silica gel, which changes in color from blue to pale pink as it absorbs moisture. A highly porous membrane covers the dish providing excellent moisture absorption. Desiccant can be easily regenerated by heating cartridges in a 50°C (122°F) oven overnight. For more rapid drying, cut the membrane, transfer the spent gel crystals into a glass or porcelain dish, and place in a 150°C (300°F) oven for one hour. Silica gel is inert, non-corrosive and non-toxic. Fits "Space Saver" desiccators (see page 94), in addition to other plastic desiccators of similar size. **6 per pack**, individually foil sealed.

Desi Can™ Reusable Desiccant Canister

Neat and Tidy Desiccant Storage

Silica gel effectively absorbs moisture through perforations in the aluminum case. One canister of Reusable Desi-Can™ Canister maintains a safe level of humidity in 0.09 cubic meter (3 cubic ft.) of space. Excellent for use in closets, containers, tool boxes, camera cases and other storage areas to prevent rust and moisture. It can be regenerated in a 150° C (300° F) oven in about 3 hours for unlimited life. A monitor window shows blue when recharged and pink when saturated.

Secador® Cabinet Replacement Shelves

Perforated, clear polystyrene shelves to fit non-electric and auto-desiccator models. 4.0 units can be converted from vertical to horizontal configuration or vice versa by turning the unit and ordering the appropriate number of shelves.

CATALOG NO.	DESCRIPTION
F42074-1001	Fits 1.0 (non-carrying case), 2.0, 3.0 and 4.0 (vertical) Models
F42074-0001	Fits 4.0 Horizontal Models

**Brackets for 4.0 Horizontal Secador® Desiccator**

Vertically Stack Horizontal Profile Secador® Desiccators

Bracket set permits vertical stacking of horizontal profile Secador® desiccators up to three units high. Brackets are made from ½" thick, white, high-density polyethylene for strength and durability, and can be installed in less than five minutes. Fit a pair of brackets onto each end cap of the horizontal profile Secador®, place second Secador® on top and then tighten the included bolt. Set includes two bracket pairs to stack two desiccators.

CATALOG NO.	DESCRIPTION
F42074-1500	Horizontal Secador® Stacking Brackets (2)

Vacuum Pressure Indicator

Easy Installation. Know at a Glance Whether Your Desiccator Is Under Vacuum

Fits easily onto the tapered end of the stopcock. The thermo-plastic elastomer collapses when there is a negative vacuum pressure in the desiccator and expands when vacuum is absent.

Lead Weights with Vikem® Vinyl Coating

Protect and Stabilize Expensive Glassware

- Stabilizes vessels in water baths and on benchtops
- Added insurance against tipping and possible chemical spills
- Closed ring fits over flask and seats against the shoulder
- Versatile open "C" Shape ring fits around vacuum filtering flasks, tubing and wide shapes

Round Lead Rings with Vikem® Vinyl Coating

Reduces Breakage, Floating and Spills

Vikem® vinyl coated lead rings stabilize glassware immersed in water baths thereby reducing floating, breakage and chemical spills. The bright red Vikem® vinyl coating is chemical-resistant and will not scratch flasks. Available in five diameter/weight combinations.

CATALOG NO.	APPROX. WEIGHT	O.D.	I.D.	FITS GLASSWARE

Poxygrid® Lead Ring Holder

Convenient Storage for Lead Rings

Wire formed, epoxy coated holder keeps lead rings organized and handy. Occupying very little space, the circular base is only 19cm (7½") in diameter. Rings having an inside diameter of 17.8mm (0.7") or larger stack neatly on a tapered center post which is 17.1cm (6¾") high. Steam autoclavable at 121°C (250°F).

"Wire" Lead Weight with Vikem® Vinyl Coating

Conforms to Any Shape

These lead weights can be coiled into a helix, spiral, cone or any irregular shape to stabilize vessels in a water bath. They can be coiled around flasks, threaded through handles or looped around bottle necks. Available in two diameters, they are coated with chemical resistant red Vikem® vinyl. The 30cm (12") length and flexibility make them very versatile. **Per each, 5 per case.**

Lead Sheets with Vikem® Vinyl Coating

Bend and Shape to Hold Down Any Size Container

Soft lead sheet coated with flexible Vikem® vinyl has many uses for stabilizing laboratory equipment in water baths or any application where extra weight is needed. Sheets may be bent into cylinders, "S" curves, "U" curves or twists. The Vikem® vinyl coating prevents the lead from leaving marks on other equipment. Coated lead sheets are 2.2mm (0.085") thick. **Per each, case listed below.**

Weighted Beaker/Flask Holders with Vikem® Vinyl Coating

Eliminate Drifting and Tipping in Cool or Hot Water Baths

Weighted holder grips beakers or flasks firmly with four flared stainless steel prongs. The Vikem® vinyl-coated lead ring secured beneath the holder keeps container immersed in water, provides a low center of gravity and allows water to circulate underneath the beaker. Can be used in boiling liquid up to 135°C(275°F) for 1 hour.

Foil Cover-ALLS™

Stop Wasting Time and Money on Rolls of Aluminum Foil!

Economical and disposable covers provide dust-free storage of clean labware. Available in four sizes, they are pre-formed to quickly cover a wide variety of labware using only one hand! Great for use in centralized washing areas where cleaned labware needs to be transported back to the lab while remaining clean and contaminant-free. Cover-ALLS™ are autoclavable at 121°C (250°F) and are perfect for providing a temporary, sterile boundary for autoclave sterilization of labware. **Per box, 10 boxes per case.**

Super Polyfoil™ Wrap

Autoclaving Wrap, Cover Sheet and Chemical Barrier

Polyester backed foil provides a chemically inert barrier to cover vessels for autoclaving, incubating or storage. A thermoplastic layer is laminated to 1mil foil which folds easily, flattens without kinking, and is resistant to punctures, tears and corrosion. The polyester film blocks any possible pinholes, resists organic solvents and caustic agents and complies with FDA regulations governing direct food contact applications. **100 sheets per box.**

FLOWMETERS

SHOP www.belart.com

Riteflow™ Flowmeters

Compatible with a Wide Range of Gases or Liquids for Laboratory or Plant Applications

Used for flow measurements in the lab, process flows in pilot plants, metering carrier gases in chromatography, indicating and controlling gases in manufacturing processes and for indicating flow rates in pumping or flow systems. Formed from heavy-walled, shock-resistant borosilicate glass, these flowmeters can be used at operating pressures up to 200 p.s.i.g. and maximum temperatures of 121°C (250°F). They feature fused ceramic scales that are accurate to within $\pm 2\%$ of full scale. Repeatability is 0.25%. Uniformly tapered bores have internal rib guides to stabilize the glass, stainless steel or carbonyl floats. Flow measurement is taken by reading the center of the float on the universal scale. The number on the scale corresponds to a flow rate for the given fluid or gas on a calibration chart that is supplied. Flowmeters are available in four styles. 65mm scale, sizes 1-6 and 150mm scale sizes 1-5.

I. Unmounted Flowmeters

II. Guarded Flowmeters

III. PTFE Mounted Flowmeters

IV. Aluminum Mounted Flowmeters

Universal Millimeter Scales - 65mm and 150mm

Millimeter scales indicate the height to which the float rises within the flowmeter and are correlated with specific flow rates through the use of appropriate calibration data sheets or curves. Scales of this type permit utilization of a given flowmeter for a great number of different fluids at diverse pressure and temperature conditions.

See Tables of Standard Flow Capacities, On Page 124

I. Riteflow™ Flowmeters with Plain Ends (Unmounted)

Flexible tubing is connected directly to the top and bottom of the flowmeter and can be held in place with a clamp. Maximum pressure is 200 p.s.i.g., maximum operating temperature is 121°C (250°F).

Riteflow™ Mounted Flowmeters

Aluminum Housing with Built-In Valves for Ease of Use

Flowmeters are housed in a black anodized aluminum frame that features an exclusive tube-lock to prevent turning during locking. Once in place, the meter will not shift under pressure or vacuum. A special magnifying window runs the entire length of the scale for easy reading of flow measurements. Tubing connectors are rear mounted for attachment to an instrument when used as a bench stand. A Leveling Base (optional) assures that the meter is vertical, eliminating error caused by friction between the float and tube.

III. Riteflow™ PTFE Mounted Flowmeters

Mounted Flowmeters with PTFE Fittings have high chemical resistance and purity and have 9.5mm ($\frac{3}{8}$ ") straight glass connectors with PTFE and Kel-F® valves. Specifications: Maximum operating pressure 100 p.s.i.g. and maximum operating temperature 65.5°C (150°F). *Note: Riteflow™ PTFE mounted flowmeter is shown on leveling base sold separately, page 123.*

65mm scale: Dimensions are 15.9 x 3.2cm wide ($6\frac{1}{4}$ x $1\frac{1}{4}$ "). 1.3cm ($\frac{1}{2}$ ") mounting holes are located 14cm ($5\frac{1}{2}$ ") center to center.

Flow Indicator

Provides Immediate Visual Indication of Water/Liquid Flow

- Highly visible, nylon indicator ball is housed in clear polycarbonate and rotates in circular channel during flow
- Continuity and relative flow rate indicated by speed of ball's rotation
- An arrow shows direction of flow

A minimum water flow rate of 100/ml per minute in a horizontal position and 140ml per minute in a vertical position is required to mobilize the ball. Upper flow limit is in excess of 1 liter/minute. Maximum working pressure is 10 p.s.i.g. (69 kN/m²). The polycarbonate indicator measures 30 x 57mm (1½ x 2¼") with two 23mm (.9") long tube extensions to accept 6.4mm (¼") to 9.5mm (⅜") I.D. tubing. Overall size is 76 x 57mm (3 x 2¼") **Per each, 12 per case.**

FLOWMETERS

SHOP www.belart.com

Tables of Standard Flow Capacities

Flow capacities shown in the following tables are based on calibrations for air and water at standard conditions (21.1°C (70°F) and 14.7 psia/l atm). Correlation data for other fluids is available as well as special sizes and floats. For further information contact Bel-Art Technical Support.

Useful metering ratios are 10:1 or better. 150mm flowmeters may be used with dual float combinations to increase metering ratio to 20:1. 65mm flowmeters are supplied with two different floats (which must be used separately) resulting in a 20:1 metering ratio.

Clear View Fume Hoods

Safely Vent Noxious or Potentially Hazardous Fumes and Dust

- 3 position sash; 360° visibility
- Clear polycarbonate provides optimum visibility and durability
- Available in two sizes
- Perfect for laboratories and educational settings

Safely vent noxious or potentially hazardous fumes and dust using Scienceware® Clear View Fume Hoods. Constructed of clear polycarbonate, they have a sleek modern style that is functional and aesthetically pleasing while offering an unobstructed view into the hood from all sides. Two standard sizes are offered, each with a sliding sash that can be completely lowered or set at a choice of two intermediary heights. Top sitting 6" O.D. vent opening(s) allow easy connection to exhaust systems. Perfect for laboratory, classroom or industrial applications.

1 x 1 Model: Compact design won't consume valuable space. Visibility into the fume hood is possible from all sides which makes this model great for educational settings. A single exhaust vent opening (6" O.D.) is centered on the top of the unit for easy connection to exhaust systems.

2 x 1 Model: Same great all-clear visibility of the 1 x 1 Model, but with twice the work space. Two exhaust vent openings (6" O.D.) are located on the top of the model and ready for easy connection to exhaust systems.

Small Molded Benchtop Fume Hood

Saves Space and Money

Designed for small facilities or installations in which a number of fume hoods are needed, this unit is excellent for use in schools, junior colleges and universities. Features include a one-piece shell molded of chemical resistant polyethylene with rounded inside corners for easy cleaning. The clear acrylic sash slides on a track featuring stop pins for open, closed or intermediate positions, and a bottom gap allows for continuous air flow. The front opening is 56W x 30cmH (22 x 12"). The stepped exhaust duct can be used with either a 12 or 15cm (4 or 6") diameter duct. An exhaust system capable of drawing 200 cfm (free air) is recommended. Overall dimensions are 69 x 33 x 56cmH (27 x 13 x 22"). Shipping weight 17 kg. (38 lbs).

Large Molded Fume Hood

Rounded Inside Corners for Easy Cleaning

This fume hood features a one-piece shell molded of polyethylene with a clear acrylic sash that slides on inside tracks. It can be set in an open, closed or intermediate position. The front opening is 88 x 36cmH (34½ x 14¾"). When in the closed position, the sash remains open slightly to facilitate continuous air flow. Stack O.D. is 15cm (6"). An exhaust system capable of drawing 350 cfm (free air) is recommended. Overall dimensions are 107 x 51 x 76cmH (42 x 20 x 30"). Shipping weight 25.5 kg (56 lbs.).

Large Molded Fume Hood with Baffle

Low Turbulence Airflow

This fume hood is the same as H50000-0003, shown above, but includes a flat internal baffle across the rear of the shell. The baffle slopes forward, leaving space beneath for air flow to sweep the deck, and space above in order to efficiently remove airborne vapors. Overall dimensions are 107 x 51 x 76cmH (42 x 20 x 30"). Shipping weight 25.5 kg (56lbs.).

Draft Checker™ Airflow Detection Powder

"See" the Air Flow

A quick, easy way to test the safety of fume hood exhaust before use. Just a squeeze or two from the plastic bottle dispenses a cloud of ultra-fine, lightweight silica powder, which remains suspended long enough to visually check whether or not the fume hood exhaust is functioning properly. It is also useful for detecting drafts, gas leaks and air currents in rooms, ducts and exhaust systems. The amorphous silica powder is inert, non-toxic and non-flammable. 1.5 gm bottle.

Techni-Dome® 360 Fume Hood

Compact Hood for Tight Spaces

This compact fume hood fits in easily on crowded benchtops. Clear, polycarbonate body has a smooth interior for easy cleaning, allows unrestricted viewing from all angles, is resistant to a wide range of chemicals, and provides high impact strength and scratch-resistance. Stepped outlet connects to standard exhaust systems with 4 or 6" vent piping. The Techni-Dome® Fume Hood has a 50cm (20") ID and 45cm (18") height, making it ideal for simple micropipetting processes, blending of chemicals, handling of small biohazard items or interactive museum/educational displays. Overall volume, 65

liters (4000 cu. in.), overall dimensions 60W x 60cm H (22"W x 22"H).

CATALOG NO.	DESCRIPTION
F50000-0100	Techni-Dome® 360 Fume Hood

Fabricated Fume Hood

Cost Effective Alternative to Metal Hoods - Great for Use When Sparking Is a Concern

The translucent polypropylene hood is non-conductive, chemical-resistant and corrosion-proof. Sash is made of clear acrylic that provides unimpeded visibility and light to the work area. It may be set open at three positions from 25cm (10") to 53cm (21"). Durable construction includes 6.4mm (¼") thick polypropylene with heavier sections where needed. Outside dimensions are 122cm (48") wide, 61cm (24") deep, and 91cm (36") high. A full length, 3.2mm (⅛")

thick interior baffle directs airflow across the table surface as well as vertically. The stack has a 15.2cm (6") outside diameter, with a damper. An exhaust system capable of drawing 500 cfm (free air) is recommended. Shipped in a crate. Weight 45.4 kg. (100 lbs).

Table-Top Buchner Funnels

Filter Large Volumes Quickly

Polyethylene funnels with your choice of Fritware® or Perforated filter plate. Removable hose barbed connector accepts 12.7mm ($\frac{1}{2}$ ") I.D. tube and threads into $\frac{3}{4}$ " NPT bung on the funnel.

A. Fritware® Porous Filter Plates

FIXED or REMOVABLE porous filter plate supported by a multiple ring grid. Filter plates are made of high density polyethylene, 6.4mm ($\frac{1}{4}$ ") thick, with a non-porous ring at the periphery of the plate which seals filter paper when used. **Available in two porosities (medium and coarse).** Medium porosity plate is 45-90 microns; coarse porosity plate is 90-130 microns. Use below 52°C (125°F).

B. Perforated Filter Plates

Available with a FIXED or REMOVABLE perforated filter plate made of 4.8mm ($\frac{3}{16}$ ") thick high density polyethylene (HDPE) with 4.8mm ($\frac{3}{16}$ ") perforations on 11mm ($\frac{7}{16}$ ") centers. The FIXED version is for coarse filtration or use with a cloth or paper filter. A REMOVABLE filter plate is available for use in precious metals recovery. Use below 52°C (125°F).

Imhoff Cone and Separatory Funnel Rack

Chemical Resistant and Fully Adjustable

This high-density polyethylene rack holds four separatory funnels up to 98mm (3 $\frac{1}{8}$ ") in diameter on its center shelf. Four beakers fit on the bottom shelf and four long-stem funnels on the top shelf. Set screws in the base risers allow vertical adjustment of telescoping rods, while set screws in the center shelf permit adjustment for accommodating separatory funnels of various lengths. Included are 24 insert clips that allow rack to accommodate different sized Separatory Funnels and Imhoff Cones. Fully extended, the rack measures 20.3 x 48.9 x 50.8cm (8 x 19 $\frac{1}{4}$ x 20") high. Four feet extend from the base for stability and have holes for permanent mounting.

Imhoff Settling Cones and Racks

Made for measuring sand and other settled matter in water and sewage, these Imhoff cones are molded of glass-clear, unbreakable styrene acrylonitrile. They have continuous graduations up to 1000ml and are ideal for tests where a high volume of settled matter is present. Graduated in these divisions: 0-2ml in 0.1ml, 2-10ml in 0.5ml, 10-40ml in 1ml, 40-100ml in 2ml, and 100-1000ml in 50ml. Leakproof polyethylene plug permits easy withdrawal of sediment for gravimetric analysis and simplifies cleaning. Top diam. 12cm (4.7") x 50cm (19.7") high. See page 286 for rack descriptions and dimensions.

Fillpour™ Dialysis Tube Funnels

Easy Handling of Dialysis Tubes

Reduces difficulties in handling dialysis bags. Dialysis tubing is cut to length and knotted at the end. The other end is slipped onto the tube and held with Silicone Rubber Loops (F20308-0000 - page 13), or a rubber band. Three tube steps fit various sizes of dialysis tubing, and a three notched universal hanger supports the funnel on the edge of any vessel. Also features a captive cap with writing area. Steam autoclavable at 121°C (250°F). **10 per bag.**

CATALOG NO.	DESCRIPTION
F14848-0000	Small size with 5, 9 and 13.5mm diameter steps
F14848-0001	Large size with 13.5, 19 and 28mm diameter steps

Fritware® Immersion Filters

Filtration without Material Transfer

For filtration involving recovery of solids without having to transfer material to funnels. High density polyethylene coarse porosity disc (90-130 micron) and body. Use directly or precoat for fine filtration. Larger filter has a serrated tubing connector.

Vibrasorb® Vibration Damping Mounts

Isolate Delicate Benchtop Instruments from Vibrations

Sensitive instruments used in research, manufacturing, inspection, and quality control can be adversely affected by vibrations caused from nearby equipment such as pumps, stirrers, blenders, as well as vibration from the general environment. Vibrasorb® Vibration Damping Mounts facilitate optimal use and help protect electromechanical and optical equipment from excessive wear and even structural damage that can be caused by exposure to vibration.

Vibrasorb® Economy Vibration Damping Mount

Non-Slip Neoprene Surface

The Vibrasorb® Economy Vibration Damping Mount has a durable, high impact polystyrene shell with a smooth, non-slip neoprene working surface. Vibro-Absorber™ damping mounts at each corner support the 20.8kg (46lb) platform. The platform area is 34 x 27.5 cm (13½ x 11") and easily wipes clean. Maximum carrying weight for effective vibration dampening is 11kg (24lb).

CATALOG NO.	DIMENSIONS (L x W x H)	SHIPPING WEIGHT
F18385-0000	39 x 34 x 11.8cm (15.4 x 13.5 x 4.6")	24Kg (53lb)

Vibrasorb® Premium Vibration Damping Mounts

Chemical and Scratch Resistant Polished Surface

Molded of dense black & white terrazzo, these 6.4cm (2½") thick platforms are supported on four Vibro-Absorber™ cushions with neoprene feet and support up to 16kg (35 lb).

The larger size will absorb vibrations down to 13 Hz with a 16kg (35lb) load, while the smaller size will absorb vibrations down to 16 Hz. with a 16kg (35lb) load. With lighter loads, the minimum frequency of damping for both sizes will increase to a value between 16 Hz. and 25 Hz. Both sizes feature a polished surface that resists scratches and chemical attack.

CATALOG NO.	DIMENSIONS (L x W x H)	SHIPPING WEIGHT
H18386-0001	35 x 35 x 7.6cm (13¾ x 13¾ x 3")	19kg (42lb)

Vibrasorb® Round Vibration Damping Mount

Durable Work Platform Keeps Equipment Steady

Vibrations caused by nearby pumps, blenders, stirrers and other equipment are absorbed down to 13 Hz. The mount is made from grey Silestone® with a polished surface that resists scratches and chemicals. It is 40.6cm (16") in diameter x 6.3cm (2½") thick and is supported by three vibration absorbers with neoprene feet. Maximum carrying weight for effective vibration dampening is 13.6kg (30lb).

A. Poly-Jaque™ Plastic Lab Jack

Corrosion-Resistant Jack Holds 10 Times Its Own Weight

U.S. Patents 7,111,825 B2; D541,504

The smooth, easy-to-clean top plate has a 21 cm (8.25") diameter and a molded-in position to install a vertical support rod (see F18391-0002 below). Supports gradient makers, hot plates, flasks, beakers, baths and other lab items up to 6.8 Kg. (15 lb.). Molded of strong polycarbonate and assembled with no metal parts, the jack is electrically non-conductive and can be immersed in a bath or used in corrosive environments. A large height adjusting knob allows accurate positioning from 7.6cm (3") to 30cm (12"). Both top and bottom plates may be drilled for permanent attachment to bench or lab equipment with screws or bolts. Steam autoclavable at 121°C (250°F). *NOTE: Not intended to be used to lift weight from its bottom position. Place the weight on the top plate only after raising to the desired height.*

CATALOG NO.

Spindrive® Orbital Shaker Platform

Shake and Mix; Rotating Orbit Diameter of 21.7mm

U.S. Patent 5,409,312

Turns a standard magnetic stirrer into an orbital shaking platform saving the expense and space requirements of additional lab equipment. Perfect for dishes, flasks, and trays, it is also ideal for Western Blot processing. Shaker adjustment is controlled by setting the magnetic stirrer to the desired speed. Platform protects the operating mechanism from spills and has a non-skid surface to prevent containers from sliding. The base incorporates built-in hand holds for lifting and carrying. Supports up to 6.8 kg (15 lb) and has a rotating orbit diameter of 21.7mm ($\frac{7}{8}$ ").

**Techni-Dome® 360
Balance Enclosure***Isolated Work Space for Delicate Work*

The Techni-Dome® Balance Enclosure offers generous space for safely positioning an analytical balance, in a virtually draft-free, compact environment. Made of clear, high strength polycarbonate, the smooth interior is easy-to-clean, chemical resistant and provides an unobstructed view of the contents from any angle without the need for interior lighting. The included Vibrasorb® Vibration Damping Mount absorbs vibrations to isolate sensitive analytical balances from nearby disturbances. Simply lift the top, place your balance on the Damping Mount and then close the cover to begin use. Two access ports allow maximum dexterity for sample handling and balance operation. The Damping Mount can be easily removed for cleaning or use outside the unit.

Microwave Stirrer

Heat and Magnetically Stir Inside a Microwave Oven

U.S. Patent 6,076,957

Converts the motion from the turntable impeller inside a microwave oven into a magnetic stirrer allowing simultaneous heating and stirring for increased efficiency. Heated stirring can improve dissolving and mixing, and permits preparation of super-saturated solutions. Ideal for melting agar and agarose, concentrating urea solutions, or other applications that benefit from heated stirring, and for chemical purification. Adjustable pins make stirrer compatible with most microwave drive spindles. Can be used with magnetic stirring bars up to 5cm (2") in length.

Calipers

Precision Instruments for All Caliper Applications. Metric and English Scales.

Molded in rigid plastic which won't scratch like metal, these calipers are non-conducting, corrosion resistant, and lightweight in the hand for easy handling.

A. Vernier Calipers

Vernier calipers can be used to measure internal and external dimensions with utmost precision. Precise measurements can be made with the fine adjustment thumb roller, and reading scales create no parallax. Parallel jaws are 40mm (1½") deep. Inside jaws and round plastic rod depth gauge provide added value. Upper scale is 150 mm with 0.1mm subdivisions, lower scale is 6 inches with 0.005" subdivisions.

B. Dial Calipers

Dial type calipers measure up to 150mm in 0.1mm increments. A 33mm (1.3") diameter dial is rotatable beneath the pointer allowing for 'differential' measurements. Black numbers on a white background afford effortless readability.

C. Digi-Max™ Slide Caliper with LCD Readout

Take measurements with speed and ease using the Digi-Max™ digital slide caliper. The LCD display immediately indicates the exact measurement taken with push button selection between metric and English scales and a self-zeroing feature for accuracy of $\pm 0.1\text{mm}$ (0.004"). Metric scale to 150mm and English scale to 6". A long life battery is included and is easily accessible for replacement. On/Off button preserves battery life. Supplied in a protective plastic case.

CATALOG NO.	DESCRIPTION	SCALE	OVERALL LENGTH
A. H13415-0000	Vernier Calipers	Metric/English	22.2cm (8¾")
B. H13416-0001	Dial Calipers	Metric Only	22.2cm (8¾")

Frigimat® Dry Ice Makers

Frigimat® Dry Ice Maker

Produce the Dry Ice You Need Right in the Lab

Eliminates the need to buy large quantities of dry ice when only a little is needed. It employs the Joule-Thomson effect to produce a solid 454gm (16 oz) block of dry ice in one to two minutes, and the block can be removed in just 30 seconds. A brass relief valve safely vents excess gas. Each 50lb. cylinder of liquid CO₂ with a dip tube will make 8 or 9 blocks of dry ice, each measuring 8.5cm (3 $\frac{3}{8}$ ") x 11cm (4 $\frac{3}{8}$ ") long. Made of epoxy-coated steel with an aluminum ice chamber and brass valves with four non-skid rubber feet. Includes

a 1.8m (6 feet) nickel plated copper connecting tube with standard CGA 320 (0.830"-14) thread couplings for easy attachment to an LCO₂ cylinder. Dimensions: 30 x 17 x 13cm (12 x 6 $\frac{1}{2}$ x 5") high. Shipping weight: 5.5kg (12 lbs).

Frigimat® Cub - Dry Ice Maker

Economical Block Dry Ice Maker for On-Demand Use

U.S. Patent 7,386,995 B2

This compact device saves the time and expense of receiving a dry ice delivery. Set-up and use is safe and simple. Can be attached to a liquid CO₂ cylinder equipped with a dip tube to produce a ready-to-use 250 to 350 gram block of dry ice in only a few minutes. Each 50lb. cylinder makes from 10-16 blocks of dry ice. Dry ice production can be viewed through the transparent polycarbonate body that secures without clamps, screws or tools ensuring easy removal of the solid block of dry ice and disconnection from the CO₂ cylinder. The lightweight body is never as cold as the dry ice, even when filled, allowing safe transport of the unit and contents when wearing appropriate gloves. A rugged nickel-plated "pigtail" connects it to the CO₂ cylinder valve which is used to regulate gas flow. Operates at very low pressure (displayed on the built-in dial gauge) and incorporates multiple pressure relief safeguards. Includes a 1.8m (6ft) nickel-plated copper connecting tube with standard CGA 320 thread coupling for easy attachment to a LCO₂ cylinder.

Frigimat® Junior Dry Ice Maker

Produces Dry Ice in Flake or Snow Form

Dry ice flakes are useful for packing around irregularly shaped items and are easily produced as needed with the Frigimat® Junior Dry Ice Maker. A brass nozzle screws onto any liquid LCO₂ cylinder equipped with a dip tube. When the cylinder valve is opened about ¼ turn, LCO₂ expands into the bag to create dry ice snow. The valve is then closed and the bag is ready to be removed and emptied. Makes .77kg (1.7 lb) of flakes per bag. The unit cone is 13cm (5") long x 5.1cm (2") diameter at end. The bag is 15W x 30cm L (6W x 12"L). Shipping weight 0.54kg (1.2 lbs). **12 per case.**

Disposal Cartons for Glass

Safe Disposal for Lab Glassware

Sturdy corrugated cardboard receptacle is supplied with a 2 mil thick polyethylene bag to contain broken glass fragments and spilled liquids. When the box is full, lift the flap opening to a closed position, and the entire unit is ready for disposal. Printed with eye-catching graphics in four languages (English, German, French, Spanish), it is packaged flat to save space and shipping costs and is quickly assembled. Available in two sizes. The floor model holds 18kg (40lb) of waste. The benchtop model holds 5.5kg (12lb). See F13204-0001 (below) for sanitary, reusable cover for floor model. Does not qualify as a DOT container. **6 per pack, 10 packs per case.**

NEW PRODUCT!

Cover for Glass Disposal Carton

Opens with a Simple Touch; Sanitary, Reusable

Dishwasher-safe and autoclave-safe, the reusable Disposal Carton Cover opens quickly and easily by pressing the built-in release tab - no batteries required! The cover fits any disposal carton with a 30.4 x 30.4cm (12 x 12") opening including

F24653-0001 Glass Disposal Floor Standing Carton (information above) and features a smooth 10.1 x 10.1cm (4 x 4") area for applying labels. The center panel is green to match the printing on the glass disposal cartons providing fast visual recognition of the waste stream. Compared to the disposable cardboard lids supplied with the cartons, the Disposal Carton Cover provides a wider opening 20.3 x 24.1cm (8" x 9½") permitting safer and more sanitary deposit of wastes into the container. Store the disposable cardboard lid under the bottom of the carton and, when carton is full, simply remove the reusable Disposal Carton Cover, replace with the cardboard lid, and dispose of the carton in the usual fashion. Wash the Disposal Carton Cover as needed, and it's ready for reuse. Autoclavable at 121°C (250°F). **Per each, 8 per case.**

Aquet® Detergent for Glassware and Plastics

*Phosphate-Free Liquid Detergent
with Neutral pH*

Safe for glassware, plastics and surfaces, this phosphate-free, biodegradable, non-ionic surfactant will not etch or mar precision glassware. It rinses quickly and dries without wiping. Convenient, pre-portioned pouches are available to make one gallon of 1% solution. For frequent users, Aquet® is offered in a 3.8 liter (1gallon) bottle with a 473ml (16oz) working solution dispenser bottle. It is also available in 18.9 liter (5 gallon) and 208 liter (55 gallon) sizes. Not for use in automatic dishwashers.

Chromerge® Glass Cleaner

The Ultimate Glassware Cleaner

Leaves surfaces chemically clean, and aids in creating a perfect meniscus. Each bottle contains 25ml of chromium trioxide in solution which, when mixed with a 4.1kg (9lb) 2.2 liter container of sulfuric acid, makes a highly efficient cleaner. The mixture can be stored and re-used until it becomes green, indicating loss of effectiveness. Not for use with plastics. **6 per box, 4 boxes per case.** No Air Shipment.

C. Pipette Rinsers*Effective, Reliable Design Ensures Safe, Efficient Operation*

Provides a simple, automatic method for rinsing large numbers of pipettes at one time. High level water entry provides an air gap between the maximum water level and the end of the water inlet tube ensuring safe and efficient operation. The "tube within a tube" siphoning system assures rapid, complete and automatic siphoning and refilling over a wide range of inlet water pressures and flow rates. Minimizes the danger of siphon stalling at certain water inflow rates and prevents any possible backflow into the potable water supply in the event of a pressure interruption. Includes a 30.5cm (12") long piece of 2.5cm (1") I.D. drain tube and 1.5M (5ft) of 12.5mm (½") I.D. flexible water inlet tube.

Increase Drying Space Three Ways

1. Go up in height – 1, 2 and 3 tier models available in all styles
2. Double-sided benchtop models double your capacity with minimal increase in footprint
3. Use multiple Lab Aire® II Dryers

Increase Flexibility

Each Lab Aire® II Dryer comes with an assortment of pegs in various lengths. Electric models also have baskets for holding small labware. Additional pegs and baskets* to customize your dryer can be purchased separately.

* Baskets fit electric models only.

Lab-Aire® II Dryers Quick Comparison Chart

Select from 12 different models with up to 114 peg positions.

- Rugged ABS plastic will never corrode and easily wipes clean
- Drip/storage trays with scalloped wells hold long thin labware
- Small (3"), Medium (4"), and Large (5") pegs can be moved and repositioned to hold a variety of labware including beakers, flasks, bottles, test tubes and cylinders
- Extra pegs and drying baskets available, page 170

NEW PRODUCT!

Lab-Aire® II Electric Benchtop Dryers

Electric benchtop models offer a compact footprint and accelerate drying with warm, circulating air.

- 400 watts of drying power gently circulates heated air into and around items to decrease drying time.
- Heat selector knob allows choice of three temperature settings: high, medium and low.
- Power button illuminates when in use, and an 8-amp @ 120V (4-amp @ 230V) circuit breaker and independent thermo-fuse protects unit from overheating.
- Select from single and double-sided models with up to 76 peg locations.
- Removable polypropylene baskets serve as storage for small labware and extra pegs.

Lab-Aire® II Electric Benchtop Dryers

Electric drying efficiency is enhanced with a replaceable foam filter that keeps warmed air dust free and plugs that can be inserted into unused peg holes to increase airflow to pegs in use. Like the Non-electric Benchtop models these freestanding dryers have sturdy bases with excellent balance and can be placed on any flat surface. Conserve benchtop space by placing single-sided models up against the wall. Double-sided models double your capacity with only a slightly larger footprint and can be turned perpendicular to the benchtop for easy access to both sides.

Lab-Aire® II Glove Holder

Say Goodbye to Wet Gloves Forever

Realize faster drying time by placing wet laboratory gloves on the convenient Lab-Aire® II Glove Holder. This holder attaches easily to all Lab-Aire® II Dryers and keeps gloves open for external as well as internal drying. The holder helps to extend the life of gloves by maintaining their shape, preventing bending, cracking and moisture buildup. Each holder can hold one pair of gloves and is epoxy-coated for chemical and corrosion resistance. Significantly reduce drying time by attaching the glove holder to Electric Lab-Aire® II Drying Racks. The electric drying racks circulate heated air in and around the gloves. Glove holder is steam autoclavable at 121°C (250°F).

CATALOG NO.	DESCRIPTION
F18931-0000	Wire Glove Holder - Holds two gloves

Poxygrid® Labware Drain Stand

Three rows of epoxy-coated hairpin-loop supports (14 in all) hold labware with 18mm I.D. necks or larger. Top row has 12 straight pins 10.2cm (4") long to accommodate smaller items. A polystyrene tray catches water as labware drains. Rubber tipped feet provide non-skid use on a tabletop, or the stand may be wall-mounted using wire loops on the back.

Fluo-Kem® Lab-Thread Tape

Lubricates and Seals without Grease or Adhesives

Pure, non-sintered Teflon® PTFE Lab-Thread Tape contains no adhesive, yet does a superior job of sealing small apertures. Conforming to irregularities of surfaces, threads and joints of all types, it eliminates the need for lubricants and vacuum greases. Provides a vacuum tight seal and eliminates "freezing" even after long periods. Can be used on ground glass joints, desiccators, bell jars, freeze-drying equipment, etc. 0.0635mm (0.0025") thick, 12.7mm (½") wide x 7.6 meters long (300") per roll. Withstands temperatures from -250°F to 500°F. **3 rolls per bag, 6 bags per case.**

Fluo-Kem® Sleeves with Grip Ring and Outer Ribs

Reusable Teflon® Sleeves

Keep standard taper glass joints from seizing, leaking or galling. No lubricant is required to make a vacuum-tight joint. The top of each sleeve has a rigid, knurled grip ring 3mm (0.1") thick for easy assembly or removal of the sleeve from a standard taper joint. Outer rings on the taper prevent sticking. Resistant to most chemicals and reusable, the sleeves are made of .2mm (.008") virgin Teflon® PTFE. Thickness at rings is .35mm (.014"). Can be subjected to temperatures from -100°C to +250°C (-148°F to +482°F). **3 per pack.**

Battery Powered Engraving Tool*Permanently Engraves in Seconds*

Engrave test tubes, bottles, racks, keys, equipment, tools, electronics and more. Simply hold the Engraving Tool like a pen, press the power button, apply light pressure, and 'write,' to permanently mark most materials including glass, plastic, wood, metal, bone, and stone. Cordless battery power makes it portable for use virtually anywhere indoors or out in the field. Marks will not fade if exposed to chemicals or sunlight. Operates on two 'AA' batteries; not included. Extra engraving tip included. Convenient polyethylene stand (sold separately) holds the Engraving Tool when not in use and has a safe place to keep extra tip.

Engraving Tool Stand

Poly-Cone™ Universal Adapter

This precision-engineered adapter forms a continuous standard taper inside and out, from top to bottom. It may be cut with a fine-tooth saw or sharp knife into various adapters, such as individual bushings, stirrer bearings, thermometer and gas inlet tube supports, drip-tips, funnels, trap connectors for tubing, etc. It withstands temperatures up to 121°C (250°F).

The Poly-Cone™ adapter allows connection of two equal or unequal T joints, a T joint and a straight tube, or two straight tubes. When new and well-lubricated, it will hold a vacuum. Overall length 27cm (10 5/8").

Per each, 12 per case.

A few of the many uses:

Techni-Dome® 360° Glove Chamber

Easy to Store When Not in Use

The Techni-Dome® Glove Chamber provides a generous workspace with a small footprint to preserve benchtop space and is made of clear polycarbonate for an unobstructed view of the workspace from any angle. Smooth, hemispherical interior is easy-to-clean and the high-impact strength and scratch-resistant surface provides for a long service life. The molded-in handles and its light 5kg (11lb) weight offer portability, making the unit suitable for field use.

The unit's two-piece construction allows for quick processing of samples. To use the Glove Chamber, simply open the top half, place materials on the included platform, and close the unit. When not in use, the top half nests into the bottom for convenient storage.

Gas ports on top and bottom and one included stopcock with plug can be used to purge the glove box with nitrogen or other gases to create a controlled atmosphere. Two 6" circular glove ports accept any standard glove box gloves designed to fit 6" diameter openings. Overall volume, 65 liters (4000 cu. in), overall dimensions 60cm W x 60cm H (22"W x 22"H). Order gloves and clamping rings separately.

Iris Port Entry - 8" O.D.

*Eliminate the Use of Bulky Gloves
When Working with Delicate Instruments*

Allows protected access, without the use of long sleeve gloves, to any glove box with a 20.3cm (8") O.D. port (F50040 series [except F50040-1010], H50026). Fabricated of ten layers of silicone latex rubber, the 30 points of pliant material afford easy access and withdrawal while maintaining an excellent seal around the arm. Best for unconstrained use of delicate instruments inside the Glove Box where operations with gloves can be awkward. **Per pair.**

Bellows Type Gloves

Forms a Leakproof Unit with the Box

Made from natural latex with a removable hand, the sleeves fit 20cm (8") circular ports and 18 x 25cm (7 x 10") oval ports. The length of the extended sleeve and glove is approximately 76cm (30"). When the glove and sleeve are separated, the sleeve remains attached to the box. Glove sizes are interchangeable, and almost any standard laboratory, surgical or disposable glove can be used. Forms a leak-proof unit with O-ring construction integral with the box. The bellows allows cooling air circulation. Use with H50025-0320 Clamping Rings (next page) to hold gloves in place. **Per pair.**

Magic Touch™ Insulated Labware

Keep Your Cool with Efficiency and Style!

Lightest, most durable icewares on the market, Magic Touch™ Ice Buckets and Pans have excellent insulating properties for keeping temperature sensitive samples in an optimal environment. Circular and rectangular floating racks fit neatly inside buckets and pans.

Expanded Polymer Foam Performs!

- Non-sweating, superior insulation properties
- Temperature range: -196° to 93°C (-321° to 200°F)
- Lightest, most durable insulated labware on the market
- Impervious to moisture and odors
- Chemical resistant
- Unbreakable under normal use conditions
- Use with ice, dry ice, dry ice alcohol slurries or liquid nitrogen
- Use multiple colors to track and differentiate samples

Four vibrant mix and match colors!

* As a service to our international dealers 12-pack bulk case numbers have been created for Magic Touch™ ice buckets and lab pans. Bulk case pack items are individually bagged but are not separately boxed in order to save you on freight costs.

Write-On™ Multi-Roll Label Tape Dispensers

Mix Tape Colors and Widths to Suit Your Labeling Needs

U.S. Patent 6,974,060

Write-On™ Label Tape Dispensers provide a smooth writing surface, making labeling easy and fast. When marked tape is advanced and cut off on the serrated edge, a fresh length of label tape is positioned on the writing platform.

Various width and color tape rolls can be mixed together on the spindles, which easily accommodate 5 or more 12 - 19mm ($\frac{1}{2}$ - $\frac{3}{4}$ ") narrow rolls or 4 - 25mm (1") wide rolls. The spindles are easily removed from the unit for loading and unloading, and can be adjusted to hold either 25 or 75mm (1 or 3") core diameter rolls. Dispenser includes three plastic separating discs to assure smooth, snag free dispensing for up to four rolls of tape. Additional separating discs are available separately (see accessories). Molded-in pen holder wells on the dispenser help to keep writing instruments handy. Ideal for use with the full line of F13463 series Write-On™ Tapes, which are available in 6 colors and three widths; 12, 19, and 25mm ($\frac{1}{2}$, $\frac{3}{4}$ and 1").

Two models are available:

- A. Bench-Top / Desk Dispenser** has a plastic coated, weighted steel base with rubber feet to prevent slipping on the benchtop. The serrated cutting edge is steel for long term use. Includes one free roll of $\frac{1}{2}$ ", White, Write-On™ Labeling Tape – a \$9.00 value!
- B. Economy Dispenser** is designed for lighter duty use as the plastic cutting edge is molded into the housing. Includes mounting holes for secure attachment to a benchtop (screws not supplied). Can also be attached to vertical surfaces using Wall Mount adapter-F13473-0001 (opposite page). Includes one free roll of $\frac{1}{2}$ " White, Write-On™ Labeling Tape – a \$9.00 value!

CATALOG NO.	DESCRIPTION	DIMENSIONS (L x W x H)
F13472-0000	A. Benchtop Model	30.2 x 14.3 x 12.1cm (12 x 5 $\frac{5}{8}$ x 4 $\frac{3}{4}$ ")
F13473-0000	B. Economy Model	30.2 x 14.3 x 10.5cm (12 x 5 $\frac{5}{8}$ x 4 $\frac{1}{4}$ ")

Wall Mount Adapter for Economy Write-On™ Label Tape Dispenser

Economy Model Dispenser (F13473-0000) can be wall mounted vertically or horizontally with the platform positioned to the left or right. The U-shaped stainless steel adapter presents the dispenser at a 45° angle off the wall to facilitate writing. Wet Surface Pen (page 193) offers consistent ink flow on vertical surfaces.

CATALOG NO.	DESCRIPTION	DIMENSIONS
F13473-0001	Wall Mount Adapter	11 x 13cm (4½ x 5½")

Separating Discs for Write-On™ Label Tape Dispensers

Separating discs improve the function of the dispensers when loaded with more than four rolls of labeling tape. **3 per bag.**

CATALOG NO.	DESCRIPTION
F13469-0003	Separator Discs

Write-On™ Single Roll Label Tape Dispenser

Make Your Own Stick-On Labels

Convenient dispenser holds and releases tape cut to your specification. Writing platform accommodates both left and right handed users for labeling tape prior to dispensing. The epoxy-coated steel platform has finger holes for releasing the tape and a cut off edge for one hand use. A weighted base with non-skid pads prevents sliding or lifting. The 7.6cm (3") core fits standard tape rolls up to 25mm (1") wide and accepts tape rolls having a maximum diameter of 13.3cm (5½"). The base is 21.3 x 8.7 x 9.5cm H (8½ x 3½ x 3¾") with a 10.2 x 15.2cm (4 x 6") platform. Shipping weight 1.8kg (4lb). Accepts F13463 series tapes in both 40 yard and 60 yard rolls. Tape not included.

CATALOG NO.
H13461-0000

Write-On™ Label Tape

Available in 6 Vivid Colors. Great for Use in Low Temperature Applications

Adheres to any clean surface, including Teflon® fluoropolymer resin coated materials, and peels off without leaving a sticky residue. Pencil, ball-point pen or solvent ink marker remain legible under the most demanding laboratory conditions. Consists of colored paper with rubber resin adhesive that resists moisture and most solvents. The tape will withstand a maximum temperature of 157°C (315°F) for 30 minutes or 80°C (176°F) for 24 hours and can be used down to -80°C (-112°F). Withstands a steam autoclaving cycle at 121°C (250°F) and gamma irradiation between 13.0 and 45.0kGy. Excellent for use with Write-On™ Multi-Roll Label Tape Dispensers. **Per each, 24 rolls per case.**

Write-On™ Label Tape Multi-Pack

3-pack of tape in Green, Yellow and White. Each roll is 1.9cm ($\frac{3}{4}$ ") wide and 13.7m (15 yards) long with a 2.54cm (1") inner core. Use Green for safety labels, Yellow for chemical reactivity labels and White for specific hazards/labels.

CATALOG NO.

F13462-0300

DESCRIPTION

1 Each Green, Yellow, White
 $\frac{3}{4}$ " W x 15 yards, 1" core

Write-On™ Label Tape Rainbow 6-Pack

Six tape colors that correspond with familiar hazard color codes to highlight safety information written on the labels. Use Yellow for chemical reactivity, Green for safety labels, Blue indicates health hazards, Red alerts to flammability; Orange indicates a biohazard and White can describe a specific hazard. Each roll is 1.9cm ($\frac{3}{4}$ ") wide and 36.4cm (40 yards) long with a 7.6cm (3") inner core.

Protective Labeling System

This unique system utilizes a tape dispenser, labels and clear plastic tape to fully cover and protect your labels

A. Tape Dispenser

Durable tape dispenser is molded of strong ABS plastic with a steel serrated cutting blade. The tape roll is held in place by a spring-loaded cover and features an aluminum roller.

CATALOG NO.

F13450-0000

DIMENSIONS (L x W x H)

20.6 x 11.7 x 6.0cm (8 $\frac{1}{8}$ x 4 $\frac{3}{8}$ x 2 $\frac{1}{2}$ ")

B. Weight Attachment Kit

Keeps Tape Dispenser Firmly in Place

Epoxy-coated, weighted steel base reduces slippage on the benchtop when tape is dispensed. Attaches easily to the F13450-0000 (A) tape dispenser with provided screws. Four non-slip rubber feet. Weight: 2.7 kg (6 lbs)

CATALOG NO.

H13451-0000

DIMENSIONS (L x W x H)

12.7 x 21.6 x 1.3cm (5 x 8 $\frac{1}{2}$ x $\frac{1}{2}$ ")

C. Clear Protective Lab Labeling Tapes

Holds Up When Other Tapes Give Out

Freeze it, autoclave it, even spill acids, alkalis and organic solvents on it. This clear, polyester tape's resistance to chemicals and moisture provides great versatility for heavy-duty lab use. Test results prove that it remains securely affixed with no discoloration after being autoclaved for 40 minutes at 125°C (258°F), as well as after one week in liquid nitrogen at -196°C (-321°F). All tape sizes 1mil (0.001") thick with 1mil (0.001") of acrylic adhesive. Rolls are 32.9 meters (36 yards) long. Core diameter: 25mm (1").

Wet Surface Pen

Writes on Wet Surfaces, under Water and at any Angle

Versatile 'space pen' writes clearly on wet, greasy and other hard to mark surfaces. Use it under water, upside down and in the harshest of temperatures. Excellent for marking slots on Southern, Northern and Western blots or for marking alignment dots on blotting filters placed over agar plates containing bacterial colonies or phage plaques. Mark lanes on wet blots prior to cutting the filter into strips to be incubated separately with different antisera or probes. Can also be used to correct or write on wet labels that were kept in a water bath, in liquid nitrogen or in a freezer at -20°C (-4°F). Extremely useful for marking filters during processing underwater-based buffers. Handy and reliable for writing on vertical surfaces including the Economy Write-on™ Label Tape Dispenser Wall Mount Adapter (13473-0001) page 189. Writes on dry paper as a standard ballpoint pen.

Captor™ Pen Holder

Cap and Uncap Pens with One Hand

U.S. Patent 6,871,767

Avoid fumbling and possible contamination of samples by keeping a marking pen handy and easy to uncap with only one hand. Ideal for use near an autoclave, incubator, centrifuge, storeroom, freezer or anywhere on the lab bench. Can be attached to any flat surface, such as lab equipment, a wall, a fume hood or even the benchtop with its adhesive backed, press-fit Dual Lock™ reclosable fastener. Works with Sharpie® markers or other similar pens that have a cap with a pocket clip to attach to the penholder well. **3 per bag.**

96 Deep-Well Plate

Expanded Capability for Multi-Channel Pipetting

Offers the working volume of a culture tube and the convenience of a 96 well plate format. Can be used for a variety of processes and operations such as sequencing, precipitations and dilutions, and is compatible with deep-freezing work or sample storage. Ideal for manual 8 and 12 multi-channel pipetting procedures and compatible with robotic sampling processors and automated liquid handling systems. Some of the compatible robotic workstations include Zymark, Tecan, Hamilton Rasys and Beckman. The plates are molded of autoclavable polypropylene, and each 2ml well has a round bottom for easy sample retrieval. Wells are alphanumerically identified. An optional, specially designed polypropylene cover separates each well with a sealing ring to reduce evaporation and permits safe and stable stacking of plates. Covers are keyed to fit only one way. Individually packaged and available sterile or non-sterile. Steam autoclavable at 121°C (250°F) Dimensions: 12.8 x 8.5 x 4.1cmH (5 x 3 $\frac{3}{8}$ x 1 $\frac{5}{8}$ "). Side loader collars are required for side loading Beckman Biomek Systems. **24 per pack.**

CUBE 2UBE™ Rack and Tubes

Sample Storage and Dilutions Made Easier

Offers the advantages and convenience of pipetting 2.2ml per tube in a 8 x 12 grid, 96-well format. The patented CUBE 2UBE™ Tubes fit most automated liquid handling systems and can be centrifuged up to 14,000 RPM. Made of polypropylene, they can be frozen to -20°C and are compatible with Beckman BioMek 1000, Tecan, Hamilton and other robotic workstations. Each tube has a capacity of 2.2ml or 211ml per rack of 96 tubes.

DESCRIPTION

Mini-Tubes, 400 12-tube strips

Adjustable Microplate Tilting Stand

Minimize Pipetting Errors

Make precise additions of liquid components to microplate wells by adjusting plates to the most convenient angle. Helps reduce errors in non-manifold additions of assay components to a multiwell microplate, including expensive, hazardous or radioactive materials. The angular presentation of the plate and clear acrylic platform beneath allows you to easily judge which wells have received liquid addition by comparing the menisci between neighboring wells. An epoxy coated steel base provides

stability, and the hand adjustable clamping screws maintain the desired angle. Holds all sizes of microplates. Max tilt 45°. Pivots on 2 screws.

Tissue Culture Flask Racks

Prevents Tipping Flasks

These polypropylene racks hold 25cc, 75cc (50 - 75 ml or 250 - 260 ml) or similar sized tissue culture flasks in a vertical position. Rectangular holes in the top and center plates stabilize the flasks preventing tipping. Flasks can be easily organized to improve processing and to avoid errors in collecting used media, media change, washing of cell monolayer, trypsinization and seeding of cells. Grips on each end make rack handling easy and allow for safe transport of flasks to the incubator. Steam autoclavable at 121°C (250°F). **Per each, 4 per case.**

Charcoal Disks

Efficiently Capture Volatile S-35 Radioactive Component during Labeling

Activated charcoal impregnated into each Disposable Charcoal Disk absorbs most of the volatile S-35 radioactive component, before it can escape from the Petri dish during metabolic labeling. The sterilized disk is placed inside the lid of the 100mm Petri dish used for labeling. After use, disks are disposed of in regular beta waste containers. Dynamic Duo! Combine the Charcoal Disks with Charcoal Cartridges, F24989, which are placed on the incubator shelves to trap the volatile S-35 radioactive component that may have escaped from Petri dishes equipped with Charcoal Disks. **50 per pack.**

CATALOG NO.

F13557-0000

Disposable Charcoal Cartridge

Safely Absorb the Volatile S-35 Radioactive Component during Labeling

These disposable, activated charcoal cartridges efficiently absorb the S-35 radioactive component released from S-35 labeled amino acids. Capturing the released volatile radioactivity lessens the chance of breathing the volatile component and reduces contamination of the incubator and the water in the humidity pan. Place cartridges on the incubator shelf and, after use, dispose in regular beta waste containers. Cartridges are sealed with a highly porous durable membrane. For increased safety, combine with Sterile Activated Charcoal Disks F13557 (which fit directly inside the lid of a 100mm Petri dish) to trap the S-35 volatile radioactive component within the Petri dish. **3 per pack.**

NEW PRODUCT!

Vacuum Aspirator Bottles

For effortless, continuous vacuum aspiration of a variety of liquids, including tissue culture media, supernatants, and chemical wastes. The heavy-wall polypropylene collection bottle is chemical and corrosion resistant, while the included trap protects the vacuum source from overflow. Collection bottle and trap are neatly organized and contained in a compact epoxy-coated steel frame that will not crowd the workspace. The screw cap on the collection bottle contains a safety release vent, which prevents vacuum implosion, while UV inhibitors molded into the collection bottle allow it to be safely exposed to UV sterilization cycles. Connect a disposable pipette tip, Pasteur pipette or other suitable tip to the flexible collection tubing ($\frac{1}{4}$ " ID X $\frac{3}{8}$ " OD), then connect the vacuum line to vacuum source and the aspirator is ready for continuous vacuum aspiration from Petri dishes, microtiter plates, flasks, centrifuge tubes, and more.

“Hold the Cold” Cryo-Safe™ Coolers

*“Hold the Cold” without a Mess!
Use in transit and on the bench, cooler walls are filled with a non-toxic gel that does not come in contact with contents of cooler.*

-20°C Cryo-Safe™ Mini Cooler

Lasts 1 Hour - 0.5, 1.5 or 2.0ml Tubes

This small cooler safely holds twelve 0.5, 1.5 or 2.0ml microcentrifuge tubes or cryogenic vials at a temperature below -15°C for approximately 1 hour. The polycarbonate cooler body is filled with a non-toxic gel which cannot contact tubes, ensuring that markings and labels on tubes are safe. A clear polycarbonate lid shows positions of tubes and is keyed to correspond with positions printed on the cooler. Molded side handles allow secure grip for transfer. Coolers are stackable and have rubber feet to prevent sliding on the lab bench. Ideal for protecting valuable samples stored in a freezer with defrost cycle. Use included insert to hold 0.5ml microcentrifuge tubes. Store at -20°C for 24 hours prior to use.

Cryo-Safe™ Mini Quick-Freeze Cooler

Portable, Quick Freezing for 0.5 or 1.5ml Tubes

Can be used for up to 45 minutes to rapidly and repeatedly chill biological samples for use in molecular biology. Applications such as ethanol precipitation of DNA/RNA samples are made easy, eliminating the inconvenience of traditional dry ice and alcohol baths. After storing the polycarbonate cooler overnight at -20°C, inserted samples freeze within a few minutes. Holds twelve 0.5 or 1.5ml microcentrifuge tubes. There is no direct contact between the tubes and the insulating solution, so labels and markings are safe. Coolers are stackable and have rubber feet to prevent sliding on the lab bench. A clear polycarbonate lid shows positions of tubes and is keyed to correspond with positions printed on cooler. Molded side handles allow secure grip for transfer. Use included insert to hold 0.5ml microcentrifuge tubes. Store at -20°C for 24 hours prior to use.

CATALOG NO.	HOLDS TUBES	PLACES	DIMENSIONS (L x W x H)	WEIGHT

Cryo-Safe™ -1°C Freeze Controller

The easy-to-use unit provides "controlled rate" freezing samples at approximately -1°C per minute, which is needed to prevent lethal intracellular freezing and successful cryopreservation. Prior to inserting vials, the unit should be filled with 250ml of 100% isopropyl alcohol. Once the samples have been inserted the unit should be placed in a -80°C mechanical freezer. The body of the container is clear polycarbonate, and the screw closure is high-density polyethylene. Placed inside the container is an 18 well, removable polyethylene vial holder that separates the vials from the isopropyl alcohol. A plastic foam insert surrounds the vial holder. Alcohol filled containers can be stored at room temperature. Universal symbols printed on the container show instructions for use.

Cryo-Safe™ Cold Box

Prevents Expensive Enzymes and Critical Samples from Warming

Molded polystyrene container, with cover, has an internal 12-place support for 1.5 ml microcentrifuge tubes. The space surrounding the tubes is filled with a sealed-in material that maintains the low temperature required for safe storage and transport. When taken out of a -20°C freezer it will maintain a -15°C temperature for 1½ hours, and will remain below 0°C for 4 hours. **Per each, 8 per case.**

Dialysis Cells...

are used in separation of proteins or other large molecules from solutions, pre-electrophoresis procedures, deionization of protein solutions, protein binding studies, drugs, dyes and metals. Used in quantitative removal of electrolytes from biological fluids, adjustment of composition and concentration of electrolytes in protein solutions, and changing ion environments of synthetic or natural polymers.

Equilibrium Type Dialysis Cells

Made from clear acrylic, these dialysis cells have stainless steel screws that tighten down on the dialysis membrane also acting as a gasket. Filler hole screws on each half cavity are Teflon® TFE coated stainless steel. Volume shown is for one half cell (double for total cell volume). A red dot on one half of the equilibrium cell easily identifies the otherwise identical halves.

Fillpour™ Dialysis Tube Funnels

Easy Handling of Dialysis Tubes

Reduces difficulties in handling narrow dialysis bags. Dialysis tubing is cut to length and knotted at the end. The other end is slipped onto the tube and held with Silicone Rubber Loops (F20308-0000 - page 13), or a rubber band. Three tube steps fit various sizes of dialysis tubing, and a three notched universal hanger supports the funnel on the edge of any vessel. Also features a captive cap with writing area. Steam autoclavable at 121°C (250°F). **10 per pack.**

DNA Band Excisor**NEW PRODUCT!***Safely Excise DNA Bands; Protect Your Hands and Transilluminator**U.S. Patent D535,749*

Quickly and precisely excise selected DNA bands, as well as purified plasmid DNA preps, from electrophoresis gels without scratching expensive transilluminator screens. Unlike scalpels or razor blades, the DNA Band Excisor will not cause finger cuts, making them ideal for effective use in laboratories and in educational settings. The DNA Band Excisor speeds up processing time and reduces exposure of nucleic acids and user's hands to damaging UV light.

The thin, blade-like end is perfect for excising bands from agarose or polyacrylamide gels with precision, while the spatula end is beveled to help scoop and transport the excised piece of gel to a test tube. DNA Band Excisor can be discarded in standard trash receptacles; no need for sharps containers. **10 per pack.**

Gel Staining Boxes

Includes Snap-on Lid

Electrophoresis gels and membranes can be easily stained, destained, fixed and handled in these boxes. A drain (with LDPE plug) located flush with the bottom of the box minimizes disturbance of the gel during liquid drainage. The boxes and covers are unaffected by temperatures from -70°C to +70°C and are resistant to acids, alkalis, and many solvents. Inside dimensions of each box are 12.7 x 12.7 x 5.1cm deep (5 x 5 x 2") offering liquid capacity up to 750 ml. Select either clear PMP box for easier viewing or the economical polypropylene box. **Per each, 2 per case.**

B. F13551-1001	Translucent Polypropylene Box, Polypropylene Cover

Electrophoresis Fixing Trays

These fixing trays allow the user to drain the fixing solution and then place filter paper on top of the gel while it rests in the tray. Solution is then recoverable for reuse. Also useful in electrophoresis destaining of large gels, these virtually unbreakable, heavy polyethylene trays are 6.4mm ($\frac{1}{4}$ " thick with a top stiffening flange and 5 ribs in the bottom to raise the gel and plates. Extraction of the plates is facilitated by 9.5mm ($\frac{3}{8}$ " square ridges running lengthwise that hold the plate off the tray. There is a drain stopcock in the side with 1.8 meters (6') of Vikem® vinyl tubing, 13mm ($\frac{1}{2}$ " I.D. This permits more complete drainage of fluid into a receptacle and provides a slower, more controlled drain rate to avoid disturbing the gel. Hooks on the rim of the tray hold the tubing.

Trays Can Be Custom Manufactured to Your Specifications

Electrophoresis Gel Plate Rack

Separate Glass Plates to Reduce Chipping and Cracking

Includes 10 places for holding glass plates with a weighted base for safety. Wide handles provide a secure grip while transporting the filled rack. Smooth polypropylene material cushions glass edges to reduce chipping and cracking. A flat area on each end is designed for labeling racks as 'used', 'unused', 'treated' or 'untreated'. Made of white polypropylene with steel fittings, the rack is 20.3 x 38.1 x 22.9cm (8 x 15 x 9") and weighs 3¼ lbs (1.7kg).

CATALOG NO.

Autoradiography Pens with Handy Clip

Clip One to Your Pocket for Quick, Accurate Film Marking

A. Normal Energy Level, Non-Radioactive Marker

Excellent for marking various substrates that are to be radiographed with run numbers, dates and exposure times, film alignment markings, etc. They incorporate a non-toxic phosphorescent material that will not leak or dry out, have no bladders or vials and no liquid to spill. Bright green markings are visible under normal conditions and do not glow in the dark, but will show up on X-ray film. The spectral peak is 5600 Angstroms. The non-radioactive energy emitted may be adjusted by exposure to normal incandescent or fluorescent white light. The 3 to 4 minute energy emission leaves a distinct impression but will not overexpose film as some products do. The pen is 11.4cm (4½") long with a pocket clip. A screw knob advances the writing tip, which retracts by reversing the screw knob and depressing the tip. **Per each, 6 per case. Not appropriate for phosphor screens.**

B. High Energy Level, Non-Radioactive Marker

High Energy Level Pen has higher signal emission strength than the F13350 marker and a slightly longer duration of signal emission time. Best used for marking X-ray films similar to Kodak XLS. It also works well when film responsiveness is lowered as with chilled films which often require intensifier screen techniques. The mark emits no Beta or other isotope emission, only visible light. Therefore, the use of an intensifier screen will not occur as a variable in the X-ray marking procedure. **Per each, 6 per case. Not appropriate for phosphor screens.**

Plate Reader

Safely View the Bottom of Microtiter Plates and Petri Dishes

Plate reader has a clear deck for resting plates and a large, adjustable mirror for viewing their underside. This tool allows safe examination of the bottom of plates without risking spills on the face and eyes. It is ideal for examining cell monolayer, cell clones and for counting viral plaques or bacterial colonies. Other applications include easy and safe reading of hemagglutination, hemagglutination inhibition, hemolysis and agglutination tests. Mirror magnification is 3X actual plate size. Made of polypropylene with a glass-clear acrylic deck for placement of plates and Petri dishes.

Replica-Plating Device

Low-Cost, Accurate Method of Colony Replication

Utilizes a locking ring which secures sterile velveteen squares onto a PVC cylinder for easy control of the plating device. To produce replicas, the Petri dish carrying microbial colonies is inverted and lowered onto the cloth surface, then lifted. A fresh sterile nutrient plate is then lowered onto the velveteen surface and lifted, leaving a replica of the original colonies in the new dish. May be disinfected between uses with a brief rinse in 70% ethanol or chlorine bleach. The aluminum ring is 10.2cm (4") diameter, and the PVC cylinder is 6.9cm (2 3/4") high. For use with 90 to 100mm Petri dishes. One 12 pc. bag of white velveteen squares (also below) is included. Not autoclavable.

Sterile Cloning Cylinders

Convenient, Improved Cloning Technique

These cloning cylinders facilitate the isolation of individual cell clones, each generated from a single cell, yielding a homogenous population of cells. To isolate a clone, a thin layer of grease is applied to the bottom edge of the cylinder and then inverted over the clone of choice. After adding a small volume of Trypsin or EDTA, the dish is incubated at 37°C (98.6°F) briefly until cells detach. Cells are then collected from inside the cylinder and transferred to another vessel for further growth.

Polystyrene cloning cylinders are supplied in sterile packs. Three sizes: 4.7mm I.D. x 8mm H, 6.4mm I.D. x 8mm H and 9.5mm I.D. x 11mm H. Each cylinder is tapered so the bottom edge is wider than the top ensuring a good sealing surface. **Packed 10 per bag, one size.**

60mm Petri Dish Rack

Portable Rack Holds up to 54 Dishes

This rack is useful for safe transport and incubation of 60mm Petri dishes and helps to streamline benchtop sample processing. Each rack has six columns and holds up to fifty-four Petri dishes with lids. The 10½ x 6¾" base area preserves benchtop space, and a large center divider has space for labeling and includes a carrying handle that does not interfere with samples. Up to four racks can be stacked together and interlocked to prevent accidental knock over. Finger access slots in the base allow a stack of dishes to be safely removed from the rack with a secure grip. Rack base is epoxy coated steel, and all other parts are made of white polypropylene. Steam autoclavable at 121°C (250°F). Racks are shipped flat and easily assemble in minutes.

100mm Petri Dish Rack - White Polypropylene

Safely Transports Forty-Two Dishes

Safely transports, incubates and stores 100mm Petri dishes and helps to streamline benchtop sample processing. Holds up to forty-two Petri dishes with lids, configured in six columns of seven plates. Access slots allow safe removal of plates from the rack. Up to four racks can be stacked together and interlocked to prevent accidental knock over, and a small, stable base preserves bench top space. Center divider provides space for labeling and

incorporates a handle that does not interfere with the samples. Made from white polypropylene and can be steam autoclaved at 121°C (250°F). Racks are shipped flat and are easily assembled.

100mm Petri Dish Rack - Clear TPX® Body

Maximize Incubator Space

Clear, TPX® rack with polypropylene posts securely holds up to fifty-four 100mm Petri dishes. Easily viewed through the clear base and divider, dishes can be removed with one hand. Built-in handle provides easy transport, and rubber feet help prevent rack from sliding on the benchtop. Racks are shipped flat and can be assembled in minutes.

Easyplate™ 100mm Petri Dish Racks

Easyplate™ 100mm Petri Dish Racks

Perfect for Use in an Incubator

Increase workspace and efficiently transport large quantity of Petri dishes. Silicone holding strips on the rack's four columns grip each Petri dish and enable the user to easily insert and remove groups of dishes without disturbing upper or lower dishes. Labels on the sides of the rack provide space for critical sample identification. Available in 4 colors and two sizes; the 24.1cm (9½") high size holds forty-eight 100mm Petri dishes, and the 36.9cm (14½") high size holds eighty-four 100mm Petri dishes. Made of lightweight, chemically resistant polycarbonate and autoclavable at 121°C (250°F). Turntable (F18982-1000) sold separately (below).

Slide Mailer

Chemically inert, polyethylene container has a deep screw cap to provide maximum protection against breakage. Once cap is removed slides project 12.7mm (½") out of the jar for easy grip and clean handling. Internal grooves accept 5 to 10 microscope slides 25 x 75mm (1 x 3") or can be used as a specimen jar to hold vials up to 12ml. The cap has a small loop for attachment of wired tags and should be taped for shipment. **6 per pack, 6 packs per case.**

CATALOG NO.

H44200-0000

Coplin Staining Jar

This polypropylene jar improves on the classic tapered square design with a larger opening for easier placement and removal of slides. The polypropylene screw cap is 5.3cm in diameter, has a flat top, easy grip knurled edge, deep thread and a seal ring to prevent leaks. Five internal slots hold up to 10 standard 25 x 75mm (1 x 3") slides back to back. Base diameter: 6cm (2 3/8"). Height: 11.4cm (4 1/2"). Steam autoclavable at 121°C (250°F), remove cap when autoclaving. **Per each, 12 per case.**

B. Slide Staining and Storage System

Universal slide rack (B1), staining dish (B2) and slide rack storage box (B3) for histology, microbiology and other slide staining needs. The rack and dish are made of black polyoxymethylene (POM) plastic which is easy-to-clean and resistant to chemicals used in staining procedures. Polystyrene storage box holds up to four slide racks.

B1. Slide Rack (shown inside Staining Dish)

Holds twenty-five, 25 x 75mm (1 x 3") slides in numbered slots, has an open bottom for rapid draining and a handle so the rack can be lifted to add or remove slides without touching the staining solution. Maximum use temperature is 90°C (194°F). **Per each, 24 per case.**

B2. Staining Dish

Capacity of the staining dish is 250ml, but with the slide rack (B1) only 150ml is needed, providing a savings on staining liquids, developing fluids and intermediates. A tight lid helps minimize spills and evaporation. Upon removing the lid and lifting the slide rack, a provided clip can be placed on the top edge of the dish. The slide rack can then rest on this clip which keeps it elevated above the liquid and lets the stain solution drain back into the reservoir. The inside of the lid has a built-in slide rest which also provides a compartment for a drying agent. Dish is easy-to-clean and the cover will not jam in freezer storage. **Per each, 24 per case.**

B3. Storage Box

Black polystyrene storage box holds four Slide Racks (B1, sold separately) and provides convenient, indexed storage. There is a paper index for each of the four sections with each section sub-indexed numerically 1-25. **Per each, 6 per case.**

NEW PRODUCT!

Mouse Restrainer with Dorsal Access

The Safe, Fast, and Accurate Way to Work with Mice

Feature rich and budget friendly, this high throughput Mouse Restrainer with Dorsal Access takes care of the basics, so your hands are free for the important tasks. The easy-to-use entry funnel and tube with two gate positions allows quick, gentle and secure immobilization of the mouse. Draw mouse tail first, or lead head first, into the wide entry funnel and to the back of the tube, then place gate in choice of two slots. When in the restrainer, the dorsal skin of the mouse is accessible through a top circular opening so subcutaneous injections can be performed quickly, without risk of being bitten, and with less likelihood of sticking your own fingers. With tail first entry, the tail of the mouse is conveniently positioned outside the restrainer for tail bleeds and tattooing. Restrainer can be mounted to table or other surface. (Hardware not included). Disinfect with ethanol or common laboratory disinfectants, or autoclave to sterilize. Restrainer is made from durable, crystal clear TPX® and unlike acrylic restrainers will not craze or weaken. **Per each, 12 per case.**

CATALOG NO.	DESCRIPTION	DIMENSIONS (L x W x H)
F46401-0000	Holds mice 18-35 grams, tube is 3.2cm diameter	17.4 x 10 x 6.7cm (6.8 x 3.9 x 2.6")

Universal Animal Restrainers

Multiple Sizes Available

Fabricated of rigid, clear acrylic plastic, these animal restrainers have removable head and tail gates. The head gate has breathing holes and fits into any of four positions for various sizes of rodents. The tail gate allows maximum closeness of occluding cuff to body. The inner raised floor may be removed for larger rodents. Nylon thumb screws serve as base fasteners and legs.

NEW PRODUCTS!

Ergopet® Pipettors

Prevents Strain on Your Wrist and Arm

Ergonomic design reduces awkward positioning, as well as strain and fatigue to pipetting hand and arm when working inside a hood or on the bench.

- Extended handle length dramatically lowers the hand position allowing users to rest their elbow on the bench while supporting their pipettor, especially with the hood sash lowered.
- Swiveling head can be positioned straight ahead in line with the hand or swung up to 90° left or right to permit unobstructed viewing of the meniscus and graduations while aspirating and dispensing.
- Soft silicone chuck accepts glass or plastic pipettes from 1-100ml with outside mouth diameter of 3.3 to 9.9mm. Chuck can be rotated to change the angle of the pipette from vertical to 15° outwards to ensure

that the meniscus is level at all times. Hydrophobic filter within the chuck can be replaced without using any tools and protects the pipette from inadvertent backflow.

NEW PRODUCTS!

Ergopet® Bellows Pipettor

No Batteries or Power Supply Needed. Great for Field or Classroom Use.

Rugged, hand-operated bellows provides about 100ml of pipetting volume and continuous, silent operation without the need for battery charging, power cords. Extended height models (4 or 8") lift the pipette tip allowing users with different body heights and arm lengths to use the pipettor easily in restricted spaces such as fume hoods. Its feather-light weight and comfortable grip reduces fatigue allowing hours of comfortable, stress-free operation. Not autoclavable. Rest or store on accessory wire support stand F37907-0100 available page 240.

Vari-Pet® Pipettors

*Dependable, Positive Displacement
Repetitive Dispenser*

Self-filling pipetting aid designed for speed, ease, and convenience. The polypropylene handle is ergonomically designed to permit extended use without fatigue and a Teflon® plunger assures smooth, consistent operation. Dispensing volume can be adjusted by turning the knob at the base of the unit. Offered in two models:

Teflon® Tip Varipet® Pipettor has excellent chemical resistance because the fluids only contact the borosilicate glass and Teflon®

Luer Lock Varipet® Pipettor is supplied with a chrome-plated steel Luer lock fitting, complete with removable cannula for general use. Accuracy is $\pm 0.5\%$.

Minipet™ Pipettors

Repetitive Pipettors in Two Styles

Features a three-way check valve for continuous, repetitive pipetting. Just place the filling line in a reservoir, push the Teflon® plunger to dispense and release to refill. A molded polypropylene handle offers comfort for extended use. Turning the knob on top sets the self-locking capacity to assure dispensing repeatability of $\pm 0.5\%$. Extensions can be added to the filling line for greater reach.

Teflon® Minipet® Pipettors offer a high level of chemical resistance and may be used with virtually any solvent or acid (except HF). Fluids come in contact with only borosilicate glass and Teflon®. Supplied with an all-Teflon® valve (with glass check) and Teflon® sinker on 45.7cm (18") line, 2.4mm I.D. (1/8").

Aqueous Minipet® Pipettors are autoclavable and can be used with a Luer lock manifold for multi-well plate work. They are supplied with a chrome plated check valve, Luer lock fitting, Buna-N-seals, stainless steel spring, and Luer lock cannula, 45.7cm long (18"), 3.2mm (1/8") I.D. silicon filling tube and Teflon® sinker.

Pipette Pump™ III Pipettors

Your Choice of Two Ergonomically Designed Models

U.S. Patent 7,093,507; European Patent E1477227A2

The ergonomic design of Pipette Pump™ III Pipettors enhances comfort, utility and dispensing precision while helping to reduce the risk of injury from repetitive and awkward pipetting motions. The angle of the inserted pipette and its placement in front of the hand allows the arm to remain in a more natural, lowered position unlike other pipettors, which require arm and elbow elevation for many pipetting actions. Compact design adds only 15.2cm (6") to the pipette length allowing use in fume hoods and controlled environment glove boxes. Lightweight, one-handed operation minimizes strain on the hand and wrist.

A. Fast Release Pipette Pump™ III Pipettors

Quick and Accurate Operation

This lightweight pipettor has a fast release trigger that dispenses the entire pipette contents. An optimally located thumb wheel easily rotates for precision aspirating or dispensing, down to a volume of one drop at a time – all while using a relaxed grip. The thumb wheel also can be used to “blow out” the contents of the pipette. Available in three different pipette volumes, 2, 10 and 25ml, each color-coded for easy identification. A self-stabilizing collar inside the silicone chuck holds either glass or plastic pipettes. Resistant to acids, alkalis and most solvents, they can be disassembled for cleaning. Overall length: 17.1cm (6¾"). **Per each, 12 per case.**

B. Economy Pipette Pump™ III Pipettors

Accuracy at an Affordable Price!

Ergonomic design enhances comfort, utility and dispensing precision while helping to reduce the risk of injury from repetitive and awkward pipetting motions. This lightweight, affordable device provides accurate, trouble-free pipetting with simple, one-handed operation. The optimally located thumb wheel rotates easily for precision aspirating or dispensing, down to a volume of one drop at a time. The thumb wheel also can be used to "blow out" the contents of the pipette. Available in three different pipette volumes, 2, 10 and 25ml, each color-coded for easy identification. Resistant to acids, alkalis and most solvents, they can be disassembled for cleaning. Overall length: 17.1cm (6¾"). **Per each, 12 per case.**

Fast Release Pipette Pump™ II Pipettors

Features Rapid Release Valve for Quick Dispensing

Glass or plastic pipettes are easily inserted into a unique collar with stabilizing fingers for a secure hold. Rotating the knurled thumb wheel draws liquid to the desired volume. To empty rapidly, apply light pressure to the fast release lever. For gradual dispensing, rotate the thumb wheel. Sizes are color coded. They can be disassembled for cleaning. **Per each, 12 per case.**

Pipette Pump™ Pipettors

Four Sizes

Provides safe, accurate and trouble-free pipetting with simple, one-handed operation. Pipettes fit smoothly into its flexible tapered chuck. The thumbwheel on the side is rotated for precision filling or dispensing, and the plunger may be pressed for quick emptying. It is resistant to acids and alkalis. Disassemble all parts for cleaning and before autoclaving at 121°C (250°F) for 20 minutes except the chuck which should not be autoclaved. **Per each, 12 per case.**

Pipette Aid

Safe, Easy and Economical Pipetting

This pipette aid is used by squeezing, then releasing the bulb to draw fluid into the pipette. The pipette aid is then removed, and the pipette top quickly covered with a gloved finger to control and release fluid. The bulb is Vikem® vinyl with a tapered polyethylene chuck for quick removal when pipette is filled. Dimensions are 5cm diameter, 10cm height. **6 per pack, 2 packs per case.**

CATALOG NO.
F37886-0000

Bulb Pipettor

Keep Bulb with Reagent Bottle

A tapered, silicone rubber seal provides an airtight fit on all size pipettes. An excellent aspirator for use with Westergren or Wintrobe sedimentation tubes. Comes complete with an elastic cord for dedicating that pipettor to a specific reagent bottle. Can be opened, cleaned and steam autoclaved at 121°C (250°F). **Per each, 100 per case.**

CATALOG NO.

H37888-0000

Bel-Bulb™ Pipettor

Fits Pipettes from 6 to 8mm

This simple suction device with a soft tapered chuck has a flexible vinyl bulb that is 5cm diameter x 7cm long (2 x 2¾"). After filling your pipette, remove the bulb and quickly cover the top of the pipette with a gloved finger to hold fluid or release it as needed. **2 per pack, 6 packs per case.**

CATALOG NO.

Pipette Filler

Simple Operation for Filling and Dispensing from Pipettes

Made of Vikem® vinyl, this pipette filler has greater chemical resistance than standard rubber bulbs and accommodates pipettes from 5 to 14mm in diameter. Three pinch valves are coded for use and are operated with one hand by pinching valve control pad "A" with your thumb and index finger while squeezing the bulb with three fingers and palm. The bulb will remain collapsed when pad "A" is released. Then, squeeze pad "S" to aspirate liquids into the pipette. Squeezing pad "E" will dispense liquid from the pipette. Diameter: 5.4cm (2⅝"). Overall length: 15.2cm (6").

Vaccu-Pette/96™ Pipetting Device

Pipette All 96 Wells at Once

This pipetting device can aspirate or dispense 96 wells in less than 10 seconds. It speeds up repetitive washing, dispensing or aspirating of wells by working simultaneously. Simply connect a disposable plastic syringe and withdraw the plunger to transfer liquid. Excellent for simultaneously changing media or the addition/removal of reagents from a 96 well plate. Made of transparent plastic material, it has a vacuum outlet at one end, and a short length of 3.2mm I.D. ($\frac{1}{8}$ ") tubing is supplied for syringe connection. Requires a 30ml or larger disposable sterile syringe (not included). **Individually packed, available in Sterile/Disposable or Autoclavable/Reusable.**

Sterile, Disposable Vaccu-Pette/96™ Pipetting Device

Molded of clear, disposable plastic that can be used only once and cannot be autoclaved or gas sterilized. **Per each, 10 per case.**

CATALOG NO.	DIMENSIONS (L x W x H)
F37876-0000	12.7 x 8.6 x 3.7cm (5 x 3 $\frac{3}{4}$ x 1 $\frac{1}{2}$ ")

Autoclavable, Reusable Vaccu-Pette/96™ Pipetting Device

Molded of polycarbonate, must be sterilized by autoclaving prior to use in order to avoid contamination. It cannot be gas sterilized because of the possibility of residual trapped gases. **Per each, 10 per case.**

Transpette™ 8 Channel Transfer Pipettor - Disposable

Perfect for Use With Disposable Pipetting Reservoir

Perform plate washing, media change and supernatant collection without the use of pipettors and pipette tips with this inexpensive, 8-channel transfer pipettor. Discard after "hot" radioactive uses to avoid radiation contamination of your expensive liquid handling devices. Made of translucent plastic, it holds 600µl per channel. *Cannot be autoclaved.* Sterile and non-sterile disposable pipetting reservoirs listed below. **Available Non-Sterile, 25 per pack or Sterile, individually packaged, 100 per pack.**

"Three-In-One" Multi-channel Pipette Reservoir

One Reservoir, Three Layouts

Ideal for use when filling multi-tube blocks or microwell plates, this two-sided polypropylene reservoir is actually three reservoirs in one:

1. A graduated single reagent reservoir with graduations at 10, 25, 40 and 50ml.

And on the reverse side:

2. A reservoir with 8 separate 5ml (max. capacity) reagent channels.
3. A reservoir with 12 separate 5ml (max. capacity) reagent channels.

Each compartment of the multi-channel reservoirs is numbered for reagent identification. Suitable for use with all brands of multi-channel pipettors. Autoclavable and reusable. **10 per pack.**

Bel-Blotter™ 96-Well Replicating Tool

Increase Productivity, Minimize Effort

Designed to do tedious tasks with a minimum of effort, the 96 open-ended pipette tips of this unique product fit all types of 96 well plates from flat, vee or round bottom plates to 0.2ml thin-walled PCR plates and tubes. Will pick up fluid up to 10µl per tip for placement onto filter paper, 96 wells plate or other receiving media. Can be used for replication of recombinant DNA libraries, inoculation of filters for colony hybridization, PCR, phage typing and other applications. Molded of polycarbonate, it is easy-to-use, reusable and autoclavable. **Per each, 10 per case.**

Pipettor Accuracy Test Kit

Provides a Quick and Simple Method of Testing Pipettors

Pipettors trusted to deliver precise microliter volumes should be checked for accuracy on a regular basis. This kit eliminates the time consuming alternative of using a balance and is ideal for all air displacement pipettors such as Rainin, Gilson, Eppendorf, SMI, Oxford, Clinicon, Brand, Finn, MLA and other brands. Consists of 2 soft vinyl adapters (a yellow one for volumes up to 100µl and a blue one for volumes from 200 to 1000µl), 25 each of five sizes of glass capillaries, and two glass pipettes for the higher volumes. All capillaries are color-coded and have a calibration line accuracy of $\pm .05\text{mm}$. Packaged in a transparent plastic storage box with complete instructions for use. Not meant for certification of calibration.

C. Pipette Rinsers

Effective, Reliable Design Ensures Safe, Efficient Operation

Provides a simple, automatic method for rinsing large numbers of pipettes at one time. High level water entry provides an air gap between the maximum water level and the end of the water inlet tube ensuring safe and efficient operation. The "tube within a tube" siphoning system assures rapid, complete and automatic siphoning and refilling over a wide range of inlet water pressures and flow rates. Minimizes the danger of siphon stalling at certain water inflow rates and prevents any possible backflow into the potable water supply in the event of a pressure interruption. Includes a 30.5cm (12") long piece of 2.5cm (1") I.D. drain tube and 1.5M (5ft) of 12.5mm (½") I.D. flexible water inlet tube.

Pipettor Holder System - PiRack®

Mix and Match Components to Suit Your Needs

This polypropylene system is strong enough to support the weight of even the heaviest pipettor. Hold a single pipette with one clamp or add a triple clamp or extenders to increase the number of holders at a work location. The utility tray, which mounts between two clamps, is ideal for storing pipetting supplies or other small items. It is perfectly sized for Scienceware® No Wire™ Half Racks that hold tubes, vials, mini tubes and cuvettes (see page 295). Attach to any shelf or benchtop edge up to 2.54cm (1") thick using the large locking thumbscrew clamp. Supports many standard brands of pipettors. All components are chemical resistant and autoclavable at 121°C (250°F).

Holdfast® Graduated Cylinders

Grip Handle for Steady Pouring

This one-piece polypropylene cylinder with handle provides a secure, solid grip for safer pouring. The "Total Contained, Total Delivered" double scale is easy-to-read and accurate to +/-5%. A hexagonal base prevents tipping and rolling. Handle opening is 8.9 x 2.9cm (3 x 1 1/8"). Chemically resistant and autoclavable at 121°C (250°F).

Tall Form Graduated Pitchers - Polypropylene

Available in a large selection of sizes, these pitchers are ideal for general laboratory use and offer well designed spouts and large open handles for easy stacking. Chemical resistant and shatterproof, they can be used with wet or dry ingredients. Metric gradations are molded on the outside wall. Made of translucent polypropylene, they are heat resistant to 121°C (250°F) and are steam autoclavable.

NEW PRODUCT!

15ml and 50ml Clear View Conical Tube Holder

Two Tube Holders in One

Patent Pending

The most versatile tube holder on the market. Set-up takes just seconds and gives you the choice of creating a 15ml or a 50ml tube holder. Unlike other tube holders, the open uprights allow you to view the entire contents of the tube. No more guessing if there is liquid remaining in the conical bottom. Tube can be easily lifted from the holder, or pinch the uprights and carry the holder with the tube! Autoclavable polypropylene. **4 per bag.**

50ml Tube Slant Rack - Poxysteel®

Angled rack is useful for keeping tube caps and marked contents easily readable, frequently used reagents at an ergonomic angle or draining excess supernatant fluid from pellets. Each rack holds eight 50ml conical tubes or other vessels up to 30mm in diameter. To keep samples off the bench but still immediately available, the rack can be attached to the underside of a shelf using built in mounting points (hardware not included). The steel wire is epoxy coated for long life and easy cleaning and can be steam autoclaved at 121°C (250°F)

Incu-Shaker™ Tube Holder

Useful Accessory for Benchtop or Floor Model Shaking Incubators

By positioning tubes at an angle, the liquid surface area increases permitting greater mixing action without increasing the rotational speed of the shaker. Securely holds a combination of up to 48 tubes, (eighteen 1.5 or 2ml, twelve 5ml, twelve 15ml and six 50ml). Made from polypropylene and steam autoclavable at 121°C (250°F), it easily secures to the platform of a shaker with included screws. Dimensions: 15.9cm (6¼") base diameter, 21cm (8¼") tube holder diameter, 12.7cm (5") height.

Round Microcentrifuge Floating Bubble Racks

Incubate 8 to 20 Microtubes in Water Baths or Beakers

Made especially for use with beakers and waterbaths, these space-saving racks are ideal for small quantities of tubes and perfect for use in microbiology and immunology labs. They are molded of buoyant TPX® brand polymethylpentene with tiny bubbles throughout for additional buoyancy. Insert tubes from the top, and easily remove them by pressing the rack down on the bench. Available in 10.8mm diameter holes to fit 1.5ml microtubes and 7.7mm holes to fit 0.5ml tubes. Racks are 6.4mm (¼") thick with 19mm (¾") legs and a center, rod handle. Steam autoclavable at 121°C (250°F). Can boil at 100°C (212°F) for 30 minutes. **Per each, 12 per case.**

Round Microcentrifuge Floating Bubble Racks with Hold-Down Disk

Hold-Down Disk Maintains Constant Pressure on Tube Caps

Specifically designed for incubation, this rack includes a hold-down disk that maintains a constant pressure on tube caps, preventing them from opening under internal air expansion. The 4.8mm ($\frac{3}{16}$ ") thick polypropylene disk is centrally mounted on a threaded handle. The racks float, and 1.5ml microcentrifuge tubes remain immersed at a constant depth regardless of water level. The foam-filled TPX® PMP (polymethylpentene) rack, polypropylene cover plate and handle are steam autoclavable at 121°C (250°F). Racks have 19mm ($\frac{3}{4}$ ") long legs. **Per each, 6 per case.**

PrepSafe™ Floating Microcentrifuge Tube Rack

Patent Pending

Protect your samples from loss and contamination. Hold 1.5ml or 2.0ml microcentrifuge tubes securely in a water bath, in an ice bucket, or on the benchtop. Immobilizing tabs allow tubes to be stored securely and ensure that the caps stay locked in place even if tipped over. This floating rack has 28 numbered locations so samples can be easily identified. Raised handle allows rack to be lifted without agitating samples. Steam autoclavable at 121°C (250°F).

Microcentrifuge Tube Ice Rack/Tray

For Temperature Stabilized Benchtop Storage

This tray with rack insert can accommodate up to fifty 1.5ml tubes (or other tubes with a diameter less than 12mm) for large volume benchtop processing. It has a deep tray to hold ice and water for extended use time, a flat perimeter rim for labeling tape, and it can be safely stacked with identical racks when loaded or empty. Designed for long life and heavy usage, all parts are molded of sturdy polypropylene and are steam autoclavable at 121°C (250°F).

To further protect tubes during transport or storage while also maintaining stackability, an optional polypropylene cover is available. Dimensions: 25.4 x 13.3 x 7.3cm H (9 $\frac{1}{8}$ x 5 $\frac{1}{4}$ x 2 $\frac{7}{8}$ " H). **Per each.**

0°C Cryo-Safe™ Junior Cooler*Lasts 3 Hours - 15ml Tubes*

Benchtop sized cooler holds twelve 15ml centrifuge or cryo vials at a temperature below 0°C for approximately 3 hours. The polycarbonate cooler body is filled with a non-toxic gel which cannot contact tubes, ensuring that markings and labels on tubes are safe. Coolers are stackable and have rubber feet to prevent sliding on the lab bench. Tubes up to 125mm tall can be accommodated when the clear polycarbonate lid is secured closed with the built-in wire carrying handle. Corresponding tube positions are printed on the keyed lid and cooler. Store at -20°C for a few hours until the temperature of the cooler falls below 0°C.

-20°C Cryo-Safe™ Maxi Cooler*Lasts 1½ Hours - 0.5, 1.5 or 2.0ml Tubes*

This cooler safely holds thirty-two 0.5, 1.5 or 2.0ml microcentrifuge tubes or cryogenic vials at a temperature below -15°C for approximately 1½ hours. The polycarbonate cooler body is filled with a non-toxic gel, which can not contact tubes, ensuring that markings and labels on tubes are safe. The gel-filled polycarbonate lid extends temperature holding time and is secured closed with a built-in wire carrying handle.

Corresponding tube positions are printed on the keyed lid and near each well. Coolers are stackable and have rubber feet to prevent sliding on the lab bench. Use included insert to hold 0.5ml microcentrifuge tubes. Ideal for protecting valuable samples stored in a freezer with defrost cycle. Store at -20°C for 24 hours prior to use.

Cryo-Safe™ Mini Quick-Freeze Cooler

Portable, Quick Freezing for 0.5 or 1.5ml Tubes

Can be used for up to 45 minutes to rapidly and repeatedly chill biological samples for use in molecular biology. Applications such as ethanol precipitation of DNA/RNA samples are made easy, eliminating the inconvenience of traditional dry ice and alcohol baths. After storing the polycarbonate cooler overnight at -20°C, inserted samples freeze within a few minutes. Holds twelve 0.5 or 1.5ml microcentrifuge tubes. There is no direct contact between the tubes and the insulating solution, so labels and markings are safe. Coolers are stackable and have rubber feet to prevent sliding on the lab bench. A clear polycarbonate lid shows positions of tubes and is keyed to correspond with positions printed on cooler. Molded side handles allow secure grip for transfer. Use included insert to hold 0.5ml microcentrifuge tubes. Store at -20°C for 24 hours prior to use.

Cryo-Safe™ -1°C Freeze Controller

The easy-to-use unit provides "controlled rate" freezing samples at approximately -1°C per minute, which is needed to prevent lethal intracellular freezing and successful cryopreservation. Prior to inserting vials, the unit should be filled with 250ml of 100% isopropyl alcohol. Once the samples have been inserted the unit should be placed in a -80°C mechanical freezer. The body of the container is clear polycarbonate, and the screw closure is high-density polyethylene. Placed inside the container is an 18 well, removable polyethylene vial holder that separates the vials from the isopropyl alcohol. A plastic foam insert surrounds the vial holder. Alcohol filled containers can be stored at room temperature. Universal symbols printed on the container show instructions for use.

Cryo-Safe™ Cold Box

Prevents Expensive Enzymes and Critical Samples from Warming

Molded polystyrene container, with cover, has an internal 12-place support for 1.5 ml microcentrifuge tubes. The space surrounding the tubes is filled with a sealed-in material that maintains the low temperature required for safe storage and transport. When taken out of a -20°C freezer it will maintain a -15°C temperature for 1½ hours, and will remain below 0°C for 4 hours. **Per each, 8 per case.**

60mm Petri Dish Rack

Portable Rack Holds up to 54 Dishes

This rack is useful for safe transport and incubation of 60mm Petri dishes and helps to streamline benchtop sample processing. Each rack has six columns and holds up to fifty-four Petri dishes with lids. The 10½ x 6¾" base area preserves benchtop space, and a large center divider has space for labeling and includes a carrying handle that does not interfere with samples. Up to four racks can be stacked together and interlocked to prevent accidental knock over. Finger access slots in the base allow a stack of dishes to be safely removed from the rack with a secure grip. Rack base is epoxy coated steel, and all other parts are made of white polypropylene. Steam autoclavable at 121°C (250°F). Racks are shipped flat and easily assemble in minutes.

Hybridization Bottle Rack - Poxygrid®

Protects and Stores Hybridizing Bottles

Heavy-duty rack protects your expensive bottles keeping them from rolling, tipping and striking against one another. Holds 150mm and 300mm long bottles with ample space in between to allow for the screw cap diameter and provide convenient handling. Made of welded steel rods, this rack is epoxy-coated for maximum protection, easy cleaning, and is steam autoclavable at 121°C (250°F). Holes are 42mm square for 40mm diameter bottles.

CATALOG NO.	PLACES	DIMENSIONS (L x W x H)

Hydrometer Racks

Safe Storage for Glass Hydrometers

Protect fragile glass hydrometers by storing them in this 18-place polypropylene rack. The middle and top plates have 25mm (1") diameter holes. The bottom plate is 44mm (1³/₄") high and has wells tapering from 25mm to 9mm (1 to ³/₈") to hold the hydrometer bulb. The base is 21 x 21.6cm (8¹/₄ x 8¹/₂") for tip-proof stability. Overall height: 25.1cm (9⁷/₈") with handles. Steam autoclavable at 121°C (250°F). Per each, 6 per case.

CATALOG NO.	DESCRIPTION
F18988-0000	For Long Hydrometers, Top plate is 17.8cm H (7" H)
F18988-0001	For Short Hydrometers, Top plate is 14.3cm H (5 ⁵ / ₈ " H)

Imhoff Cone Racks - Poxygrid®

These lightweight racks hold three or four Imhoff settling cones in a single row for clearer viewing. Cone tips are held up off the benchtop for easier viewing and to allow plug removal if required. The wire frames are epoxy coated for durability and easy cleaning. A wide base provides stability without crowding the benchtop. For full description of Imhoff Cones see page 144.

Separatory Funnel Rack and Imhoff Cone

Chemical Resistant and Fully Adjustable

This high-density polyethylene rack holds four separatory funnels up to 98mm (3 $\frac{1}{2}$ ") in diameter on its center shelf. Four beakers fit on the bottom shelf and four long-stem funnels on the top shelf. Set screws in the base risers allow vertical adjustment of telescoping rods, while set screws in the center shelf permit adjustment for accommodating separatory funnels of various lengths. Included are 24 insert clips that allow rack to accommodate different sized Separatory Funnels and Imhoff Cones. Fully extended, the rack measures 20.3 x 48.9 x 50.8cm (8 x 19 $\frac{1}{4}$ x 20") high. Four feet extend from the base for stability and have holes for permanent mounting.

Additional Separatory Funnel Rack available on page 288.

Lattice Support Stand

Expand Your Options in the Laboratory

The Lattice Support Stand has an extended base and three, evenly spaced, rigid aluminum support rods to provide maximum capacity of small lightweight items such as glassware, as well as heavy items such as mechanical stirrers. The weighted polypropylene base is excellent for use in severe corrosive conditions, is stain resistant and provides maximum stability. The three solid aluminum rods are securely screwed into the base and will not wear with everyday use of clamps. Horizontal rods sold separately (below). Ideal for use with Bel-Art Clamps (H18354-0000, H18350-0000 pages 58 and 62).

NEW PRODUCT!

Tissue Culture Flask Racks

Improve Organization

These polypropylene racks hold 25cm², 75cm² (50 - 75ml or 250 - 260ml) or similar sized tissue culture flasks in a vertical position. Rectangular holes in the top and center plates stabilize the flasks preventing tipping. Allows easy organization of flasks to improve processing and to avoid errors in collecting used media, media change, washing of cell monolayer, trypsinization and seeding of cells. Grips on each end make rack handling secure and allow for safe transport of flasks to the incubator. Steam autoclavable at 121°C (250°F). **Per each, 4 per case.**

Height Adjustable Water Bath Rack

For 1.5 to 15ml Tubes

Use the Height-Adjustable Rack to securely hold up to six tubes or vials at any desired depth in a water bath or beaker. The rack has a flexible grip that easily retains mixed test tubes of varying weight and volume from 1.5 to 15ml. Unlike floating racks, this rack's adjustable height prevents submersion and sinking problems that might occur with heavier or unbalanced tubes. The compact yet stable footprint saves bench and bath space and lifts in and out of a bath without splashing. All parts are steam autoclavable at 121°C (250°F).

CATALOG NO.

F18882-0000

Water Bath Racks

Submersible, Sinks without Adding Weight

Molded of a special blend of polypropylene that is heavier than water, these racks sink to the bottom of the bath and will not tip over. All racks are 21.3L x 11cmW (8½" x 4½"). Steam autoclavable at 121°C (250°F). **Per each, 6 per case.**

Test Tube Racks - Poxygrid®

Choice of Four Colors and Multiple Sizes

Chemical and corrosion-resistant steel wire racks are coated with heat-cured epoxy. Epoxy coatings are unaffected by organic solvents, salts, weak acids and weak alkalis, will withstand a temperature range of -223°C (-369°F) to 121°C (250°F) and can be autoclaved. All racks have square holes, three decks, a slotted grid bottom and reinforced edges. Orange racks can be used for biohazard warning, yellow for radioactive warning. **Per each, 24 per case.**

Test Tube Racks - No-Wire™

Submersible! Stackable! Color-Coded! Autoclavable!

A great alternative to wire racks, with price and space saving advantages over other plastic racks. Made of a special blend of autoclavable polypropylene, they will sink in a water bath and maintain their stability even in agitated water. Also perfect for use outside the water bath, they meet the demands of daily usage in the lab. Available in numerous hole sizes, with a choice of three colors for safety and identification.

Each rack features end plates for labeling as well as numbered and lettered rows for tube identification. Interlocking feet allow stacking of racks for storage. Dimensions for all racks are 24.6 x 10.4 x 6.4cm high (9.7 x 4.1 x 2.5") and they assemble in seconds. Steam autoclavable at 121°C (250°F). **Per each, 8 per case.**

Test Tube Grip Racks - No-Wire™

Test Tubes 'Hang in There' in Any Position, Even Inverted!

Retainer fingers hold tubes firmly in the rack plates with no fear of dislodging, making them perfect for both decanting and water bath work. The racks are made of a special blend of autoclavable polypropylene that is heavier than water for submerging into water baths. Each rack

features end plates for labeling as well as numbered and lettered rows for tube identification. Fold up sides lock firmly into the grip decks, so assembly takes only seconds. Unloaded racks are stackable. All racks are 24.8 x 10.5 x 7cmH (9 7/8 x 4 1/8 x 2 3/4"). Steam autoclavable at 121°C (250°F). **Per each, 8 per case.**

Round Racks - No-Wire™

Use in Desiccators, Round Ice Buckets and Beakers

These No-Wire™ racks fit neatly into round containers such as ice buckets and beakers, as well as desiccators. Choose from two sizes; the large rack is ideal for use in round ice buckets such as Magic Touch™ (page 184) and the small rack fits perfectly in a 1000ml beaker. The small rack also features a removable, snap-on loop handle for easy retrieval. Made of a special blend of autoclavable polypropylene that is heavier than water, they remain stable at the bottom of water baths or ice baths. All racks

have a base and two tiers of grids with numbered and lettered rows for identification. Each base has four feet which fit into the top of identical racks for easy stacking. Steam autoclavable at 121°C (250°F). Racks are shipped flat and can be easily assembled. **Per each, 8 per case.**

Indexed Racks

Robotically Place Test Tube with Absolute Accuracy and Identify Specific Cell Location

Round holes with tight tolerances hold 13mm tubes firmly for accurate processing reducing lost samples and potential damage to instruments. Increased efficiency is achieved by using the numbered locations for programming, resulting in higher throughput. Numbers are clearly silk-screened on the top of the rack in either standard or serpentine numbering patterns. Designed for automated liquid handling systems, they are ideal when cell identification/location is critical. Typical applications include robotic sample-processing equipment which uses 3 or 4 racks per unit. Excellent tool for clinical laboratories in identifying test tube locations for multiple samples. 6 rows of 15 places (90 place) and made of autoclavable white polypropylene. Dimensions: 25 x 10.5 x 5.6cmH (9 $\frac{3}{4}$ x 4 $\frac{1}{8}$ x 2 $\frac{3}{16}$ ").

Slant Racks

Simple and Efficient Way to Prepare Agar Media Slants

Turning the rack to one side will slant tubes 5° to produce a large surface area useful for aerobic cultures. Turning to the other side will slant tubes 20° for a smaller surface area, which is ideal for anaerobic cultures and reduces drying out of media during storage. Media-filled tubes are autoclaved with the rack in an upright position. While media is still hot, tilt the rack to the desired angle and allow media to harden. Rack can be used for

incubating tissue cultures or submersion in a water bath. Choose from 13-16mm or 16-20mm tube openings in 40 numbered and lettered places. Not stackable.

Per each, 4 per case.

Personal Eye Wash in the Workplace

As basic first aid equipment for any work environment and a practical supplement when fixed eye wash stations are required, Personal Eye Wash products offer an inexpensive solution that can be utilized to enhance your emergency preparedness, and improve critical response time when debris or chemicals enter the eye.

Things to consider when choosing personal eye wash:

• What types of materials are on site that could enter the eye?

Saline which mimics human tears or water are the most common products used to flush the eyes and work well for particulate debris (i.e. dust, dirt, metal fragments, food chips etc.) When corrosive acids or alkalis are involved, time is of the essence. While water and saline will dilute an acid or alkali, a pH Neutralizing solution can quickly neutralize the substance and return the eye to its normal pH value of 7.4. Learn more about Plum pH Neutralizer on page 303.

• Where are workers located? What is the work environment?

Are workers in a fixed area, moving between work areas or facilities, or outdoors? Personal Eye Wash products can be placed right where accidents are most likely to occur. Choose from wall mounting units or individual bottles and belt bags that mobile workers can conveniently keep with them at all times. For areas of high traffic or dust, Plum Covered Stations help keep supplies clean.

Bel-Art Products offers a variety of options in Personal Eye Wash. The table below will help you to determine which Bel-Art Products brands and features are best suited for your individual needs. After using Personal Eye Wash the injured person should immediately follow-up with a physician for further examination.

Performance Level	Bel-Art Products Category	Features and Benefits	Page #

Emergency Eye and Skin Washes

Plum Advantage No. 1 - Instant Access Fast and Effective First Aid for Eye and Skin Injuries

In an Emergency Seconds Count; Plum is Ready

Ready to Use- Flexible, built-in eye cup holds eye open to ensure gentle and effective rinsing

Targeted Solutions for Your Workplace- Sterile Saline or pH Neutralizing Solution

- Stations can be mounted almost anywhere and are independent of a water supply. Bottles can be placed in toolboxes, first aid kits or vehicles.
- Belt bags let mobile workers be prepared at all times
- DUO Eye Wash bottles let you immediately and effectively treat both eyes at once

Sterile, Hygienic and FDA Registered- NDC number and expiration (3 years from date of manufacture) printed on every bottle

Plum Advantage No. 2 - pH Neutralizing Solution Eye Wash & Emergency Shower Wash Don't Just Dilute It, Neutralize It!

When acids or alkalis contact the eye or skin, damage can begin immediately. **Plum pH Neutralizing Eye and Skin Wash** contains a 4.9% sterile phosphate buffer solution. Stations can be mounted at the workplace or are ideal for primary first aid before further rinsing at a fixed emergency station.

Documented Effect

Strong acids and alkalis can penetrate the cornea in as little as 45 seconds. Rapid neutralization of the eye before cornea penetration is vitally important to reduce or prevent permanent injury. Results from an in vitro titration show that small amounts of pH neutralizing solution rapidly neutralize the eye while 0.9% Sodium Chloride merely dilutes the liquid with minor changes in pH value. When acids or alkalis dissolve acids or alkalis, pH Neutralizing solution bottles provide an approximate two minute rinse and can be followed with continued rinsing at a fixed station or with Plum 0.9% Saline. Always seek additional medical attention for any injury involving the eyes.

**Neutralization of
Strong Alkali and Strong Acid**
pH Neutralizing Solution VS NaCl 0.9%

Safety Pays - Why take unnecessary risks? Be sure your workplace has instant access to Plum pH Neutralizing Solution. Visit www.belart.com to learn more.

+ Emergency Eye and Skin Washes

DUO Eye Wash Bottles

Deliver Immediate First Aid to Both Eyes at the Same Time

Accidents can and do happen to both eyes at the same time. Now you don't have to choose which eye to rinse first. PLUM Duo Eye Wash Bottles and Stations increase workplace safety and are an ideal complement to fixed stations letting you optimize the location of first aid. You have the ability to treat both eyes immediately.

Each bottle releases two gentle, even streams of solution that flow from the inner eyes toward the outside to keep the corneas free from further contamination. A unique, built-in eye piece assists in keeping the eyes open during rinsing for maximum benefit. PLUM Duo Eye Wash Bottles are available in Sterile Saline and pH Neutralizing Wash to handle all accidents involving foreign debris and chemicals that may enter the eyes.

DUO Bottle Eye Wash Stations with Sterile Saline – 1000ml

Wall-mountable stations with one or two bottles of 1000ml Duo Sterile Saline Eye Wash offer flexibility to keep eye wash right where you are most likely to need it. Open station includes one bottle and a placard with easy-to-follow pictogram instructions and polished metal mirror. Covered station which is especially suited for production areas with high dust or dirt levels has pictogram instructions on the cover and a mirror on the inside. Bottles can be dispensed upright or inverted and feature quick twist caps for easy and immediate access to begin administering first aid. Rinse time is approximately 5 min/bottle. Mounting hardware included.

F24878-2032

DESCRIPTION

Two 1000ml (32oz) Bottles

Sterile Saline Eye Wash Solution Refill

Don't take chances with your eyes! Keep 1000ml (32 oz) of sterile eye wash solution handy for effective relief from eye irritants. In case of emergency, twist and snap off the sealed bottle top, tilt the head back, hold the eyelid open and pour the solution into the eye. The sterile irrigating solution is helpful in rinsing away chemical contaminants and other harmful irritants and is similar in pH value to that of human tears. Each individually packaged bottle is designed for one time use to ensure sterility. Keep them on hand as instant refills for your wall-mounted eye wash stations.

Draft Checker™ Air Flow Detection Powder

Ideal Fume Hood Accessory

A quick and easy way to test the safety of fume hood exhaust before use. Just a squeeze or two from the plastic bottle dispenses a cloud of ultra-fine, lightweight silica powder, which remains suspended long enough to visually check whether or not the fume hood exhaust is functioning properly. It is also useful for detecting drafts, gas leaks and air currents in rooms, ducts and exhaust systems. The amorphous silica powder is inert, non-toxic and non-flammable. 1.5 gm bottle.

Fire Blanket

Smother's Small Fires, Quickly!

Extinguishes small class "A", light oil and grease fires without the mess of foam or chemical agents. An excellent supplement to existing safety equipment, the Fire Blanket is packaged in an instant access container that can be hung on the wall or stored in any accessible location. It is made of woven fiberglass with a textured surface and all edges are serged with fireproof Kevlar® thread. The close weave greatly reduces the amount of atmospheric oxygen available to feed the fire. May also be wrapped around the head and body for protection against flames and embers when fleeing a burning room, or for protection from splashing molten metal.

Charcoal Disks

Efficiently Capture Volatile S-35 Radioactive Component During Labeling

Activated charcoal impregnated into each Disposable Charcoal Disk absorbs most of the volatile S-35 radioactive component before it can escape from the Petri dish during metabolic labeling.

The sterilized disk is placed inside the lid of the 100mm Petri dish used for labeling. After use, disks are disposed of in regular beta waste containers. For a dynamic duo combine the Charcoal Disks with Charcoal Cartridges, F24989 (below), which are placed on the incubator shelves to trap the volatile S-35 radioactive component that may have escaped from Petri dishes equipped with Charcoal Disks. **50 per box.**

Disposable Charcoal Cartridge

Safely Absorb the Volatile S-35 Radioactive Component During Labeling

These disposable, activated charcoal cartridges efficiently absorb S-35 radioactive component released from S-35 labeled amino acids. Capturing the released radioactivity lessens the chance of breathing the volatile component and reduces contamination of the incubator and the water in the humidity pan. Place cartridges on the incubator shelf and, after use, dispose in regular beta waste containers. Cartridges are sealed with a highly porous durable membrane. For increased safety, combine with Sterile Activated Charcoal Disks F13557 (above), which fit directly inside the lid of a 100mm Petri dish, to trap the S-35 volatile radioactive component within the Petri dish. **3 per bag.**

Touch Free™ Automatic Waste Cans

Automatically Opens and Closes, without a Touch!

Easy and Sanitary Waste Disposal!

D A C B

1. Wave your hand over the sensor on the front of the waste can lid.
2. When the lid automatically opens, dispose of your waste, and the lid automatically closes.

It's That Simple!

The Touch Free™ Automatic Waste Can's motion-sensitive lid opens automatically to accept waste, and then closes into a fitted well that helps to reduce odor and airborne contamination. Durable and dependable, it can be used with autoclavable biohazard disposal bags or commercially available trash bags. Requires four (4) D-batteries (not included) that will provide approximately 4,000 openings. An on-off switch deactivates the auto-open/close function.

Each unit is supplied with a preprinted, brightly-colored Biohazard label, 2 others for Recyclables and Trash, and a Blank label for individualized applications.

Available in three slim, modern designs:

A. F13202-0010 - White 2.5 gallon can is perfect for bench-top use and includes a removable rigid liner that won't leak or rust. Body and lid are molded of easy-to-clean ABS plastic, and the removable pail is molded of autoclavable polypropylene. Line with Scienceware® 14 x 19" biohazard disposal bags (see bags section, pages 8-10) or suitable size standard trash bags.

B. F13202-0020, Gray and C. F13202-0022 - Red 7.3 gallon cans have a molded polypropylene pail and gray ABS plastic top. Line with Scienceware® bag liners or biohazard disposal bags measuring 24 x 30, 24 x 36 or 25 x 35" (see bags section, pages 7-10) or suitable size standard trash bags.

D. F13202-0030 - 12 gallon can has a **Gray** body and black ABS plastic lid. The removable pail is made from **Stainless Steel**. Line with Scienceware® bag liners or biohazard disposal bags measuring 24 x 30, 24 x 36 or 25 x 35" or suitable size standard trash bags. (See Bag Section Pages 7-10)

Disposal Cartons for Glass

Safe Disposal for Lab Glassware

Sturdy corrugated cardboard receptacle is supplied with a 2 mil thick, clear polyethylene bag to contain broken glass fragments and spilled liquids. When the box is full, lift the flap opening to a closed position and the entire unit is ready for disposal. Printed with eye-catching graphics in four languages (English, German, French, Spanish), it is packaged flat to save space and shipping costs and is quickly assembled. Available in two sizes. The floor model holds 18kg (40lb) of waste. The benchtop model holds 5.5kg (12lb). See F13204-0001 (below) for sanitary, reusable cover for floor model. Does not qualify as a DOT container.

6 per pack, 10 packs per case.

CATALOG NO.	MODEL	DIMENSIONS (L x W x H)	SHIPPING WEIGHT

Cover for Glass Disposal Carton

Opens with a Simple Touch; Sanitary, Reusable

Dishwasher-safe and autoclave-safe, the reusable Disposal Carton Cover opens quickly and easily by pressing the built-in release tab - no batteries required! The cover fits any disposal carton with a 30.4 x 30.4cm (12 x 12") opening including

F24653-0001 Glass Disposal Floor Standing Carton (information above) and features a smooth 10.1 x 10.1cm (4 x 4") area for applying labels. The center panel is green to match the printing on the glass disposal cartons providing fast visual recognition of the waste stream. Compared to the disposable cardboard lids supplied with the cartons, the Disposal Carton Cover provides a wider opening 20.3 x 24.1cm (8" x 9½") permitting safer and more sanitary deposit of wastes into the container. Store the disposable cardboard lid under the bottom of the carton and, when carton is full, simply remove the reusable Disposal Carton Cover, replace with the cardboard lid, and dispose of the carton in the usual fashion. Wash the Disposal Carton Cover as needed, and it's ready for reuse. Autoclavable at 121°C (250°F). **Per each, 8 per case.**

Collect, Store and Transport Samples

Sterileware® Samplit™ Scoop and Container System

Self-Contained Sampling System

U.S. Patents 6,440,373; D438,979

This collection device incorporates a sturdy sampling scoop that threads into a dedicated leakproof 190ml (6.5oz) container ensuring safe and efficient isolation of material. The rigid scoop is made of white, high-impact polystyrene strong enough for coring semi-solids such as cheese, ice cream and even soil or granular materials. A ribbed handle provides an excellent grip for pushing and turning the scoop. The depth and shape of the scoop keeps samples contained while allowing for easy dispensing into the clear styrene container. Supplied with labels for sample identification. F19856-0250 page 262 can be used to store and transport Samplit™ containers.

Sterileware® Scoop Sampling System*With Convenient Snap-On Lid*

Eliminates the cost of separate sterile bags or containers, saving you time and money in your sample collection process. These high-impact polystyrene scoops with detachable lids have a longer handle that increases the distance between the hand and sample to reduce contamination potential. When placed on a flat surface they remain upright and can be used as weighing boats. To use, simply remove the scoop from the bag and detach the lid using the convenient tab. After taking the sample, replace the snap-on lid and use the scoop as a container for transport. A lock-tab on the lid can be bent under for a tighter seal. Sampling data can be marked on the lid with wax pencil, pre-marked label or labeling tape to facilitate tracking. Radiation sterilized and packed ready for one time use and disposal.

Box of 10 or 100, individually sterile wrapped scoops with lids.

NEW PRODUCT!

Micro Spoon and Spatula Weighing Set

Accurate Handling of Minute Quantities

This kit includes six different small size double-ended tools and tweezers. Each tool has two different end shapes, doubling the selection of implements to better match user needs. Tool ends include 2 small spoons for transferring and collecting both dry and liquid material. There are also 8 flat spatulas of various widths and lengths ideal for mixing, scraping and spreading. Six of these have a square end and two are rounded. Two V-shaped spatulas of different sizes can be used for lifting or spill-free carrying of material. The blunt tip tweezers have serrated inside surfaces for secure sample handling and grooved handles for better gripping.

All tools are polished stainless steel for long life and easy cleaning and can be steam autoclaved at 121°C (250°F). A carrying case protects and organizes all tools when not in use.

Stainless Steel Mortar (Bowl only, no handle)

Mini-Sieve™ Micro Sieve Set

For Handheld Use in Lab or Field

This micro sieve set consists of a stack of four interchangeable screen holding sections, a catch pan, a cover and four screen retaining rings. All parts are molded of polypropylene. Sections are friction-fit and easy to assemble and take apart for sample retrieval. Sorting parameters can be changed by exchanging the removable phosphor-bronze mesh inserts, (eight included, one each:

25, 35, 45, 60, 80, 120, 170 and 230 standard mesh). Each holding section is 56 mm (2¼") I.D. x 41 mm (1½") high, and holds about 60 cc. Dimensions of the assembled set with pan and cover are 21.6cm (8½") high x 7.2cm (2½") maximum diameter.

Additional Mesh Inserts: Pack of 8 Phosphor-Bronze screen inserts, 1 each of 710, 500, 355, 250, 180, 125, 90, and 63 standard mesh.

Tapered Plug Sampler

Punctures Packaging to Retrieve Samples

A smooth, tapered, stainless sampler for extracting a "plug" of material from bags or blocks of cheese, grease, soap, clay, etc. The sharp end of the satin finish sampler will cut through a bag or box. Twisting the handle one-half turn will cut out a plug of material 15.2cm (6") long tapering from 1.7cm ($\frac{1}{8}$ ") to 1.3cm ($\frac{1}{2}$ "). Overall length is 19.1cm (7½"). 7cm (2¾") "T" handle.

CATALOG NO.

H37826-0000

Needlepoint Sampler

Minimize Damage When Taking Samples from Bags

Especially useful for single samples from polyethylene or paper bags, the needle point sampler punctures the bag with minimum damage, enters a maximum of 28cm (11") deep, and is pulled out with sample ready to be poured out of the hollow handle. Made of chrome-plated brass with a screw-on anodized aluminum handle. Overall length: 41cm (16"). Diameter: 2.2cm ($\frac{7}{8}$ ").

CATALOG NO.

H37831-0000

Three Zone Powder Sampler

Extract Samples at 3 Levels from One Container

For proper sampling of powders, pellets and other friable materials which may become non-homogeneous in bags, this three zone sampler is invaluable. Made of 1.9cm ($\frac{3}{4}$ ") diameter anodized aluminum with a sharp stainless steel point; it is 56cm (22") long and has three ports 7.6cm (3") apart. The ports are 7.6cm (3") long x 1cm (0.39") wide with a volume of 9cc. The distance from the point to the first port is 4.3cm (1¾"). The "T" handle is turned to close the sample cells, and the steel point is inserted through the bag wall. When the sampler is in deep enough to cover the three cells, a half turn of the handle allows samples to enter. The handle is then returned to the original position. The sampler is removed and the three samples transferred into containers for analysis.

Micro-Mill® Grinders

With Interchangeable Grinding Chambers

For rapid, high-speed grinding of small samples from 20 to 50cc. Stainless steel or hard-faced blade rotates at speeds up to 12,000 rpm to successfully grind bauxite, bone, ceramics, coal, Devorda's alloy, fertilizer, filter paper, fly ash, frozen tissue, glass, grain, kaolinites, leaves, limestone, pharmaceuticals, pigment blends, plastics, rocks, roots, shale, seeds, slags, soil, teeth, wood, etc. To provide safety and prevent sample loss, the grinder operates only when the cover is latched in place.

Temperature is maintained by means of built-in heat exchangers, and the control panel has an overload protection reset button and a pilot light. Tubing connections 6.4mm (¼") on the cover and housing accept tubes for circulating water or slurry. Cover, grinding assembly and milling blade head are removable for cleaning.

The stainless steel chamber is 54mm diam x 25mm deep (2 1/8 x 1") inside an aluminum housing with an epoxy finish and non-skid rubber feet.

The 1/8 horsepower (150 Watts) motor develops a torque of 2.2 kg-cm (30 oz-inches) at 12,000 rpm. Supplied with a 1.8M (6ft) 3-wire cord and grounded plug. Overall dimensions are 14 x 18 x 28cm high (5 1/2 x 7 x 11"). Shipping weight. 6.4 kg (14lbs).

Three models available:

MICRO-MILL® GRINDER with stainless steel blade and grinding chamber, and momentary hold-down switch. Operates only when switch is held down.

CATALOG NO.	DESCRIPTION
H37250-0000	115VAC, 60 Hz

MICRO-MILL® GRINDER with stainless steel blade and grinding chamber. 0-5 minute timer with "ON" position for continuous operation.

NEW PRODUCT!

Micro-Mill® II Grinder

The Micro-Mill® II Grinder (photo A) is ideal for rapid, high speed milling of small samples from 20 to 50ml. The 1/8 horsepower (150 Watt) motor drives a stainless steel blade that quickly pulverizes bauxite, bone, ceramics, coal, Devorda's alloy, fertilizer, filter paper, fly ash, frozen tissue, glass, grain, kaolinites, leaves, limestone, frozen tissue, pharmaceuticals, pigment blends, rocks, roots, shale, seeds, slags, soil, teeth, wood, and more! This motor is designed to provide continuous high torque to maintain blade velocity for fastest sample pulverizing.

The two-position rocker switch allows either pulse or continuous operation to match with sample requirements. The rocker switch includes a light that illuminates when the unit is properly assembled and ready for use.

Additional safety features include a built-in switch that prevents grinder operation unless all parts are completely assembled to the base and a resettable circuit breaker that protects the mill if the sample jams the blade. Non-skid feet prevent movement of the mill during use and won't mar benchtops.

The grinding chamber assembly is removable to allow complete sample recovery and cleaning. An additional accessory grinding chamber (photo B) can be used to reduce cross contamination between dissimilar samples. The accessory chamber includes upper and lower grinding chamber sections with blade and is ready for immediate assembly to the Micro-Mill® II Grinder. For users pulverizing very hard material, a stellite faced hard blade (photo C) is available (H37258-0000).

Softer samples or temperature-sensitive samples, such as frozen tissue, leaves, roots, seeds and wood can be processed by adding dry ice to the grinding chamber during processing.

Supplied with a 1.8M (6 ft) 3-wire grounded cord. Overall dimensions are 30.5 x 26 x 15.9 cm high (12" x 10 1/4" x 6 1/4"). Shipping weight: 2.72 kg (6 lbs).

Churn Sample Splitters*Mix and Divide a Water Sample into Subsamples for Testing*

Provides an efficient method of preparing subsamples of collected water-sediment mixtures from stream flows for water quality analysis. Water sediment samples are poured into the sample splitter where they are composited into one representative cross section sample of the stream flow. This composite can now be split into the required four to sixteen representative subsamples.

The polyethylene sample splitter consists of a thick walled cylindrical vessel with a disc churn. A center handle extends through the cover and a locating notch keeps it oriented in one direction. A small polypropylene spring-loaded spigot drains the subsamples into bottles for delivery to the water quality laboratory. A carrying handle makes carrying the full or empty vessel easy. Lid and spigot are replaceable.

SIPHONS AND PUMPS

SHOP www.belart.com

Poly-Hand Pumps

- All polyethylene construction for chemical resistance
- Fits all standard drum bungs or carboys
- Ergonomic handle

The Poly-Hand pump threads directly to a standard drum bung or carboy. It is constructed entirely of rugged polyethylene and is inert to strong acids, alkalis and many solvents. Sizes are available to fit 114L and 220L (30/50gal) plastic or steel drums and 20L (5gal) carboy (F10795-0000). The pump delivers by positive pressure on the downstroke of the piston and does not pressurize the vessel. Its ergonomic 'T' handle fits comfortably in a gloved hand. The pump will efficiently deliver against a 3.65m (12ft) head of water and empty a drum or carboy to within 3 mm ($\frac{1}{8}$ ") of the bottom.

CATALOG NO.	DESCRIPTION
H32787-0000	20 L (5 gal.) Carboy Pump (Fits Carboy F10795-0000)
H32886-0000	114 L (30 gal.) Drum Pump
H32887-0000	208 L (55 gal.) Drum Pump

Syphonette

The Syphonette is made from polypropylene and polyethylene and is particularly well-suited to withdrawing liquids from narrow necked containers with a minimum opening of 19mm ($\frac{3}{4}$ "). The inlet tube, made of rigid polypropylene, is 66cm (26") long but may be permanently shortened by cutting. Operated by squeezing the flexible bulb, the self-priming mechanism starts flow through the flexible PVC outlet tube. Flow will continue as long as the end of the outlet tube is kept lower than the source liquid. The Syphonette will also elevate fluids to higher levels if pumping is continued. Special adapters for cans, tanks, and bottles are available on special order.

MAGNETIC STIRRING BAR SELECTION & USE

Magnetic stirring is used in a number of common laboratory procedures, yet the importance of selecting the best stirring bar for each particular application is often overlooked. The drive magnet, vessel shape, viscosity and abrasiveness of the materials should all be considered when choosing the size, shape and materials (coating and magnet) of the magnetic stirring bar in order to achieve effective, efficient stirring results.

First, let's discuss magnetism. On the most basic level, we know that opposite poles attract. A magnetic stirrer has a drive magnet, generally a bar or U-shape made of a metallic alloy or a ceramic which rotates powered by a drive motor. The magnetic poles of the drive magnet are typically about two inches apart in bench top models, and can be up to six inches apart in larger units used to mix 50 gallons of liquid solution. For optimum magnetic coupling, the distance between the magnetic poles of the drive magnet and the length of the stirring bar should be equal. Bars too long or too short in proportion to the drive magnet will not have optimum coupling which is important to reduce spinout.

Once a magnetic stirring bar has been placed in a container with solution, it should be positioned directly over the center of the drive magnet. The stirring speed should be increased slowly, until the desired vortex pattern is achieved. Should the magnetic stirring bar lose its coupling with the drive magnet because of the speed of the drive magnet, viscosity of the fluid, or an improperly selected stirring bar length, it is said to have "spun-out."

Vertical distance between the drive magnet and the stirring bar should be kept to a minimum for the best coupling and stirring efficiency. Therefore, the containing vessel should be as thin as practical.

The selection of the shape of the magnetic stirring bar also influences the resulting vortex in that multi-sided shapes may be more efficient in moving solutions and certain shapes have been designed to provide a tailored fit in specialty vessels such as test tubes, cuvettes and spectrophotometer cells.

Magnetic stirring bars are generally made of ALNICO (an alloy of aluminum, nickel, iron and cobalt) magnets encapsulated in an FDA approved PTFE coating. In addition, magnetic stirring bars also use high energy magnetic materials, such as Samarium Cobalt (page 377) which increases strength of coupling with a drive magnet and helps to reduce spinout when mixing viscous solutions or mixing at high speeds.

Newer to the market, are Bel-Art Products Spinfinity® magnetic stirring bars, page 374. Spinfinity® magnetic stirring bars use ALNICO magnets encapsulated in plastic for increased durability in granular slurries.

	FDA grade Teflon® PTFE low friction coating is durable and inert	Glass casing has zero absorption and porosity	FDA Grade Teflon® PTFE low friction coating is durable and inert	Outer shell made from FDA approved materials
	Color selection for color-coding work processes		Distinct Color - Green color lets you quickly identify Spinbar® Rare Earth Samrium Cobalt	Distinct Color - Quickly identify the Spinfinity® difference by its purple color

All Spinbar® and other Teflon® PTFE Coated Magnetic Stirring Bars are Manufactured in a Registered ISO 9001:2008, as Verified by SGS Certification.

Spinbar® Magnetic Stirring Bar Shapes and Performance

Whether mixing is needed in a 10mm cuvette, a 1.5ml vial, a beaker, or a 50 gallon drum, there is a Spinbar® magnetic stirring bar that can do the job. Bel-Art Products offers the most comprehensive selection of magnetic stirring bars on the planet.

Capsule magnetic stirring bar has a polygon magnetic stir bar that spins freely inside a protective capsule. The capsule assures the bar does not spin off center and reduces turbulence and obstructions to ensure consistent smooth stirring. Page 385.

Cell magnetic stirring bars are designed specifically for use with spectrophotometer cells, cuvettes or test tubes. The cell stirrer fits into standard 10mm spectral cells and provides rapid vertical and horizontal mixing with a minimum of vortexing when placed on a magnetic stirring machine. Centrifugal pumping action, generated by the cross channels in the upper face, mixes without aeration. Page 388.

STIRRING

SHOP www.belart.com

Circulus™ magnetic stirring bars provide strong turbulence at relatively low speeds, offer reduced surface contact and have excellent centering characteristics, particularly in vessels with convex bottoms. Page 383.

Cylindrical magnetic stirring bars offer excellent centering and smooth running characteristics. A small removable pivot ring in the center adds to their versatility. The pivot ring minimizes the contact area of the bar to the vessel, reduces friction and lessens marring of plastic containers. Page 378.

Elliptical (Egg Shaped) magnetic stirring bars are particularly well suited for round bottom flasks. Their shape mimics that of a flask and ensures complete mixing. They also offer minimal contact when used in plastic containers. Page 381.

Fluted Octagonal—Rare Earth magnet: The flutes of this eight-sided bar along with a definitive tapering to conical ends provides excellent surface area and recessed breaks in the profile to generate strong turbulence and efficiently move fluids. Available only in Rare Earth (Samarium Cobalt), the shape and magnet strength make these bars especially well-suited for viscous solutions. Page 377.

Micro (Flea) magnetic stirring bars are designed for stirring small volumes in vessels such as vials, tubes and gradient makers. Available in a variety of colors and sizes, micro (flea) stirring bars are particularly useful for environmental testing and life science applications in which small sample volumes need to be prepared and evaluated. Page 384-385.

Octagon magnetic stirring bars with integral pivot ring are the most commonly used shape. Their interrupted profile provides greater surface area and added turbulence when compared to the smooth surface of cylindrical bars. Pivot ring aids in reducing friction and chattering. Page 375-376.

Octagon – Spinfinity®: The octagonal shape was also selected for the Spinfinity® line. Spinfinity® magnetic stirring bars have a hard plastic casing that gives them superior durability in granular slurries. Quickly identify Spinfinity® magnetic stirring bars by their bright purple coating. See page 374.

Octagon – Rare Earth magnet: The superior magnetic energy of Rare Earth (Samarium Cobalt) magnets provides strong coupling with drive magnets reducing frequency of spinout in viscous solutions or high speed stirring. The bright green Teflon® PTFE coating makes them easy to identify in the laboratory. See page 377.

Polygon/Giant Polygon multifaceted surfaces add turbulence relative to similar smooth size cylindrical bars. Giant Polygon bars can be used for stirring substantial volumes in large vessels such as drums and tanks. Available with or without a molded pivot ring, this ring minimizes the contact area between the bar and the vessel, thus reducing friction and chattering. Page 378-380.

Pyrex® Spinbar® Glass Stirring Bars are completely encapsulated in Pyrex® glass. Glass stirring bars are useful for high temperature applications in excess of 225°C (437°F) where Teflon® PTFE is not stable. Glass bars also offer “zero absorption” of the stirred solution. Page 377.

Round magnetic stirring bars with tapered ends have a naturally centered pivot point, eliminating the need for a separate pivot ring. Smooth surface and the slightly raised ends on these bars facilitate efficient movement through solutions. Page 376.

Saturn Spinbar® Magnetic Stirring Bars easily stir powders into solutions without getting stalled. A prominent sphere in the middle of the bar elevates the stirring bar arms during rotation and consequently diminishes the surface contact area, permitting the magnet to spin freely without stalling. For use in round or flat bottom vessels. Page 383.

Spinfin® magnetic stirring bars can be used in round bottom flasks as well as rounded vessels such as test tubes or cylinders. Page 386.

Spinplus® magnetic stirring bars add speed and efficiency to mixing operations. The “+” shape creates a deep vortex and provides stable, quiet operation. Page 382.

Spinring® stirring bars provide maximum stabilization of the magnetic stirring bar with the addition of a “hoop” around a standard octagonal bar. The friction fit of the “hoop” and bar allows them to spin as a unit. By presenting a greater surface area and wider profile, “spin out” is virtually eliminated. This particular arrangement is best suited for larger open-neck vessels, such as buckets and beakers. Page 382.

Spinstar® magnetic stirring bars create a deep mixing vortex at relatively slow speeds. Designed to fit the inside diameter of most commonly-used beakers, the Spinstar® stirring bar is perfect for applications requiring slow, thorough mixing. Page 382.

Spinvane® magnetic stirring bars are designed for test tubes, micro vials and conical bottom centrifuge tubes. Each style is manufactured for a specific size tube, but can be modified if needed without affecting the magnet. Page 387.

Spinwedge® magnetic stirring bars provide strong turbulence at fairly low speeds and are well suited for churning sediment or dissolving salts. Page 381.

NEW PRODUCT!

Spinfinity® Octagon Magnetic Stirring Bar

The Next Revolution in Magnetic Stirring Durability

Those mixing granular slurries know that magnetic stirring bars can and do often wear down quicker than preferred. Manufactured with different processes and materials, new Spinfinity® magnetic stirring bars have a hard plastic covering that delivers 2.5 to 3 times the wear resistance of PTFE coated magnetic stirring bars under conditions known to cause material breakdown.

The Spinfinity® magnetic stirring bars are an octagon shape with a molded-in pivot ring. This shape provides greater surface area than a round bar of similar size and an interrupted profile which provides added turbulence for efficient stirring. The rotating ring reduces friction and chattering. In the laboratory, it can quickly be identified from other magnetic stirring bars by their distinctive purple coating.

3 x 1/2" (76.2 x 12.7 mm)

Durability Testing

Spinfinity® vs. PTFE Coated Magnetic Stirring Bars

Spinfinity® and PTFE coated magnetic stirring bars were used under conditions known to cause material breakdown and measured for volume loss each hour for a period of four hours.

PTFE coated magnetic stirring bars lost on average, 2.85 times more volume than Spinfinity® magnetic stirring bars.

Fluted Octagonal Rare Earth Spinbar® Magnetic Stirring Bar

Improved Stirring Efficiency

This bar's high-energy magnetic material combined with a fluted octagonal shape produces exceptional power, although its length is only 50mm (1.969") with a 21mm (0.83") diameter.

The Samarium Cobalt magnet which is encapsulated in Teflon® PTFE provides strong coupling with drive magnets making it ideal for viscous solutions and efficient, high speed stirring. The recessed flutes and distinct edges of this eight-sided bar provide excellent surface area to generate strong turbulence so liquids are thoroughly mixed, and its stability is not impaired in vessels with curved bottoms. **Per each, 10 per case.**

CATALOG NO.

SIZE

F37174-0000

2 x 3/16" (50mm x 21mm)

Octagon Rare Earth Spinbar® Magnetic Stirring Bars

The Samarium Cobalt magnet which is coated in Teflon® PTFE provides strong coupling with drive magnets to reduce frequency of spinout. Use for viscous solutions, high speed stirring and extended stirring applications. Popular octagon shape with pivot ring creates strong turbulence with minimal chattering and friction. Distinctive green color makes Spinbar® rare earth magnetic stirring bars easy to identify in the lab. **Per each, 10 per case.**

Elliptical (Egg-Shaped) Spinbar® Magnetic Stirring Bars

"Eggcellent" for Round Bottom Flasks

These egg-shaped stirring bars provide their own pivot point without a separate ring or abrupt change in contour. Designed especially for use in round-bottom vessels, they spin unrestricted by the vessel contour. The magnet itself is egg-shaped with a Teflon® PTFE coating, except the three smallest sizes have a cylindrical magnet in an egg-shaped Teflon® PTFE coating.

Per each, 50 per case.

NEW PRODUCT!

Saturn Spinbar® Magnetic Stirring Bar

Many magnetic stirring bars can be impeded by powders in a liquid, but the newly-designed Saturn Spinbar® Magnetic Stirring Bar rises to this stirring challenge. A large sphere at the bar's center lifts the stirring bar ends while spinning and thereby reduces the surface contact area to allow the bar to spin with decreased drag.

The stirring bar is available with a length of 40mm or 50mm (1.5" or 2") to match with a wide variety of vessels with both round and flat bottoms. Saturn Spinbar® Magnetic Stirring Bars are Teflon® PTFE coated. Bars are autoclavable at 121°C (250°F). **Per each, 20 per case.**

NEW PRODUCT!

Spinbar® Capsule Magnetic Stirring Bar

Spinout Protection; Patent Pending

The Capsule Magnetic Stirring Bar is a polystyrene capsule containing a 30 x 8mm (1.18 x 0.31") polygon magnetic stirring bar that spins freely inside the capsule while being prevented from spinning off center and 'wandering' on the base of a vessel. Containment of the stirring bar prevents it from impacting and damaging expensive pH probes during pH adjustments and from interfering and damaging gels during staining/destaining procedures. The large, flat capsule keeps the stirring bar consistently centered on the bottom of vertical electrophoresis units (e.g. Hoefer's) to efficiently mix the running buffer. Use of the capsule also prevents the stirring bar from being impeded by chemicals which, in water, transform into a sticky gel (e.g. albumin) and enables efficient dissolving. After use, the capsule can be easily disassembled for cleaning. **Per each.**

Cell (Cuvette) Spinbar® Magnetic Stirring Bar

Specifically for Spectrophotometer Cells or Cuvettes

This stirring bar fits into the standard 10mm light path cuvette and provides rapid vertical and horizontal mixing with a minimum of vortexing when placed on a magnetic stirring machine. Centrifugal pumping action, generated by the cross channels in the upper face, mixes without aeration. Photometric measurements can proceed uninterrupted while reagents are added. This one-piece molded unit will not scratch cuvettes. May also be used in test tubes. **Per each, 50 per case.**

Vakuwash® Cuvette Washer

All-Plastic Cuvette Washing Device

Economical, durable and gentle on delicate glass or quartz cuvettes, this all-plastic washer replaces costly, antiquated devices that are often more fragile than the cuvettes they wash. Comes complete with a 500cc polypropylene vacuum flask, Vikem® vinyl stopper and 3' PVC tubing ready for connection to a vacuum line. The mouth of an inverted cuvette is pressed against the rubber cushion to induce suction. Water or other cleaning fluid poured into the 89mm (3½") diameter funnel is forcibly sprayed into the cuvette and then drains into the flask. Continued pressure on the cuvette creates an air flow which dries it. A final wash in acetone aids in removing water droplets. Minimum cuvette I.D must be 3mm or larger to fit over the spray nozzle.

Spinpak® Magnetic Stirring Bar Assortment with Restrainer

Large to Small Volumes, the Spinpak® Assortment has You Covered.

A 10-pack of the most commonly used Spinbar® Octagonal Magnetic Stirring Bars in a variety of colors and sizes.

Eight-sided Spinbar® Octagonal Magnetic Stirring Bars provide greater surface area and added turbulence when compared to smooth cylindrical bars. Integral pivot ring on each stirring bar aids in reducing friction and chattering.

Included Spinbar® Restrainer fits comfortably in one hand and retains Spinbar® Magnetic Stirring Bars up to 80mm (3") long by holding them against vessel walls. Eliminates splashing hazards when pouring.

Spinbar® sizes: 2 each - $\frac{1}{2} \times \frac{1}{8}$ ", $\frac{1}{2} \times \frac{5}{16}$ ", $1 \times \frac{5}{16}$ ", $1\frac{1}{2} \times \frac{5}{16}$ ", $2 \times \frac{5}{16}$ ".

NEW PRODUCT!

Spinbar® Magnetic Stirring Bar Garage*Convenient Parking; Prevents Demagnetization*

Keep all your magnetic stirring bars and accessories organized and accessible with the Spinbar® Magnetic Stirring Bar Garage. Multiple sizes and shapes of magnetic stirring bars from large 15.9 cm (6") to tiny 10 mm (0.5") bars can be stored on this rack.

Stirring bars are easily demagnetized when stored together in a box or drawer. The best way to store them is in pairs, with the north pole of one adjoining the south pole of the other. Tight wire spacing on the upper section of the rack holds small bars, while wider spacing below can be used for larger bars. A lower wire shelf is ideal for holding small lab tools including your Spinbar® Restrainer (F37790-0000 page 392).

Epoxy coated for long life and easy cleaning, the rack is freestanding or can be mounted to a vertical surface (mounting hardware not included). Use one rack to dry stirring bars after cleaning, and place others near associated stirrers to keep bars organized and visible.

NEW PRODUCT!

Spinbar® Restrainer

Hold on to Magnetic Stirring Bars

The Restrainer fits ergonomically in one hand, and when placed alongside the outer wall of a mixing vessel it retains and secures the stirring bar in situ. After the vessel is drained, the confined stirring bar is securely retrieved from the vacant container without contaminating the solution. It houses a strong magnet that restrains magnetic stirring bars up to 80mm (3") long.

NEW PRODUCT!

Spinbar® Magnetic Sink Strainer

US Patent 7,900,289 B2

Spinbar® Magnetic Sink Strainer is a simple solution to prevent your Spinbar® Magnetic Stirring Bars from going down the sink drain. The flexible, chemical-resistant sink strainer has four strong magnets in each corner that attract and hold Spinbar® Magnetic Stirring Bars, while the long slits in the sides and skirt allow fluids to drain easily and rapidly. A wide skirt allows the Spinbar® Magnetic Sink Strainer to be used in a variety of sink drains, and a straight edge on one side allows it to be placed near the sink wall. Four legs on the underside of the Spinbar® Magnetic Sink Strainer anchor the strainer in the sink drain and prevent it from being dislodged by flowing liquid. Available in blue or green. **Per each, 12 per case.**

Jumbo Magnetic Spinbar® Retriever

Retrieve Large Stirring Bars from Deep Vessels

This flexible PTFE magnetic retriever will remove the largest magnetic stirring bars from deep vessels. Retriever has an easy grip "T" handle with an overall length of 65cm (26") including the powerful Alnico 5 magnetic end which is 10.2 x 1cm diameter (4 x 3/8"). Longer, custom lengths are available.

CATALOG NO.

F37781-0000

Magnetic Stirring Bar Retriever

Keep Contents Free of Contamination When Removing Magnetic Stirring Bars

This retriever is able to remove a magnetic stirring bar without coming into contact with the contents of the vessel. It eliminates contamination of contents and does not need to be cleaned or autoclaved after use. The retriever is held in contact with the vessel where the magnetic stirring bar rests. It is then moved upward with the stirring bar following the inside of the vessel to a point where it can be grasped. The magnet is located in the 25 x 70mm (1 x 2 3/4") rectangular section, and a long ribbed handle provides a secure grip. Made of high density polyethylene. Overall length: 20cm (7.7").

CATALOG NO.

Battery Powered Magnetic Stirrer

Portable, Lightweight Stirring Power

Ideal for field use, inside incubators or anywhere else electricity is not convenient or simply not available. The Battery Powered Magnetic Stirrer has a speed control knob for operation up to 900 RPM and can mix up to 1 liter, using stirring bars up to 2.54cm (1") in length. Two "D" batteries provide approximately 16 days of continuous operation. Constructed of polypropylene for durability and chemical resistance in a compact 23.5 x 13.2 x 8.9cmH (9¼ x 5½ x 3½") size that makes travel easy.

CATALOG NO.

H37017-0000

Air Operated Turbine Magnetic Stirrer

Low Pressure Air Supply Drives the Magnetic Stirrer

- Eliminates sparking hazard from electrical sources
- Ideal for use where potentially explosive solvent vapors are present

This compact, small-footprint stirrer only uses 3 to 8 psi (21-55kPa) air pressure and is ideal for stirring vessels up to 1 liter. Tubing is supplied to connect to an air supply. All parts are made from high impact polystyrene to ensure long life and easy clean-up in case of spills. Can be used with magnetic stirring bars up to 2.5cm (1") in length.

REDESIGNED!

Cool Stir® Large Volume Magnetic Stirrer

Large Volume Stirring for Tanks and Drums

- Direct drive motor rotates a powerful rare earth magnet that couples optimally with 3" through 6" stirring bars (F37122 series and F37118 series - page 380, not included)
- Efficiently stirs fluid volumes from 10 liters up to 208 liters (2.5 to 55 gallons)
- Features polypropylene sides that are simple to clean

A rugged built-in aluminum support system and durable polypropylene platform are engineered to carry up to 220kg (485lbs) permitting mixing in a regular plastic barrel or drum. Stirring speed is continuously changeable to around 600 rpm (maximum operational rpm depends on volume and density) delivering torque for mixing through powerful agitation with a deep vortex. The unit and its 100 watt (1/8 horsepower) motor are air cooled, and heat transmission to thermolabile solutions is prevented by the use of insulation.

DC motor: 100 watts, 50/60 Hz, 3-wire grounded cord

Net weight: 15 kg (33lbs.). Shipping weight: 17.3 kg (38lbs.) This item ships oversize.

Spindrive® Orbital Shaker Platform

Shake and Mix; Rotating Orbit Diameter of 21.7mm

U.S. Patent 5,409,312

Turns a standard magnetic stirrer into an orbital shaking platform saving the expense and space requirements of additional lab equipment. Perfect for dishes, flasks, and trays, it is also ideal for Western Blot processing. Shaker adjustment is controlled by setting the magnetic stirrer to the

desired speed. Platform protects the operating mechanism from spills and has a non-skid surface to prevent containers from sliding. The base incorporates built-in hand holds for lifting and carrying. Supports up to 6.8 kg (15 lb) and has a rotating orbit diameter of 21.7mm ($\frac{7}{8}$ ").

Spindrive® Orbital Vibrating Platform

Vibrate and Mix; Rotating Orbit Diameter of 1.52mm

U.S. Patent 5,409,312

Save the expense and eliminate the space requirements of another piece of lab equipment. Placed and centered on a magnetic stirrer, this platform operates as an orbital vibrator for plates, flasks or other vessels. Vibration adjustment is controlled by setting the magnetic stirrer to the desired speed. Platform protects the operating mechanism from spills and has a non-skid surface to prevent containers from sliding. The base incorporates built-in hand holds for lifting and carrying. Supports up to 6.8 kg (15 lb) and has a rotating orbit diameter of 1.52mm ($\frac{1}{16}$ ").

Microwave Stirrer

Heat and Magnetically Stir Inside a Microwave Oven

U.S. Patent 6,076,957

Converts the motion from the turntable impeller inside a microwave oven into a magnetic stirrer allowing simultaneous heating and stirring for increased efficiency. Heated stirring can improve dissolving and mixing, and permits preparation of super-saturated solutions. Ideal for melting agar and agarose, concentrating urea solutions, or other applications that benefit from heated stirring, and for chemical purification. Adjustable pins make stirrer compatible with most microwave drive spindles. Can be used with magnetic stirring bars up to 5cm (2") in length.

Safe-Lab™ Stoppers

"Easy-on, Easy-off" Safe-Lab™ Stoppers Save Time and Prevent Accidents with Standard Tapered Glassware

How Safe-Lab™ Stoppers Work

Safe-Lab™ Stoppers feature an exclusive, patented safety device for easy and simple separation of fused glassware. This innovative extracting mechanism minimizes expensive glassware breakage and potential bodily injuries when separating glassware with frozen ground joints.

No More...

- Tapping glassware against a bench top
- Running glassware under warm water to loosen
- Risking injury with dangerous removal techniques

Safe-Lab™ stoppers are easily removed from standard tapered glassware by turning the red extraction nut to apply a safe, gentle and even force against the mouth of the vessel, helping to eliminate accidents and breakage.

Safe-Lab™ Teflon® PTFE Stoppers

Use with Separatory Funnels and Volumetric Flasks

Solid Teflon® PTFE stopper with threaded polypropylene extracting nut for easy removal of stopper from flask. Interchangeable with penny head stoppers. Autoclave safe at 121°C (250°F). **Per pack as listed below.**

Adapt-A-Port™ T Stopper Kits, Teflon® PTFE

With Vacuum Port and Thermometer Port Adapters

This unique adapter set consists of three Teflon® PTFE pieces. The body is threaded on the inside top to accept either a threaded vacuum port adapter or thermometer port adapter. Total interchangeability is achieved by simply unscrewing one threaded port adapter and replacing it with the other. The kit comes complete with O-rings. Not Autoclavable. **Per each kit.**

Each Kit Contains:

A. One standard taper Teflon® PTFE Adapt-A-Port™ body with a Viton® O-ring for air-tight sealing. **B.** One Teflon® PTFE threaded vacuum port adapter with a side angled serrated Teflon® PTFE nozzle for the tubing connections. **C.** One Teflon® PTFE threaded thermometer port adapter with locking compression cap on top for straight stem thermometers or glass tubing. An O-ring on the bottom threaded section guarantees air-tight sealing. Items B and C are available only as part of these kits. Not Autoclavable.

Petri Dish Incubation Tray

Organize Your Incubator

The Petri dish incubator tray holds 100mm (4") Petri dishes securely on an incubator rack. It is an excellent aid for keeping cell cultures organized and has 28 holes in the bottom, 19mm ($\frac{3}{4}$ ") in diameter, to allow air passage. Made from 1.6mm ($\frac{1}{16}$ ") thick, white epoxy-coated steel. Steam autoclavable at 121°C (250°F) for 15-20 min.

NEW PRODUCT!

Antibody Saver Tray

Minimize the use of expensive antibodies when incubating filters in the Western Blot process by using an optimally sized tray. Trays are available for popular midi and mini gels in both single and multiple lane sizes with dimensions that provide just enough clearance to easily manipulate the strip(s) in the antibody solution. Each tray is molded of polypropylene and includes an attached lid to protect against spillage. Trays are stackable, reclosable and reusable. Single lane trays are linked together for easier handling but can be separated.

Stak-A-Tray™ System

Maximize Incubator Space

Modular rack and tray system maximizes storage for Petri dishes and cell culture flasks in incubators, cold rooms or on the bench. Each rack has 4 tiers. Stack up to five racks for 20 levels of storage. Perforated trays allow air flow and slide easily in the rack. Each tier accommodates one large or two small trays. All parts are stainless steel and autoclavable at 121°C (250°F). Rack Dimensions: 37.5 x 35.8 x 10.8cm H (14 $\frac{1}{4}$ x 14 $\frac{1}{16}$ x 4 $\frac{1}{4}$ " H). Racks and trays sold separately.

Photo shows two racks stacked.

Processing Trays

Use for Staining and Developing Films

These trays can be used for staining and blot analysis in biotechnology labs as well as for photo processing. Lightweight polystyrene trays have cross bars and ribs for rigidity. Wide rims and corner spout facilitate pouring.

CATALOG NO.	INSIDE DIMENSIONS (L x W x H)	PRINT/FILM SIZE
H16105-0000	24 x 19 x 4cm (9½ x 7½ x 1½")	5 x 7"
H16108-0000	33 x 27 x 6cm (13¼ x 10¼ x 2¼")	8 x 10"

Multipurpose Tray with Snap-On Lid

This versatile, rugged tray with lid is ideal for safely storing small items or holding instruments while autoclaving. It stacks with identical trays and lids to maximize cupboard and shelf storage capacity. The shallow depth is useful for holding small vials or bottles in a water bath or on ice. Inside corners of the tray are rounded for easy cleaning. Both tray and lid are polypropylene and steam autoclavable at 121°C (250°F).

CATALOG NO.	DIMENSIONS (L x W x H)
F16230-0000	20.3 X 27.3 X 7.6cm (8 x 10¾ x 3")

Multipurpose Trays

These large capacity, rugged polypropylene trays have multiple uses. The substantial depth and 8.5 liter (9 quart) volume of each can be used to hold a large quantity of samples in a water bath or on ice. The trays are steam autoclavable at 121°C (250°F) and ideal for holding instruments while autoclaving. Use in a sink when cleaning glassware to reduce chance of damage or for transporting labware. Inside corners are rounded for easy cleaning. The top rim adds rigidity and provides handholds for transport. Each size nests with identical trays to minimize storage space requirements.

CATALOG NO.	INSIDE DIMENSIONS (L x W x H)

Polly-Crocks with Lids

Several Styles to Suit a Variety of Applications

Heavy-duty, molded polyethylene tanks will safely hold chemicals and hot liquids up to 52°C (125°F) and meet FDA requirements for food handling. The open-top tanks are stress-free and self-supporting with a seamless wall about 4.8mm ($\frac{3}{16}$ ") thick. Resistant to rust, corrosion and dents, each container's capacity is marked on both the tank and the lid. Lids have a central grip knob for easy removal and replacement. Available with or without faucet (F30852). For replacement faucets see page 420. Polly-Crocks with a sight glass can be special ordered.

Lab Drawer Compartment Trays

Fit Standard Lab Bench Drawers

36 x 44.5cm (14 x 17½") white polystyrene trays fit standard lab bench drawers and are a practical and functional solution for organizing the "stuff" of daily lab life including:

- Thermometers
- Medication Cups
- Jars
- Stir Bars
- Vials
- Pipettes

Per each, 6 per case.

	CATALOG NO.	NUMBER OF COMPARTMENTS/WELLS

Tubing Sizer - Metric Gauge

Stop Guessing...Know What Size You Need

A handy metric diameter gauge that will end doubt about inside or outside diameters. The gauge measures glass and plastic tubing, connecting pieces, rods, test tubes, etc. between 1.5 and 16mm. Holes on one side measure O.D.; pins on the other side measure I.D. Keep one with your tubing and one with your test tubes, centrifugation tubes and adaptors. Made of polypropylene, the gauge is autoclavable at 121°C (250°F)

CATALOG NO.	DIMENSIONS (L x W x H)

Complete Fitting Assortment

Make the Right Connection - 74 pieces

Stop wasting time hunting for the right tubing connection. This generous assortment of 74 fittings has everything you need for routine laboratory set-ups. A clear, hinge-top, polystyrene storage box makes it easy to find what you need, when you need it.

Kit includes pairs of commonly used sizes of connector and stopper styles as listed below:

Polypropylene Connectors:

- 5 pair Straight Tubing Connectors
- 5 pair "T" Connectors
- 6 pair Straight-Stepped Tubing Connectors
- 6 pair "Y" Connectors

Polyethylene Connectors:

- 3 pair Quick Disconnects

Polyethylene Stoppers:

- 12 pair Cup-Type

Fitting Assortment - 74 piece

28-Piece Fitting Kit

Economical and Practical

- Compatible with tubing from 4.7 to 12.7mm ($\frac{3}{16}$ to $\frac{1}{2}$ ")
- Fittings for the most common lab connections
- Clamps for flow control and quick disconnect fittings
- Fittings are molded of autoclavable, 121°C (250°F) polypropylene. (Quick disconnect fittings are polyethylene and not autoclavable)

Kit contains: 5 straight connectors, 4 stepped fittings, 8 "Y" fittings, 4 "T" connectors, 5 quick-disconnect fittings and 2 flow control tubing clamps. The plastic organizer box has room for adding other fittings and parts.

F19626-0000	28-piece fitting kit

Quick Disconnects

Mix and Match Series to Make Reducing Combinations

Full range of sizes to fit tubing from 3 to 12mm ($\frac{1}{8}$ to $\frac{1}{2}$ ") I.D. Consists of two barbed polyethylene connectors which assemble tightly together with a male-female center taper. Very useful in connecting and disconnecting vacuum lines and other tubing assemblies. All sizes are interchangeable with others to make reducing combinations. Operates at temperatures up to 80°C (176°F). **12 per bag, 6 bags per case.**

Make Bel-Art Your Manufacturing Partner

Throughout our catalog are call-outs regarding ordering products made to your specifications. Whether you need a customized Bel-Art product or a source to manufacture a product of your design, Bel-Art Products can help.

With over 60 years of experience manufacturing thousands of products for a variety of applications, our valued reputation as a successful manufacturing partner has been earned through continued investments in technology and skilled employees, and our demonstrated capabilities in processing engineering grade resins.

From design and engineering through production and distribution, our goal is to create a relationship that provides you with products that exceed your expectations and meet your budget requirements.

One time project or on-going production, Bel-Art Products offers technical support and expertise in:

- Engineering & Design - 3D Rapid Prototyping
- Manufacturing Materials and Processes
- Short to Medium Run Production
- Inventory & Shipping Logistics

Let Our Experience Guide Your Success!

Resin Codes:

LDPE Low-Density Polyethylene

PMMA..... Acrylic

HDPE High-Density Polyethylene

PC Polycarbonate

PP Polypropylene

PVC Polyvinyl Chloride

PMP..... Polymethylpentene

PS..... Polystyrene

Chemical Resistance: This chemical resistance chart is a general guide only. Because of the variety of factors that can affect the chemical resistance of a plastic product, it is recommended that the user make tests under expected use conditions. Chemicals may affect the strength, appearance, color, dimensions, flexibility or weight of plastics. Variable factors like temperature, pressure, chemical concentration, length of exposure, and combinations of chemical reagents can affect the chemical resistance of plasticware. As temperature increases, resistance to chemical attack decreases. Environmental stress cracking differs from chemical attack and is caused by the combined factors of tensile stress, the inherent susceptibility of the plastic to stress crack and stress-cracking agents. Such agents as detergents, lubricants, plating additives and brighteners and surface-active agents, even in small concentrations, may cause cracking.

Letter Codes:

E=Excellent

*No damage after 30
days of constant exposure*

NT=Not Tested

G=Good

*Little or no damage after 30
days of constant exposure*

U=Unsatisfactory

*Immediate damage, not
recommended*

L=Limited

*Some effect after 7
days of constant exposure*

Physical Properties of Resins

	Max. Use Temp. (°C)	Brittleness Temp. (°C)	Transparency	Flexibility
LDPE	80	-100	Translucent	excellent
HDPE	120	-100	Translucent	rigid
PP	135	0	Translucent	rigid
PMP	175	+20	Clear	rigid
PMMA	90	-60	Clear	rigid
PC	135	-135	Clear	rigid
PVC	70	-30	Clear	rigid
PS	90	+20	Clear	rigid

	Sterilization* Autoclaving	Sterilization* Gas	Dry Heat	Sterilization* Disinfectants	Specific Gravity
LDPE	No	Yes	No	Yes	0.92
HDPE	No	Yes	No	Yes	0.95
PP	Yes	Yes	No	Yes	0.90
PMP	Yes	Yes	Yes	Yes	0.83
PMMA	No	No	No	Some	1.18
PC	Yes	Yes	No	Yes	1.20
PVC	No	Yes	No	Yes	1.34
PS	No	Yes	No	Some	1.05

*Sterilization:

- **A Autoclaving** - Clean and rinse item with distilled water before autoclaving. Certain chemicals which have no appreciable effect on resins at room temperature may cause deterioration at autoclaving temperatures unless removed with distilled water beforehand.
- **Gas** - Ethylene oxide.
- **Dry Heat** - at 160°C.
- **Disinfectants** - Benzalkonium chloride, formalin, ethanol, etc.

Cleaning and Sterilization Guide to Plastic Labware

Scienceware® plastic labware is designed to provide many years of useful service under normal laboratory conditions. The physical properties and chemical resistance of the plastics used in the manufacture of Scienceware® plastic labware are provided for your convenience.

In addition, the following recommendations for cleaning and sterilization of plastic labware are designed to ensure their continuous, effective performance.

Cleaning:

1. Wash in a mild, non-alkaline detergent. We recommend the use of Bel-Art Aquet® Detergent F17094 (Catalog page 70).
2. Next, rinse thoroughly in tap water.
3. Final rinse in distilled water to eliminate all traces of residue.
 - To avoid damage to plastic products, do not utilize abrasive materials such as cleansers or scouring pads. Polycarbonate (PC) items should not be exposed to strong alkaline cleaning agents, as these agents will cause crazing and cracking of the polycarbonate surface.
 - If ultrasonic cleaners are employed, avoid direct contact with transducer diaphragm. When special cleaning is necessary, such as the removal of grease or oil, organic solvents (e.g., acetone, alcohols) may be applied. Use these with caution, as more than brief exposure may affect the polyolefins. Rinse again thoroughly before use. For PS or PVC, only an alcohol-based solution should be utilized. Do not use organic solvents when cleaning acrylics.
 - To remove organic matter from plastic labware, sodium hypochlorite solutions (bleaches) are suggested. A cleaning agent made of chromic acid, though effective, will eventually cause plastic to become brittle.

Laboratory Washing Machines:

Laboratory washing machines are a convenient method of cleaning most types of plastics with the exception of low-density polyethylene, acrylic and polystyrene. Items manufactured of these plastics are adversely affected by the heat involved. In addition, the strength of polycarbonate (PC) will be weakened by repeated exposure to washers. Polycarbonate labware utilized in high stress situations should be washed by hand to ensure effective performance.

When laboratory washing machines are used, water temperature should be set at 57°C (135°F) maximum. To avoid damage or abrasion, labware should be weighted down so it stays firmly in place. Exposure to the metal spindles of the washers can be eliminated by covering them with plastic tubing.

Sterilization:

Always clean items and rinse thoroughly in distilled water prior to autoclaving. To avoid pressure build-up, set closures upon containers loosely without threading. Carboys and spigots should be autoclaved empty to prevent leakage. Autoclave at 121°C (250° F) for twenty minutes to ensure sterility. Ethylene-oxide or chemical disinfectants are recommended for PVC.

Chemical disinfectants such as benzalkonium chloride, formalin, ethanol, iodophor and quaternary ammonium compounds may be used. When choosing ethyleneoxide (ETO) gas sterilization, a seven to fourteen day quarantine period is necessary for the assurance of no ETO residue.

Microwaving:

All plastic materials allow transmission of microwaves; however, please refer to the Physical Properties Chart (page 429) before using plastic containers in a microwave, as the contents in the plastic container may exceed the actual plastic container's heat resistance.

Rack Selection Guide – Tubes, Vials & Bottles

Use this sizing chart to determine the rack that best fits your tubes, bottles, vials, etc. Shaded area is the size of the rack opening. Tube bottom should fit within the shaded area. Catalog pages for racks designed to fit each tube or bottle size are located next to each schematic.

Scienceware® racks are manufactured from the highest quality materials and assure a precise fit for your tubes, bottles or vials. Choose from Poxygrip® coated wire racks, No-Wire™ polypropylene supports (racks) or any of our other molded plastic racks, each with unique features designed to meet your specific needs. Most Scienceware® racks are autoclavable, and many racks either stack or “knock down” for convenient storage.

If you have customized needs for a unique rack design that requires a special size, material or configuration, please contact us at 1.800.4BELART for a custom manufacturing quote.

Key to Icons

For your convenience, the following symbols, or icons, are used throughout this catalog. They serve to identify the areas in the lab where the product(s) can be used, safety/environmental hazards, processes and component materials.

Relates to products involving radioactive materials.

Indicates a Biohazard; usually found on waste containers.

Indicates that a product may be autoclaved.

Indicates that the product is CE Certified.

Indicates that the product is ETL listed.

High Density Polyethylene

Low Density Polyethylene

Polycarbonate

Polyethylene

Polypropylene

Polystyrene

Polyvinyl Chloride

Polymethylpentene

DISCLAIMERS AND WARRANTIES

Disclaimers and Warranties

- While the information in this catalog is correct to the best of our knowledge, it is not guaranteed to be so.
- Most product dimensions and other specifications are listed in metric as well as English measurements and may be rounded for presentation. If exact specifications are critical to your application, please feel free to contact us at techsupport@belart.com to confirm data.
- Bel-Art Products are guaranteed to be free of manufacturing defects. Should you feel you have received a defective product please contact our customer service department cservice@belart.com as soon as you receive your shipment.
- The end use of all products is beyond our control. No warranty express or implied is given regarding the end use or fitness of any product for any particular purpose. For full warranty information please visit our web site www.belart.com.
- For current pricing information please contact our customer service department. Pricing is subject to change at any time with or without notice.
- Merchandise held beyond six months, custom orders, private labeled products, sterile products, products with an expiration date of less than one year and discontinued items cannot be returned. Other terms and conditions may also apply.

For complete terms and conditions please contact cservice@belart.com or 1-800-4BELART (423-5278).
